Fiber Optic Cable Tape

Designed to be used on the Lightguide Fiber Optic Protection System to identify the routing of fiber optic cable. It is a 1" wide range vinyl with black lettering that states, "FIBER OPTIC CABLE." The legend is repeated every six inches.

Features and Benefits

- Markers are pre-coiled so that they can be snapped into place over the cable without the use of adhesives.
- Non-adhesive design means that the markers can be installed at any temperature or over dirty or oily surfaces.
- Pre-printed text is protected by a thick layer of clear acrylic which provides UV protection and abrasion resistance.

MATERIAL	Vinyl
Operating Temperature	-18°F to +200°F (-29°C to +93°C)

PART NO.	TYPE	Label Width (W) in. (mm)	Roll Length (L) ft. (m)	Color
TFOT-1	TFOT1	1.0 (25.4)	54.0 (16.5)	Orange

Dimensions are approximate and subject to technical changes. Use Part No. for ordering and Type for specification purposes.
