

A3

Switches & Pilot Devices

LW Series offer flexibility in space-saving package

Key features include:

- PC board mount, solder or screw terminal
- Collective mounting saves space
- Non-reflective lens
- Highly visible marking plate
- Tamper proof construction
- Light touch reduces strain
- Gold or silver contacts
- Removable contacts simplify wiring and facilitate PCB applications

LW Series switches and pilot lights can be mounted collectively on 1.0" centers. Combined with pcb terminals and locking lever removable contacts, this eases manufacture of pre-fab pushbutton arrays (as pictured). PC Board tracing/soldering of contacts can be done in tandem with panel cutting/operator installation.

All LW series units mount by means of a locking ring that comes on from the rear of the panel, as such they can not be removed from outside the panel and are relatively tamperproof.

Combining the snap action and tactile feel of miniature commercial pushbuttons with the size and ruggedness of industrial pushbuttons, LW pushbuttons are a unique solution to many applications.

Choose from standard silver contacts or low-level gold plated contacts. Terminals available in .110" solder tab, M3 screw, or pcb pins.

Specifications

Specifications	Operating Temperature		-25 to +60°C (without freezing) LED illuminated type: -25 to +50°C
	Storage Temperature		-40 to +80°C
	Operating Humidity		45 to 85% RH
	Contact Resistance		50mΩ maximum (initial value)
	Insulation Resistance		100MΩ minimum (500V DC megger)
	Dielectric Strength	Switch Unit	Between live part and ground: 2,500V AC, 1 minute Between terminals of different poles: 2,500V AC, 1 minute Between terminals of the same pole: 1,000V AC, 1 minute
		Illumination Unit	Between live part and ground: 2,500V AC, 1 minute
	Vibration Resistance		Operating extremes: 5 to 55Hz, Amplitude 1.0mm p-p
	Shock Resistance		Damage limits: 1,000 m/sec ² (Approx. 100G) Operating extremes: 100 m/sec ² (Approx. 10G)
	Mechanical Life		Momentary: 1,000,000 operations minimum Maintained: 500,000 operations minimum Selectors: 250,000 operations minimum
	Electrical Life		Momentary: 100,000 operations minimum (at 1,800 operations/hour) Maintained/Selector: 100,000 operations minimum (at 900 operations/hour)
	Degree of Protection		Watertight/oiltight IP65 (IEC Pub529) (except key selectors)
	Insulation Voltage		250VAC/DC
	Materials	Lenses	polyarylate

A3

Switches & Pilot Devices

Contact Ratings	Contact Material	Thermal Current	Contact Rating	Remarks
	Gold-clad cross-bar	3A	30VDC/0.1A resistive	Minimum applicable load (reference value): 5V, 1mA AC/DC. (Applicable range is subject to the operating condition and load.)
			125VAC/0.1A resistive	
	Silver Contact	5A	30VDC/2A resistive	AC inductive load: PF=0.6 to 0.7, DC inductive load: L/R=7ms maximum.
			30VDC/1A inductive	
			125VAC/3A resistive(50/60Hz)	
			125VAC/2A inductive (50/60Hz)	
			125VDC/0.4A resistive	
			125VDC/0.2A inductive	
			250VAC/2A resistive(50/60Hz)	
			250VAC/1.5A inductive (50/60Hz)	

Lamp Ratings

LED	Voltage	Current/Wattage
	6V AC/DC ±10%	17mA max
	12V AC/DC ±10%	11mA max
	24V AC/DC ±10%	11mA max
	120V AC ±10%	10mA max
Incandescent	240V AC ±10%	10mA max
	6.3V AC/DC ±5%	1W
	12V AC/DC ±10%	1W
	24V AC/DC ±10%	1W

UL Recognized
File # E55996

CSA Certified
File No. LR21451

Registration
TÜV Rheinland No. J9551801

LED lamps contains a built-in current-limiting resistor and reverse polarity protection diode.

Part Numbers: Lamps (not included in assemblies)

Type	Voltage	Part Number
LED	6V AC/DC±10%	LSTD-6②
	12V AC/DC±10%	LSTD-1②
	24V AC/DC±10%	LSTD-2②
	120V AC±10%	LSTD-H2②
	240V AC ±10%	LSTD-M4②
Incandescent	6.3V AC/DC	IS-6
	12V AC/DC	IS-12
	24V AC/DC	IS-24

② LED/Lens Color Code

Color	Code
Amber	A
Green	G
Red	R
Blue	S
White	W
Yellow	Y

1. In place of ②, specify the LED Color Code.
2. The LED contains a current-limiting resistor and reverse polarity protection diode.

Accessories — LW Series

Style	Description/Usage	Part Number
Ring Wrench (optional) 	1. Metallic tool used for tightening the plastic locking ring when installing the LW series on a panel. 2. Tightening torque should not exceed 1.2N-m (12 kgf-cm) when tightening a locking ring.	LW9Z-T1
Lamp Holder Tool (optional) 	Rubber tool used for replacing incandescent or LED lamps installed in illuminated switches and pilot lights and pilot lights 	OR-55
Terminal Cover (for solder tab terminal) 	Nylon cover for pushbuttons and selectors with solder terminals snaps onto contact block. (Insert the lead wires through terminal cover holes before wiring.)	LW-VL2
Terminal Cover (for screw terminal) 	Nylon cover for pushbuttons and selectors for screw terminals snaps onto contact block. (Insert the lead wires through terminal cover holes before wiring.)	LW-VL2M
Terminal Cover (for unibody pilot light with solder tab terminal) 	Nylon cover for unibody pilot lights with solder terminals.	LW-PVL
Terminal Cover (for unibody pilot light with screw terminal) 	Nylon cover for unibody pilot lights with screw terminals.	LW-PVLM
Rubber Mounting Hole Plug 	Black rubber plug fills unused 22mm panel cutouts. 	OB-31
Metallic Mounting Hole Plug 	1. Used for plugging unnecessary mounting holes in the panel. Tighten the attached locking ring to a torque of 1.2N-m (12kgf-cm) maximum 2. Degree of Protection: IP66 	LW9Z-BM
Replacement Marking Plates 	White plastic engraving plate for use on all illuminated units (included in each lens). May be used to capture printed mylar insert (not supplied by IDEC) under lens face.	LW9Z-P1-W (round) LW9Z-P2-W (square) ALW3B (mushroom)
 Anti-Rotation Ring	Prevents rotation of switches in panel. (included with all selector and key switches only)	LW9Z-L
Replacement Keys 	One pair of keys. (#231)	KG9Z-SK
Replacement Locking Ring 	Use to secure operator to panel. (included with all assembled switches and operators)	LW9Z-LN

For replacement lamps, see previous page.

Mounting Hole Layout

- When determining mounting centerlines, allow for easy operation.
- Mushroom ($\varnothing 1.17"$ ($\varnothing 30$ mm)) = 1.248" (32mm)
 Tab terminal = 1.014" (26mm) (with/without terminal cover)
 PC board terminal = 1.014" (26mm)
 Screw terminal = 1.56" (40mm)
- Mushroom ($\varnothing 1.17"$ ($\varnothing 30$ mm)) = 1.248" (32mm)
 Tab terminal = 1.053" (27mm) (with terminal cover)
 Tab terminal = 1.014" (26mm) (without terminal cover)
 PC board terminal = 1.014" (26mm)
 Screw terminal = 1.014" (26mm)

Replacement of Lens & Marking Plate

A3

Removing

1. Remove the operator (lens, marking plate, and lens holder) by inserting a screwdriver into the recess of the lens through the bezel.

2. Remove the marking plate by pushing the lens from the rear to disengage the latches between the lens and the lens holder, using the screwdriver as shown below.

The translucent filter in the lens holder can not be removed because this filter is sealed to make the unit waterproof and oiltight.

Installing

For round lens types, place the marking plate on the lens holder with the anti-rotation projection engaged and press the lens onto the lens holder to engage the latches. For square lens types, insert the marking plate into the lens, and press the lens onto the lens holder to engage the latches. Pay attention to the orientation of the marking plate.

Pay attention to the orientation of the marking plate.

For Round Lens

For Square Lens

Replacement of Lamps

Lamps can be replaced using the lamp holder tool (OR-55) from the front of the panel. Also by removing the contact block from the operator unit, the lamp can be replaced.

Replacement of Lamps from the Front of the Panel.

(How to Remove)

1. Push and turn the lamp counterclockwise using the side A of the lamp holder tool, and the lamp and the lamp holder can be removed.

(How to Install)

1. Insert the lamp into the lamp holder tool and hold the lamp as in the following illustration.

2. Place the insertion guide of the lamp and the groove in the operator unit in

the same direction. Then push the lamp lightly and turn it clockwise.

Replacement of Lamps by Removing the Contact Block

The lamp can be replaced by removing the contact block without using the lamp holder tool.

Marking Plates & Films

For LW series illuminated pushbuttons and pilot lights, legends and symbols can be engraved on marking plates, or printed mylar can be inserted under the lens for labelling purposes.

Marking Plate and Marking Film Size

Lens Style	Round Lens	Square Lens
Built-in Marking Plate		
	Engraving must be made on the engraving area within 0.02" (0.5mm) deep. The marking plate is made of white acrylic resin.	
Applicable Marking Film		
	Mylar for printing labels are not included and must be provided and printed by user. Two 0.004" (0.1mm)-thick films or one 0.008" (0.2mm)-thick film can be installed in the lens. Recommended marking film: Mylar	

Insertion Order of Marking Plate & Film

For Round Lens

Insertion Order of Marking Plate & Film.

For Square Lens

1. Mylar is not included.

2. Pay attention to the orientation of marking plate.

Instructions con't

Panel Mounting

Remove the contact block from the operator. Insert the operator into the panel cut-out from the front, then install the contact block to the operator.

Removing the Contact Block

Turn the locking lever on the contact block in the direction opposite to the arrow on the housing. Then the contact block can be removed.

Installing the Contact Block

Insert the contact block, with the TOP markings on the contact block and the operator placed in the same direction. Then lock the units, turning the locking lever in the direction of the arrow.

Notes on Mounting

Use the optional Ring Wrench (LW9Z-T1) to mount the operator onto a panel. Tightening torque should not exceed 1.2N·m (12 kgf·cm). Do not use pliers. Excessive tightening will damage the locking ring.

Wiring

1. Solder the terminals within 20W/5 seconds or 260°C/3 seconds without exerting external force to the terminals. While soldering, do not touch the soldering iron to the housing. While wiring, prevent tension from being applied to the terminals. Do not bend or raise the terminals, nor exert excessive force to terminals.
2. Use a non-corrosive resin liquid flux.

Collective Mounting

As the locking lever can be turned easily from the rear of the units using a screwdriver, the contact blocks can be removed even when mounted collectively.

Notes for Terminal Cover

(Solder/Tab Terminal)

Insert the terminal cover into the contact block with the TOP markings on the contact block and the terminal cover in the same direction.

When wiring, insert the lead wires into the terminal cover holes before wiring.

Notes for Wiring

When installing a terminal cover onto the solder/tab terminal contact block, solder the inside of lamp terminal (toward the switch terminals) and wire.

(Screw Terminal Type)

Install a terminal cover to the control unit before wiring.

1. After wiring, terminal covers cannot be installed.
2. When terminal covers are used, round crimping terminals cannot be used.

Connection

Positive-lock connector and easy-lock connector are applicable to tab terminals.

Single Board Mounting

Mounting the switches and pilot lights on one PC board offers the following features.

1. Reduced installation labor, easy wiring, space saving, and standardization.
2. Since the contact blocks on the PC board can be removed easily using a locking lever, the LW series switches and pilot lights are easy to maintain.
3. Because the LW series switches and pilot lights require no studs for fastening the control unit to a PC board, special preparation of operation panel is not needed.

For details on one board mounting, contact IDEC.
