

Specification Sheet

Part Number: FSTTBAXBFA11

Article Number

857-00616

Type

FSTTB-AXBFA11

Color

Black (BK)

Features & Benefits

- Compact size makes it ideal for restoration use, distribution drops, Distributed Antenna Systems (DAS) and Remote Radio Head (RRH/RRU) applications.
- Aerial mounting, underground vault or direct burial for installation where fibers are needed.
- Mid span possible for simple routing within Passive Optical Networks (PON).

Quantity Per

kit

Product Description

The FST is a compact, cap-ended, ready-access, fiber-optic splice closure for use in aerial, underground and directly buried installations. Its small size, port flexibility and value make the FST popular for splicing low fiber count distribution cables in FTTH, FTTC, trunk and campus networks, as well as CATV and CCTV installations. The 4-port base configuration offers three round ports and one oval port for loop-through applications. Cover is environmentally sealed to the base using a rolling O-ring. Cable entry/exit points in the base are environmentally sealed using either Cablelok mechanical seals or heat-shrink sleeves.

Short Description

FST, 4 Port, 1 Hellapon Small Tray with cable storage basket (12 fiber), PP, Black, 1/pkg

Global Part Name

FSTTB-AXBFA11

Technical Description

The FST 4 Port closure is supplied with a Polypropylene base. The base configuration of 3 round ports and 1 oval port covers a cable diameter range of 4.0 – 16.5mm when using Cablelok mechanical seals and 6.0 – 22.0mm when using heatshrink. The mounting system is manufactured from Grade 304 stainless steel and can accommodate a maximum of 2 Hellapon Small trays or 1 Hellapon Small tray and basket giving a maximum of 24 fibre splices based on 12 fibres per tray. The fibre basket provides storage space for the storage of fibre loops within the closure. The tubed closure and the position of the mounting system allows for ease of access and traceability of the fibre on to the trays. The trays are white which makes it easy to see the colour of the fibre elements as they are routed through the fibre management system and on to the trays.
