PRODUCT DESCRIPTION

IDEC 6mm and 14mm interface relays provide a compact solution for general purpose relay requirements. Available in electromechanical and solid state models, the RV8 series Interface relays are ideal for PLC and electronic systems, industrial automation, panel builders, assembly machine applications and other applications that require a high switching capability in a compact space. The RV8 series interface relays can be used as interfaces between the controller and the actuator to switch small and medium size loads.

KEY FEATURES

- Class I, Division 2 and Class I, Zone 2 Hazardous Location options (electromechanical relays only)
- Solid State relay versions available (6mm only)
- Only 70mm in height from DIN rail
- Gold-plated contacts (electrical mechanical relays only)
- Pre-assembled relay and DIN mount socket
- Universal screw terminals (flat and phillips) or spring clamp terminals
- Universal AC/DC socket with built-in surge suppression and green LED
- 6A-16A contact rating (electromechanical relays only)
- Lever for easy locking and removal of relay
- Operating temperature of -40°C ~ +70°C (-20°C ~ +60°C for SSR)
- RoHS compliant

(when using combination of RV relay and SV socket)

PRODUCT DESCRIPTION

14mm interface relays are ideal for panels with limited room, these low-profile relays provide up to a 40% reduction in DIN rail space when compared with standard plug-in relays. RV8 relays are good for higher load switching applications, panels with high I/O content and commercial HVAC panels. UL listed when paired with a corresponding socket.

- Jumper combs come with 20 points for 6mm relays. If shorter lengths are needed, simply cut off the excess points.
- Ensure that the total current to the jumper does not exceed the overall rated current (Rated current: 6A).
- Jumper combs come with 16 pairs of combs for 14mm relays. If shorter lengths are needed, simply cut off the excess points.
- Ensure that the total current to the jumper does not exceed the overall rated current (Rated current: 6A for spring-clamp terminals and 8A for screw type terminations).
- Width of spacer: 2mm
- When using a cut jumper, please use a spacer on the cut side. For additional information see instruction sheet.
