IDEC

Think Automation and beyond...

IDEC FT1A SmartAXIS
Value. Versatility. The New Breed of Controllers.

Value. Versatility. The New Breed of Controller!

The ideal solution for a variety of applications.

Presenting FT1A, the newest family of SmartAXIS controllers from the industry's original manufacturer of micro PLCs. FT1A controllers deliver affordability without compromise. Features and functions are already built in, so engineers can now enjoy more versatility and more choices for their automation needs than ever before.

Designed to give you the most bang for your buck, these simple, powerful controllers deliver an exceptional value. FT1A controllers are available with 12, 24, 40, or 48 I/O, while a 3.8-inch HMI + PLC with sophisticated features and a super-bright LCD screen is also available.

All FT1A controllers meet the highest industry standards for quality and safety. The FT1A SmartAXIS family is CE compliant, cULus listed, has an ABS type approval and is Class I Division 2 rated for hazardous locations. Whatever your application requires, the FT1A SmartAXIS family has a solution!

IDEC

A Breed of Its Own

The perfect combination of PLC processing and HMI monitoring and control, the 3.8-inch FT1A Touch is an all-in-one touchscreen interface and logic controller. With a compact body and full complement of features, FT1A Touch is perfect for small systems that require a graphical user interface along with versatile I/O controls at a truly affordable price.

USB-A Port
Embedded USB-A port for data logging

USB Mini-B
Embedded USB mini-B port for programming.

Control Functions

Fast Processing Speed

Basic instructions can be processed in 1850μs per 1000 steps of programming.

Data Logging

Critical data can be saved and logged into a USB memory stick then retrieved over an Ethernet connection or by removing the USB memory stick from the FT1A Touch and inserting it into a laptop or PC.

Easy Program File Transfer

Project files can be transferred between a USB memory stick and the FT1A Touch. It is a quick and convenient way for an OEM to program multiple units and for users to quickly update ladder and HMI programs.

Easy data transfer

Digital and Analog Inputs

The FT1A Touch is equipped with 8 digital inputs, two of which can be configured as 0-10V DC or 4-20mA analog inputs with 10-bit resolution, reducing overall system cost.

High-speed Counters

With 8 built-in inputs, 4 can be configured as high-speed counters, with a maximum frequency (range) of 10kHz for single-phase or 5kHz for dual-phase.

Remote I/O

Up to three FT1A controllers (24, 40 and 48 I/O) can be configured as remote I/O slaves for the FT1A Touch, expanding your system's potential. A maximum of 158 I/O can be achieved.
Analog Expansion Cartridges

Using analog expansion cartridges, FT1A Touch can accept 0-10V DC, 4-20mA, RTD and Thermocouple inputs, with 12 to 15-bit resolution.

PID Controls

With an improved PID algorithm and easier-to-configure dialog box, PID controls can be monitored using a single screen. Advanced PID control functions, such as auto-tuning, ARW (anti-reset windup) and bumpless transfer, are also supported.

Large Programming Memory

With 47.4KB of logic controls programming memory, complex PLC programs can be constructed without much restriction. And with 5MB of configuration memory for the display, a unique and professional display interface can be easily configured.

10A Relay Outputs

With 10A contact ratings on all four of the relay outputs, the FT1A Touch can be directly connected to a solenoid valve or motor, which eliminates interposing relays and reduces wiring.

800.262.4332
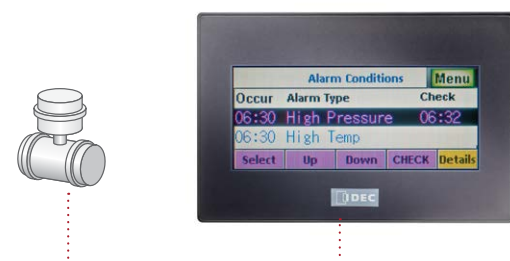

Display Functions

Ethernet Connectivity

With the embedded RJ45 Ethernet port, FT1A project files can be remotely uploaded or downloaded over an Ethernet connection. Critical logging data can also be retrieved quickly.

Modbus TCP or RTU

The built-in Ethernet ports allow the FT1A Touch to be configured as a Client (Master) or Server (Slave) on the Modbus network. Modbus RTU (Master/Slave) is also supported. With these capabilities, FT1A Touch can communicate with other PLCs or devices using Modbus protocol.

Ladder Program and I/O status

Ladder programs can easily be monitored and controlled on the 3.8" (3.7"monochrome) display. It is a unique tool to debug the system without using WindLDR software and a PC. I/O status and any control parameter such as data register, timer, and internal relay can also be monitored and controlled.

65,536 TFT Color LCD

With so many color combinations, an intuitive and crisp graphical user interface can be constructed with unparalleled visibility.

Super-Bright LED

The 65K TFT color unit is rated at 400cd/m^2, while the monochrome unit is rated at 740cd/m^2. With 32 levels of brightness control, the backlight can even be adjusted according to the surrounding conditions.

Drivers for IDEC and other PLCs

FT1A Touch can easily be configured to communicate with IDEC or other PLCs such as Siemens, Automation Direct, Mitsubishi, Omron, and more.

Fast Start-up

Once power is applied to the FT1A Touch, it takes only 3 seconds for it to be fully functional. The fast start-up allows for fast, easy debugging and stress-free operation.

FT1A Controllers

FT1A controllers are designed for a range of applications that demand powerful and abundant features. Available with 12, 24, 40 and 48 I/O with and without embedded LCD/keypad, these controllers enable engineers to design cost-effective solutions.

Digital, Analog and High-speed Inputs

Inputs on the 24V DC power models can be configured as digital, 0-10V DC analog or high-speed counters. Up to 8 analog inputs with 10-bit resolution and up to 6 HSC 100kHz can be configured.

Universal Voltages

24V DC or 100-240V AC

RJ45 Ethernet Port

The embedded Ethernet port on the FT1A controllers provides users with easy access for remote maintenance and communication. It also supports industry standard Modbus TCP protocol. With Ethernet Remote I/O capability, the FT1A controller's I/O can be easily expanded.

Smart LCD Screen

The display (24 digits x 4 lines) can provide visual feedback of system status, I/O status, user configurable messages with dynamic data, bar graph, and ladder program monitor and controls.

Non-LCD Model

FT1A controllers are also available without embedded LCD/keypad. It's a cost-effective, tamper-proof solution.

Real-Time Clock

Every FT1A controller is equipped with an embedded real-time clock for time-controlled applications. With the built-in, real-time clock, log data can also be tracked and, with just a click, daylight savings time can easily be setup.

USB mini-B

With the USB mini-B port, communication with FT1A controllers is extremely convenient as standard USB Type A to mini-B cables can be used.

RS232C and RS485 Ports

Up to two RS232C and/or RS485 communication cartridges can be plugged into the FT1A controllers to allow the PLC to communicate with other serial devices. It also supports industry standard Modbus RTU protocol.

Large Programming Memory

With up to 47.4KB (11,850 steps) of programming memory, FT1A controllers have enough memory for even complex PLC programming.

Note: Features available on specific models.
See page 14 for selection guide.

Actual Size

SD Memory Card

With the embedded SD memory slot, critical data can be easily logged and retrieved over Ethernet connections or simply remove the SD card and plug it into your PC.

Memory Cartridge

The optional memory cartridge can be used to easily transfer programs from the internal ROM memory of FT1A controllers to a memory cartridge or vice versa. It's a convenient method to update the PLC program in the field.

10A Relay and High-speed Outputs

The FT1A controller with relay outputs is equipped with four 10A relay contacts. The transistor outputs model is also equipped with two 100kHz high-speed outputs for simple positioning controls. With remote I/O capability, additional outputs can easily be added.
800.262.4332

From Connecting to Remote Access

From connectivity to remote access to visual display, FT1A leads the way with versatile, full-featured controllers. No other controllers offer such a broad range of capabilities at such a competitive price.

Modbus TCP and RTU

Modbus communication is the most common protocol in the automation industry. The entire FT1A family (except the 12 I/O CPU) supports Modbus TCP and Modbus RTU, making communication with other devices a breeze.
Ethernet Connectivity

Thanks to the embedded RJ45 Ethernet port (on all models except 12 I/O), FT1A controllers can be easily accessed from remote locations. Using WindLDR software, PLC programs can be updated remotely and critical parameters monitored and controlled. Remote connectivity is a critical part of today's control environment, and FT1A controllers meet every challenge with fast, easy, and reliable Ethernet connectivity.

SD Memory Card

FT1A 40 and 48 I/O controllers are equipped with an SD memory slot for data logging. Memory cards up to 32GB are supported. Log data is time/date stamped and stored in .CSV format, making it simple to review and analyze critical system data.

Smart LCD Display

With the embedded LCD screen, I/O status, system menus, customized dynamic messages, and bar-graph readouts can all be configured and displayed. Ladder programs can be displayed and controlled as well. You can configure up to 50 customized messages, all with dynamic values (24 digits by 4 lines max.). The backlight can be turned on or off. Scrolling and flashing are also supported.

Remote I/O

The FT1A remote I/O, available in all Ethernet-capable modules, enables you to expand the number of inputs and outputs by simply connecting separate FT1A modules via Ethernet as remote I/O slaves. The FT1A remote I/O can monitor and control a total of 192 points of I/O.
48-I/O type (master) + 48-I/O type (slave) + 48-I/O type (slave) + 48-I/O type (slave) = 192 I/O
(30 inputs, 18 outputs) + (30 inputs, 18 outputs) + (30 inputs, 18 outputs) + (30 inputs, 18 outputs) = 120 inputs, 72 outputs

Built-in Analog Inputs

The FT1A controllers support up to 8 built-in, 0-10V DC analog inputs with 10-bit resolution, depending on the model. Having the option to configure the analog inputs on the CPU saves you time, space and money.

100kHz, High-Speed Counters and Outputs

Models with transistor outputs feature two 100kHz high-speed outputs for positioning control and all FT1A controllers are equipped with up to six 100kHz high-speed counters.

10 Amp Relay Contacts

FT1A controllers with relay outputs offer 10 Amp rated contacts. Traditional PLC relays are only rated for 2 Amps. Therefore, FT1A controllers reduce the need for, and spare you the cost of, using interposing relays.

Built-in Real Time Clock

Equipped with a real-time clock for use with any time-controlled applications, FT1A controllers have built-in support for US, Canadian, European, and Australian daylight savings time. The option for the user to configure their own custom daylight savings schedule is also available, providing the utmost in flexibility.

USB Maintenance Port

A convenient USB mini-B maintenance port is standard on all FT1A controllers, which means any standard Type A to mini-B USB cable can be used. No special cable is necessary.

800.262.4332

A Complete Automation Suite: All-in-one Configuration Software

Automation Organizer (AO) is a powerful software suite containing WindLDR PLC programming software, WindO/I-NV2 HMI configuration software, WindO/I-NV3 FT1A Touch configuration software, and WindCFG system configuration software. AO is an all-in-one automation software package for IDEC PLCs and IDEC HMIs. The news gets even better, because AO software upgrades are always FREE.

WindO/I-NV3

WindO/I-NV3 is our exclusive configuration software for the FT1A Touch. Using the same platform as WindO/I-NV2 HG HMI programming software, WindO/I-NV3 provides users with the same intuitive experience. Users can easily display alarm screens, trend and bar graphs, scrolling texts and meters. With thousands of industry-standard bitmap libraries, creating a professional interface is just a click away.
WindLDR

All IDEC PLCs—including the FT1A family—are programmed with WindLDR software. This icon-driven programming tool combines logic and intuition with an incredibly easy-to-use interface. Offline simulation, I/O Force and program bookmarks are just some of the standard features you'll find in WindLDR. Newly added for FT1A are Function Block Diagram (FBD) and Script programming. Over the years, WindLDR has proven to be the most user-friendly, intuitive software available for beginners and advanced programmers alike.
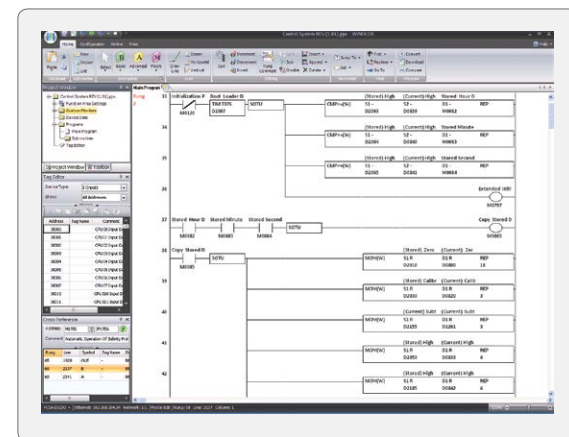

Simulation Mode

WindLDR allows you to simulate ladder and Function Block Diagram (FBD) programs in FT1A. You can easily test and verify functionality of your ladder and FBD programs without having to connect any hardware.
Comment Download Settings

The comment download settings allow you to choose whether to download Tag names, rung comments, custom monitor dialog boxes or file names. The biggest advantage of utilizing these settings is that once a program is retrieved from the PLC, all these important parameters will be available.

Function Block and Scripting

In addition to ladder logic, WindLDR now supports Function Block Diagram (FBD) and Script programming. With the FT1A controllers, you now have the flexibility and convenience of programming using any or all of these methods.

Ground	D-type ground (Class 3 ground)			
Protective Grounding Conductor	UL1007 AWG16			
Vibration Resistance	5 to 8.4Hz half amplitude 3.5mm, 8.4Hz to 150Hz acceleration $9.8m/s^2$(1G), 2 hours per axis on each of three mutually perpendicular axis(IEC 61131-2)			
Shock Resistance	$147m/s^2$, 11ms, X, Y, Z directions 3 times (IEC 61131-2)			
Mounting Structure	DIN rail or direct mount			
Weight (approx.) — AC Power	12-I/O: 230g, 24-I/O: 400g, 40-I/O: 580g, 48-I/O: 540g			
Weight (approx.) — DC Power	12-I/O: 190g, 24-I/O: 310g, 40-I/O: 420g, 48-I/O: 380g			

FT1A Version V110 are UL, c-UL Listed at 0 to +50°C.

Touch (PLC + HMI) / Pro/Lite FT1A (LCD Model/No LCD Model)

1. Except for timer, counter, input Function Block, and output Function Block. 2. 100kHZ when single-phase, 50kHz when two-phase multiple 2.4. 3. Not isolcated from internal circuits.
4. When communication cartridge is installed.   5. The maximum capacity is 32 GB. DLOG and TRACE instructions are used to write data.   6. First four outputs are 10A. Remaning are 2A.

Display Specifications

Touch/Pro (PLC + HMI/Built-In LCD)

Model	Touch		Pro (Built-in LCD)
Display Element	TFT color LCD	STN monochrome LCD	STN monochrome LCD
Colors/Shades	65,536 colors	Monochrome 8 shades	Monochrome
Effective Display Area	88.92 W x 37.05 H mm	87.59 W x 35.49 H mm	47.98 W x 18.22 H mm
Display Resolution	240 W x 100 H pixels		192 W x 64 H pixels
View Angle	Left/right 40°, top 20°, bottom 60°	Left/right/top/bottom: 45°	Left/right 30°, top 20°, bottom 40°
Contrast Adjustment	Not Available	32 levels	Not Available
Backlight	LED	LED (white, red, pink)	LED (green)
Backlight Life	50,000 hours Note 1		—
Brightness	400cd/m² Note 2	740cd/m² Note 2	45cd/m² Note 2
Brightness Adjustment	32 levels		Not Available
Backlight Control	On/off		
Backlight Replacement	Not Available		
Display Character Size — 1/4 Size	8 x 8 pixels (Japanese Katakana, JIS 8-bit code, ISO 8859-1 [Latin 1], ANSI 1250 [Central Europe]), ANSI 1257 (Baltic), ANSI 1251 (Cyrillic)		—
Display Character Size — 1/2 Size	8 x 16 pixels (Japanese Katakana, JIS 8-bit code, ISO 8859-1 [Latin 1], ANSI 1250 [Central Europe]), ANSI 1257 (Baltic), ANSI 1251 (Cyrillic)		8 x 16 pixels Japanese Katakana, JIS 8-bit code, ISO 8859-1 (Latin 1), ANSI 1251 (Cyrillic)
	16 x 32 pixels, 24 x 48 pixels, 32 x 64 pixels (Western European languages: ISO 8859-1)		
Display Character Size — Full Size	16 x 16 pixels (Japanese JIS first and second level characters, simplified Chinese, traditional Chinese, Korean)		16 x 16 pixels (Japanese JIS first level characters, Chinese)
Display Character Size — Double Size	32 x 32 pixels (Japanese JIS first level characters, Mincho font)		—
No. of Characters — 1/4 Size	30 characters x 12 lines/screen		—
No. of Characters — 1/2 Size	30 characters x 6 lines/screen		24 characters x 4 lines
No. of Characters — Full Size	15 characters x 6 lines/screen		12 characters x 4 lines
No. of Characters — Double Size	7 characters x 3 lines/screen		—
Character Magnification	0.5x, 1x, 2x, 3x, 4x, 5x, 6x, 7x, 8x, vertically and horizontally		—
Character Attributes	Blink, reverse, bold, shadowed (blink is 1 or 0.5sec)		Blink, reverse
Graphics	Line, polyline, polygon, rectangle, circle, ellipse, arc, pie, equilateral polygons (3, 4, 5, 6, 8), fill, picture		—
Window Display	3 pop-up screens + 1 system screen		—

1. The backlight life refers to the time until the brightness reduces by half after use at 25°C.
2. Brightness of LCD only (monochrome LCD: when lit white).

Operation Specifications

Touch/Pro (PLC + HMI/LCD Models)

Model	Touch	Pro (Built-in LCD)
Switching Element	Analog resistive membrane (touch panel)	Rubber switches
Operating Force	0.2 to 2.5N	2.0N minimum
Mechanical Life	1 million operations	10,000 operations
Acknowledgment Sound	Electric Buzzer	Not provided
Multiple Press	Not possible	Possible

Analog Cartridge Specifications (Touch Transistor Output Model)

Part No.	FC6A-PJ2A	FC6A-PJ2CP	FC6A-PK2AV	FC6A-PK2AW
Type	Voltage/Current Input	Temperature Input	Voltage Output	Current Output
Rated Voltage	5.0V, 3.3V (supplied from the Touch)			
Consumption Current	5.0V: — 3.3V: 30mA		5.0V: 70mA 3.3V: 30mA	5.0V: 185mA 3.3V: 30mA
Weight	15g			

800.262.4332

Input Specifications

Part No.	FC6A-PJ2A		FC6A-PJ2CP	
Input Type	Voltage Input	Current Input	Resistance Thermometer	Thermocouple
Input Range	0 to 10V DC	4 to 20mA DC 0 to 20mA DC	Pt100: −200 to +850°C Pt1000: −200 to +600°C Ni100: −60 to +180°C Ni1000: −60 to +180°C 3-wire RTD	K: −200 to 1300°C J: −200 to 1000°C R: 0 to 1760°C S: 0 to 1760°C B: 0 to 1820°C E: −200 to 800°C T: −200 to 800°C N: −200 to 1300°C C: 0 to 2315°C
Input Impedance	1MΩ min.	250Ω max.	1MΩ min.	
Allowable Conductor Resistance	—		10Ωmax	—
Input Detection Current	—		Typ: 0.2mA, 1.0mA max.	—
A/D Conversion — Sample Duration Time	10ms		250ms	
A/D Conversion — Sample Interval	20ms		500ms	
A/D Conversion — Total Input System Transfer Time	20ms + 1 scan		500ms + 1 scan	
A/D Conversion — Type of Input	Single-ended input			
A/D Conversion — Operating Mode	Self-Scan			
A/D Conversion — Conversion Method	SAR			
Input Error — Maximum Error at 25°C	±0.1% of full scale	±0.1% of full scale	±0.1% of full scale Cold junction compensation accuracy ±4.0°C or less. Exceptions R, S thermocouple error: ±6.0°C (0 to200°C range only) B thermocouple error: Not guaranteed (0 to 300°C range only) K, J, E, T, N thermocouple error: ±0.4% of full scale (0°C or lower range only)	
Input Error — Temperature Coefficient	±0.02%/°C of full scale			
Input Error — Reproducibility After Stabilization Time	±0.5% of full scale			
Input Error — Non-liniarity	± 0.01% of full scale			
Input Error — Maximum Error	±1.0% of full scale			
Data — Digital Resolution	4096 increments (12 bit)		Pt100: 10,500 (14bit) Pt1000: 8000 (13 bit) Ni100: 2400 (12 bit) Ni1000: 2400 (12bit)	K: 15,000 (14 bit) J: 12,000 (14 bit) R: 17,600 (15 bit) S: 17,600 (15 bit) B: 18,200 (15 bit) E: 10,000 (14 bit) T: 6,000 (13 bit) N: 15,000 (14 bit) C: 23,150 (15 bit)
Data — LSB Input Value	2.44mV (0 to 10V DC	4.88μA (DC0 to 20mA) 3.91μA (DC4 to 20mA)	0.1°C 0.18°F	
Data — Data Format in Application	Can be arbitrarily set for each channel in the range of −32,768 to 32,773			
Data — Monotonicity	Yes			
Noise Resistance — Maximum Temporary Deviation During Electrcal Noise Tests	±4.0% full scale max.			
Noise Resistance — Recommended Cable	Shielded twisted pair			
Noise Resistance — Crosstalk	1LSB max.			
Isolation	None			
Effect When Input is Incorrectly Wired	No damage			
Maximum Allowable Constant Load (non-destructive)	13V DC	40mA	13V DC	
Input Type Modification	Software programming			
Calibration to Maintain Rated Accuracy	Impossible			

Output Specifications

Part No.		PC6A-PK2AV	FC6A-PK2AW
Output Type — Type		Voltage Output	Current Output
Output Type — Voltage Output		0 to 10V DC	—
Output Type — Current Output		—	4 to 20mA DC
Load — Impedance		2kΩ min.	500kΩ max.
Load — Load Type		Resistance Load	
D/A Conversion — Cycle Time		20ms	
D/A Conversion — Settling Time		40ms max.	20ms max.
D/A Conversion — Total Output System Transfer Type		60ms+1 scan	40ms+1 scan
Output Error — Maximum Error at 25°C		±0.3% of full scale	
Output Error — Temperature Coefficient		±0.02%/°C of full scale	
Output Error — Reproducibility after Stabilization Time		±0.4% of full scale	
Output Error — Non-linearity		±0.01% of full scale	
Output Error — Output Ripple		30mV max.	
Output Error — Overshoot		0%	
Output Error — Maximum Error		±1.0% of full scale	
Output Error — Effect of Improper Output Terminal Connection		No damage	
Data — Digital Resolution		4096 incrememts (12 bits)	
Data — LSB Output Value		2.44mV (0 to10V)	3.91μA (4 to 20mA)
Data — Data Format in Application		0 to 4095 (0 to 10V)	
Data — Monotonicity		Yes	
Data — Open Current Loop		—	Cannot be detected
Noise Resistance — Maximum Temporary Deviation During Electrical Noise Tests		±4.0 full scale max.	
Noise Resistance — Recommended Cable		Shieleded twisted pair	
Noise Resistance — Crosstalk		1 LSB max.	
Isolation		None	
Calibration to Maintain Rated Accuracy		Impossible	
Selection of Output Signal Type		Voltage output only	Current output only

Applicable Wire

Cartridge Part No.	FC6A-PJ2A	FC6A-PJ2CP	FC6A-PK2AV	FC6A-PK2AW
Applicable Wire	0.3mm² (AWG22) shielded twisted pair	0.3mm² (AWG22) cable	0.3mm² (AWG22) shielded twisted pair
