

*Think Automation and beyond...*

***IDEC LB Series***

*Flush Mount & 16mm Miniature Switches and Pilot Lights*

# Design & Function

Flush mount switches provide a sleek and stylish appearance. 16mm miniature switches and pilot lights with a depth of only 27.9mm accommodate smaller machines and panels.

## Compact

### Short body

The LB series is the shortest in the industry, only 27.9mm deep behind the panel. Reduces the size of machines and control panels.

## Simple

### Single board mounting & removable contact blocks

Removable contacts enable easy wiring. Single board mounting reduces installation time and prevents incorrect wiring.

## Watertight

Degree of protection: IP65

Perfect for environments where water is sprayed under pressure such as food and beverage processing.

## Flush Mount

Stylish

Flush bezels project only 2mm from the panel surface. The slim and stylish panel design enhances the appearance of any application.

# Flush Mount Switches & Pilot Lights

- Projects only 2mm from the panel surface.
- Removable contact blocks ideal for single board mounting.
- Protection degree: IP65 (IEC 60529)

**Illuminated Pushbuttons** Pg. 7  
Illuminated Pushbuttons with Switchguard available

**Pushbuttons** Pg. 11  
Pushbuttons with Switchguard available

Lens with marking plate can also be used as a pushbutton.

**Pilot Lights** Pg. 9

**Dome Pilot Lights** Pg. 9

**Selector Switches**  
Non-illuminated Pg. 13  
Illuminated Pg. 15

2-position and 3-position selector switches. Maintained and spring return available.

**Key Selectors** Pg. 17

Wave key  
Seven different keys available.

**Lever Switches** Pg. 20

**Buzzers** Pg. 21

# Flush Mount & 16mm Miniature Switches & Pilot Lights

Flush bezel projects only 2mm from front of panel. Standard bezel has a panel depth of only 27.9mm! Removable contact blocks are ideal for single board mounting.

- Pushbuttons, lever switches, selector switches, and key selector switches with up to 3PDT contacts.
- Key selectors with keys that are difficult to duplicate. Seven different key numbers to choose from.
- Pilot lights with flat or dome lenses.
- Buzzers with 80dB steady sound.
- Black or metallic flush bezels available.
- Bright and clear LED illuminated face.
- Choice of either gold-clad or silver contacts.
- Degree of protection: IP65 (from the front of the panel).

Applicable Standards	Mark	File No. or Organization
UL508		UL Recognition No.E55996
CSA 22.2 No.14		CSA File No. LR 21451
EN60947-5-1		TÜV Rheinland
		EU Low Voltage Directive
GB14048.5		

## Specifications

Operating Temperature	-25 to +60°C (no freezing) Illuminated units: -25 to +55°C	
Storage Temperature	-30 to +80°C (no freezing)	
Operating Humidity	45 to 85% RH (no condensation)	
Contact Resistance	50 mW maximum (initial value)	
Insulation Resistance	100 MW minimum (500V DC megger)	
Dielectric Strength	Switch	Between live part and ground: 2,000V AC, 1 min. Between terminals of different poles: 2,000V AC, 1 min. Between terminals of the same poles: 1,000V AC, 1 min.
	Illumination	Between live part and ground: 2,000V AC, 1 min.
Vibration Resistance	Operating extremes/Damage limits: 5 to 55 Hz, amplitude 0.5mm	
Shock Resistance	Operating extremes: 100 m/s <sup>2</sup> Damage limits: 1,000 m/s <sup>2</sup>	
Mechanical Life (minimum operations)	Momentary: 2,000,000	
	Maintained: 250,000	
	Selector switches: 250,000 Key selector switches: 250,000	
Electrical Life (minimum operations)	Momentary: 50,000 / 100,000 <sup>Note 1</sup>	
	Maintained: 50,000 / 100,000 <sup>Note 2</sup>	
	Selector switches: 50,000 / 100,000 <sup>Note 2</sup> Key selector switches: 50,000 / 100,000 <sup>Note 2</sup>	
Degree of Protection	IP65 (IEC 60529)	
Terminal Style	Solder/tab terminal #110 PC board terminal	
Bezel	Black plastic or metallic	
Weight (approx.)	11g (lever switch)	
	13g (pilot light, pushbutton)	
	14g (illuminated pushbutton, pushbutton with guard, buzzer)	
	15g (selector switch, illuminated pushbutton with guard) 27g (key selector switch)	

1. Switching frequency 1,800 operations/h.
2. Switching frequency 1,200 operations/h.

## Contact Ratings

Gold Contact (switch base color: blue)

Rated Insulation Voltage	250V	
Rated Thermal Current	3A	
Rated Operating Voltage	30V DC	125V AC
Rated Operating Current (resistive load)	0.1A	0.1A
Contact Material	Gold-clad silver	

Minimum applicable load (reference value): 5V AC/DC, 1 mA

Silver Contact (switch base color: gray)

Rated Insulation Voltage	250V					
Rated Operating Voltage	30V	125V	250V			
Rated Operating Current	Electrical Life 50,000 Operations	AC 50/60Hz	Resistive load	—	5A	5A
			Inductive load	—	3A	1.5A
	DC	Resistive load	5A	1.1A	—	—
		Inductive load	2.5A	0.55A	—	—
	Electrical Life 100,000 Operations	AC 50/60Hz	Resistive load	—	5A	3A
			Inductive load	—	3A	1.5A
	DC	Resistive load	3A	0.6A	—	
		Inductive load	1A	0.22A	—	
Rated Thermal Current	5A					
Contact Material	Silver					

AC inductive load: PF=0.6 to 0.7 DC inductive load: L/R=7 ms max.

## LED Ratings

Rated Voltage	5V DC	12V AC/DC	24V AC/DC
Voltage Range	5V DC±5%	12V AC/DC±10%	24V AC/DC ±10%
LED Part No.	LB9Z-LED5 <sup>Ⓢ</sup>	LB9Z-LED1 <sup>Ⓢ</sup>	LB9Z-LED2 <sup>Ⓢ</sup>
Rated Current	A, R: 22 mA G, PW, S: 16 mA		
Voltage Rating	Marked on the side of the LED unit		
LED Life (reference value)	Approx. 30,000 hours (until the brightness reduces to 50% of the initial value)		
Internal Circuit	A, PW, R		A, PW, R
	G, S		G, S
	LED Chip Protection Diode Zener Diode Resistor Varistor		

1. For <sup>Ⓢ</sup> (color code): A (amber), G (green), PW (white), R (red), S (blue)
2. Use the white LED for yellow illumination.
3. LED lamp contains a current-limiting resistor.

Flush bezel only available with round operator.

- For Standard Bezel part numbers specify:
  - bezel shape in place of ①. 1 (round), 2 (square), 3 (rectangular)
  - color code in place of ②. A (amber), G (green), R (red), S (blue), PW (white), Y (yellow)
- For Flush Bezel part numbers specify:
  - color code in place of ②. A (amber), G (green), R (red), S (blue), PW (white), Y (yellow)
  - bezel material in place of ③. M (metallic), Blank (black)
- See page 22 for contact operation.
- See page 30 for dimensions.

# Illuminated Selector Switches

## Illuminated Selector Switches (Sub-assembled)

### Contact Block

- Key is retained at ● and removable at ○ positions.
- Two keys are supplied.
- For Standard Bezel part numbers specify bezel shape in place of ⊙. 1 (round), 2 (square), 3 (rectangular)
- For Flush Bezel part numbers specify:
  - bezel shape in place of ⊙. 6 (round), 7 (square), 8 (rectangular)
  - bezel material in place of ⊙. M (metallic), Blank (black)
- See page 22 for contact operation.
- See page 31 for dimensions.
- For additional security, wave keys also available.  
 Add the letter "S" before the "T" in the part no. Example: LB1K-31ST1A  
 Besides the standard wave key (key number 0H), six other keys are available.  
 To order other keys, specify the key number as shown below:  
 Example: LB1K-31ST2B-1H (Key number is indicated on the key cylinder. Standard keys do not have a key number indication.)
  - (blank): Standard wave key (0H)
  - 1H to 2H: Reversible wave key
  - 3H to 6H: Non-reversible wave key
- If ordering standard wave key (0H), subcomponents are available, see next page.
- If ordering other than standard wave key (for example, key number 6H), only completed switches are available.

## Key Selector Switches (Sub-assembled)

### Contact Block

Spring from left LB8MK-32 <sup>Ⓢ</sup>				
Spring from both LB8MK-33D				

1. In place of <sup>Ⓢ</sup> specify retention option code from table below.
2. For standard wave key operators, add "S" to part number before the key retention code from table below. (For example, LB6K-2B with wave key would be LB6K-2SB.)

### <sup>Ⓢ</sup> Retention Option Code

Code	Description
A	Key not retained in any position (removable in all positions)
B	Key retained in right position only
C	Key retained in left position only
D	Key retained in left and right (3-position only)

Code	Description
E	Key retained in center only (3-position only)
G	Key retained in right and center (3-position only)
H	Key retained in left and center (3-position only)

# Lever Switches

## Lever Switches (Assembled)

## Mounting Hole Layout (mm)

## PC Board Drilling Layout (mm)

### Notes for Designing PC Board and Circuit

1. Use 1.6mm-thick glass epoxy PC board with drilled holes.
2. Design a circuit so that the LB series can operate within the rated voltage and current range. Make sure that inrush current and voltage do not exceed the rating.
3. Minimum applicable load is 5V AC/DC, 1mA on gold contacts.
4. Since the \*2.8mm-wide terminal touches the PC board as shown below, short circuit may occur with pattern lines. Design a circuit that prevents short circuits.

### SPDT/DPDT Contacts

### 3PDT Contacts

### PC Board Drilling Layout (Bottom View)

#### SPDT/DPDT Contacts

#### 3PDT Contacts

1. When designing, note the alignment of the center lines of the contact blocks and operators.
2. The diameter of the terminal hole is ø1.2.
3. Hole diameter may vary to meet installation requirements. Determine the location and the size of the hole so that the locking lever can be operated.

## Accessories

Item	Material	Part Number	Remarks	
Locking Ring Wrench 	Metal: Nickel-plated brass	MT-001	Used to tighten the locking ring when installing the units on to the panel.	
Lens Removal Tool 	Stainless Steel	MT-101	Used to remove the lens or button.	
Switch Guard (180° Spring return) 	For round / square standard units	Guard: Polyacetal	Degree of protection: IP65 Used to protect standard pushbuttons and illuminated pushbuttons from inadvertent operation. See page 38 for dimensions. With the gasket mounted on the switch, attach the switch guard and mount on the panel.  Note: not applicable for flush mounted units. Select operator with built-in switch guard.	
	For rectangular standard units	Base: Polyarylate		AL-KH6SP
Switch Guard for Single Board Mounting 	For rectangular units	Guard: Polyacetal Base: Polyarylate	Degree of protection: IP65 With the gasket mounted on the switch, attach the switch guard and mount on the panel. See page 38 for dimensions.	
Rubber Boot for Standard Bezels 1  2  3 	1. For round units	Silicon Rubber	Degree of protection: IP65 See page 37 for dimensions. See page 42 for mounting.	
	2. For square units			LB9Z-D2
	3. For rectangular units			LB9Z-D3
Mounting Hole Plug 	Metal	Plug: Metal (Zinc diecast) Locking nut: Polyacetal Gasket: Nitrile rubber	Degree of protection: IP65 Tightening torque: 0.1 to 0.29 N•m See page 37 for dimensions.	
Mounting Hole Plug 	Rubber	Nitrile rubber (black)	Degree of protection: IP65 See page 37 for dimensions.	

Accessories con't on next page.

## Replacement Parts

Item		Material	Part Number	Remarks
	For round units	Polyarylate ø15.4 H4mm	AL6M-L <sup>Ⓢ</sup>	Specify the color code in place of <sup>Ⓢ</sup> in the part number. A: Amber, C: Clear, G: Green, R: Red, S: Blue, Y: Yellow  Note: Use a clear lens for or white (PW) illumination.
	For square units	Polyarylate □15.4, H4mm	AL6Q-L <sup>Ⓢ</sup>	
	For rectangular units	Polyarylate W21.4 x H4 x D15.4mm	AL6H-L <sup>Ⓢ</sup>	
	For round units	Polyarylate □15.4, H4mm	AB6M-B <sup>Ⓢ</sup>	Specify the color code in place of <sup>Ⓢ</sup> in the part number. B: Black, G: Green, R: Red, S: Blue W: White, Y: Yellow
	For square units	Polyarylate □15.4, H4mm	AB6Q-B <sup>Ⓢ</sup>	
	For rectangular units	Polyarylate W21.4 x H4 x D15.4	AB6H-B <sup>Ⓢ</sup>	
	For round units	Acrylic ø13.7 H0.8	AL6M- <sup>Ⓢ</sup>	Specify the color code in place of <sup>Ⓢ</sup> in the part number. B: Black, W: White  See page 41 for dimensions and engraving area.
	For square units	Acrylic □13.7, H0.8mm	AL6Q- <sup>Ⓢ</sup>	
	For rectangular units	Acrylic W19.7 x H0.8 (0.4) x D13.7mm	AL6H- <sup>Ⓢ</sup>	
	For all units	Polyamide ø17.9, H3.9mm	LB9Z-LNP	
	For standard bezel	Metal (Stainless steel) □17.9, t0.6mm	LB9Z-LP1	
	For flush bezel	Metal (Stainless steel) W21 x H8.2 x D20.6 t0.8mm	LB9Z-LP6	
	For key selector switches	Nickel-plated Brass	AS6-SK	See page 38 for dimensions.
 	For Wave key selector switches	Diecast zinc alloy (nickel plated) W14 x H2 x D30.8mm	LA9Z-SK- <sup>Ⓢ</sup>	Specify Wave key number in place of <sup>Ⓢ</sup> in the part number. 0H: Standard wave key (reversible) 1H to 2H: Reversible wave key 3H to 6H: Non-reversible wave key See page 38 for dimensions.

## LB Series Replacement LED Unit

Item	Rated Operating Voltage	Part Number	ⓈColor Code	
	DC5V	LB9Z-LED5 <sup>Ⓢ</sup>	A G PW R S	1. Specify color code in place of the <sup>Ⓢ</sup> in the part number. R: Red, G: Green, A: Amber, S: Blue, PW: White 2. All illuminated LB series contain an LED unit. 3. Use a white (PW) LED unit for yellow (Y) illumination.
	AC/DC12V	LB9Z-LED1 <sup>Ⓢ</sup>		
	AC/DC24V	LB9Z-LED2 <sup>Ⓢ</sup>		

# Precautions & Instructions

## ⚠ Safety Precautions

- Turn off the power to the LB series control units before installation, removal, wiring, maintenance, and inspection. Failure to turn power off may cause electrical shocks or fire hazard.
- To avoid burning your hand, use the lamp holder tool when replacing the lamps.
- For wiring, use wires of a proper size to meet voltage and current requirements. Solder correctly according to the instructions in "Wiring" and "Notes on Terminal Cover." Improper soldering may cause overheating and create a fire hazard. Also, when using tab terminals, use receptacles of appropriate size.

## Instructions

### Wiring

1. Solder the terminals at 350°C within 3 seconds using a 60W soldering iron. Sn-Ag-Cu type is recommended. When soldering, do not touch the LB series with the soldering iron. Also ensure that no tensile force is applied to the terminals. Do not bend the terminal or apply excessive force to the terminal.
2. Use non-corrosive liquid flux.

### Terminal Cover

Solder/tab terminal

Insert the terminal cover into the contact block with the TOP markings on the contact block and the terminal cover in the same direction.

Note: When wiring, insert the lead wires into the terminal cover holes before soldering. After wiring, terminal covers cannot be installed.

Standard Bezel

Flush Bezel

### Operating Environment

- Do not use the LB series where corrosive gases exist or under an environment exceeding the operating temperature and humidity ranges. Otherwise, damage such as contact failure or change of the surface color may occur.
- Major parts of the switch are plastic. Scratches or damage may occur when scraped with a sharp object or if excessive load or shock is applied. Note that this may cause operation and appearance failure of the operator and bezel.
- Application of detergent, cutting oil, or special chemicals to the switch may result in operation and/or appearance failure such as a change in surface color.

### Handling

Contacts (micro switch)

When using NC (normally closed) and NO (normally open) contacts of the same microswitch, avoid connections of different voltages, or connections of different types of power supplies. Failure to observe this instruction may cause a short-circuit.

### Removing and Installing the Contact Block

1. Turn the locking lever on the contact block in the direction opposite to the arrow on the housing. Then the contact block can be removed.
2. Insert the contact block with the TOP markings on the contact block and the operator placed in the same direction. Then lock the units, turning the locking lever in the direction of the arrow.

### Panel Mounting

Remove the contact block from the operator. Insert the operator into the panel cut-out from the front, then install the contact block to the operator.

Standard Bezel

Flush Bezel

### Notes on Mounting

Use the optional ring wrench (MT-001) to mount the operator onto the panel. Tightening torque should not exceed 0.7 N·m. Do not use pliers. Excessive tightening will damage the locking ring.

## Replacing the Lens

### Standard Bezel

From the opposite side of the TOP marking, remove the operator (lens, marking plate, and lens holder) using the optional lens removal tool (MT-101) by gripping the recesses of the color lens. Removing from the TOP side may damage the metallic bezel.

Removing the Operator (standard bezel)

### Flush Bezel

From the opposite side of the TOP marking, push the tip of a flat screwdriver to the groove of the color lens and pull out the operator (lens, marking plate, lens holder). Removing from the TOP side may damage the metallic bezel.

Removing the Operator (flush bezel)

## Replacing the Marking Plate

1. Remove the marking plate by pushing the lens from the back to disengage the latches between the lens and holder, using the screwdriver as shown below.

Note: A transparent film inside the lens holder is attached to the unit to make it waterproof and cannot be removed.

2. Insert a marking plate into the color lens, and press the lens onto the lens holder to engage the latches. Pay attention to the orientation of the marking plate.

## Lens Unit and Contact Block Installation

To insert the lens unit into the operator, press in the lens unit by aligning the latch on the operator with the latch on the lens unit.

### Standard Bezel

### Flush Bezel

## Marking Plates and Films

Illuminated pushbuttons and pushbuttons with illuminated lens can have legends and symbols engraved on the marking plates, or printed film can be inserted under the lens for labelling purposes.

### Marking Plate and Marking Film Size

Lens	Round	Square	Rectangular
Built-in Marking Plate			
Applicable Marking Film			
	<ul style="list-style-type: none"> <li>• Engraving must be made within the engraving area (0.5mm from edge).</li> <li>• The marking plate is made of white acrylic resin.</li> </ul>		
	<ul style="list-style-type: none"> <li>• Film thickness: 0.1mm per film</li> <li>• Marking film is not included.</li> <li>• Recommended marking film: Polyester film</li> </ul>		

## Marking Plate and Film Insertion Order

The marking plate must be engraved on the side specified above. Pay attention to the orientation of the marking plate.

# Instructions

## Replacing the LED Unit

The LED unit can be replaced by pulling the lens unit out of the contact block.

### Orientation of the LED unit

Insert the LED unit into the contact block with the TOP markings on the contact block and LED unit in the same orientation.

### Notes on replacing the LED Unit

- When replacing the LED unit, make sure that static electricity is not applied.
- Make sure that the LB series has cooled down before replacing the LED unit.
- To avoid getting burned, be careful not to touch the unit while it is still hot.

## Notes on Using Quick Connect Terminals

1. Use #110 tab quick connects, 0.5mm-thick.
2. When connecting the terminals on the left and center, make sure that surfaces of the quick connects face each other. Otherwise, a short-circuit may occur.

3. Apply only horizontal force against the panel to the tab. The switch may be damaged if a force other than a horizontal force is applied.

## Installing Rubber Boots

When using the switches in environments subject to splashing water or an excessive amount of dust, make sure to use an optional rubber boot. As shown in the drawing on the right, ① remove the gasket from the operator, and ② attach the rubber boot from the front (button side).

## Standard Bezels

For rectangular and square units, pull the seals out of the rubber boot and place them around the operator sleeve as shown below. Make sure that the seals are not twisted or tucked inside and that the gasket is removed, otherwise waterproof and dustproof characteristics are not ensured.

### How to Install the Rubber Boot

#### Rectangular

#### Square

#### Round

## Flush Bezels

Mount the rubber boot so that the protrusion at the bottom surface of the operator fits with the recess on the operator, placing the rubber boot all around the operator sleeve. Make sure that the protrusion on the rubber boot and the recess on the operator fit correctly, otherwise, the waterproof and dustproof characteristics are not ensured.

### How to Install the Rubber Boot

Note: Install the rubber boot before mounting the unit to the panel.

## Maintained Pushbuttons

Do not replace the buttons when the pushbutton is in the maintained position as it may damage the internal mechanism. Also, do not remove the contact block with the button in the maintained position. The contact may not operate properly when the contact block is remounted.

## Pushbuttons and Illuminated Pushbuttons with Switch Guard

Do not apply force to the switch guard when the switch guard is not attached to a panel. When opening the switch guard, do not open more than 180°. The hinge may break.

## Selector Switches

When turning the operator or key, make sure that they are turned to the correct position.

## Selector Switches with Key

Observe the following instructions to prevent malfunction or damage.

- Do not remove the key from any key retained position.
- In addition to the standard key (key number 0H), six other key numbers are available. Use a key matching the number of the key cylinder. The standard key does not have a key number indication.
- Keys are available in two types.
  - Key numbers 0H (standard), 1H, and 2H are reversible keys which can be inserted in two ways.
  - Key numbers 3H, 4H, 5H, and 6H are non-reversible keys. Make sure of correct insertion direction.

## Single Board Mounting

The LB series can be used for single board mounting.

## Installing and Removing Contact Blocks

Turn the locking lever to install and remove contact blocks on a PC board using a screwdriver from a hole in the PC board. Determine the location of the switches so that the locking lever can be operated.

## Mounting Holes and Assembly Procedure

Drill mounting holes in the panel as shown on the right. When the units are mounted together, provide adequate clearance.

## Panel Cut-out

### Standard Bezels (LB1/LB2/LB3/LB4)

#### SPDT/DPDT Contacts

#### 3PDT Contacts

### Flush Bezels

#### SPDT/DPDT Contacts

##### LB6/LB6M

#### 3PDT Contacts

##### LB7/LB7M

##### LB8/LB8M

\* 45mm minimum for switches with guard

All dimensions in mm.

## Assembly Procedure

1. Install the operator to the panel.
2. Mount the contact block to the operator from the back of the panel.
3. Turn the locking lever to lock the contact block.
4. Insert a PC board and solder.

### Notes:

1. Make sure that each terminal is inserted into the PC board correctly.
2. Do not apply tensile force to the connector cable for an extended period of time.
3. Do not expose the contact block to water.
4. Ensure that the contact blocks are locked when installed on the operators.

## 16mm LB Miniature Switches

With both flush and standard mount options, LB switches offer sleek lines and vivid colors to enhance the look of your application while also increasing its marketable value. The flush mount switches are perfect for applications requiring a smooth, hygienic surface, and this essential component will add style and an updated look to any application. Take a closer look and see which LB switch is for you!
