Labels for Thermal Transfer Printers

Thermal Transfer Labels - 795 Polyester

HellermannTyton's metalized polyester labels include a layer of metallic particles that give the appearance of being made of metal. Applications include asset tracking and product rating plates. The high operating temperature makes them suitable for use on electronic equipment. Great for replacing expensive metal stampings, engravings and even silk screened rating plates, the printed labels offer high quality imaging for text and graphics and can be permanently placed on a wide variety of flat surfaces.

Features and Benefits

- Metalized polyester has a matte finish, allowing for the highest resolution and print contrast.
- The acrylic-based adhesive bonds to a wide variety of substrates and can withstand high temperatures long term.

MATERIAL	Type 795, Polyester (PET)
Adhesive	Acrylic
Operating Temperature	-40°F to +300°F (-40°C to +149°C)
