New
Jumbo Dome

LH1D Series
Surface Mount Indicators
IDEC LED Spider

IDEC CORPORATION
Excellent Visibility
From the front and the side.
## IP67 Protection
Can be used in environments subject to washdown.
Cable Wiring
Integrated wiring ensures waterproof characteristics.

Connector Wiring *New*
Connector types available for easy maintenance.
∗Jumbo dome type only

Direct Surface Mounting
Requires only a small space behind the mounting surface, and can be installed without concern for other components behind.
Red/Green
Two-color alternate illumination available.

Three-color Alternate Illumination *New*
Two combinations available: red, green and white; and red, green and pure white.
∗Jumbo dome type only
Seven Colors
Amber, green, pure white, red, blue, white, and yellow

Legends
Marking film can be inserted into the flat type.
∗Flat type only.
Slim Profile
Can be installed in small areas. Only 10.8 mm in height.
∗Flat type only.
Direct Mounting on Aluminum Frames *New*
Installation is improved by the increased number of mounting holes.
∗Jumbo dome type only

Color Variation
| Amber | Green | Pure White | Red |
| Blue | White | Yellow | |
Two- and three-color alternate illumination also available.

Application Examples
Robot Arm Status Indicator
Indicates the operating status of the motor.
AGV Status Indicator
Can be used as a directional indicator on automatic guided vehicles.

Indicators with Excellent Visibility.
Large Equipment.

With increasing awareness on safety at production sites, equipment must be designed to be clearly visible and capable of delivering correct information.
With an innovative design, slim and stylish IDEC LED Spiders are ideal for various applications.

Picking System

Can be used to select picking locations.
Door Monitoring

Indicates whether a door can be opened or closed.
Roller Shutter Status Indicator

Indicates the operating status of a roller shutter.

LH Series Surface Mount Indicators

Innovative indicators with IP67 protection and integrated cable wiring.
Directly mountable on equipment and aluminum frames (jumbo dome types).

- Surface mount style does not affect the location of other components. Requires only a small space behind the mounting surface.
- Integrated cable wiring ensures waterproof characteristics. 1m, 3m, and 5m cables available. M12 connector cable (30 cm) available for jumbo dome type.
- IP67 (IEC60529) rated. Can be used in environments subject to washdown.
- Slim design well suited for installation in small spaces.
- Excellent visibility from the front and from the side.
- Legends and symbols can be printed on marking film to customize flat type.
- Two-color alternate illumination available for all types. Three-color alternate illumination available with jumbo dome type.

Standards

Standards	Marks	File No. or Organization
UL508 CSA C22.2 No.14	c**UL**us LISTED	UL/c-UL File No. E68961
EN60598-2-1	TÜV	TÜV SÜD
EN60598-2-1 EN60947-5-1	CE	EC Low Voltage Directive

- LH series surface mount indicators are approved by TÜV as class III lighting fixtures.

Specifications

| Type	Cable	Connector
Rated Insulation Voltage (Ui)	32V	
Rated Voltage	24V AC/DC	24V DC
Operating Voltage Range	24V AC/DC ±10%	24V DC ±10%
Rated Current	17 mA	
Maximum Current Draw	0.6W	

- Use Class 2 power supply when using the LH1D as a UL compliant product.
- Use Class III circuit when using the LH1D as an EN compliant product.
- 24V AC, 50/60 Hz
- M12 connectors are available for jumbo dome types only.

Type		Jumbo Dome	Dome / Flat
Illumination Colors	Single Color	A (amber), G (green), PW (pure white), R (red), S (blue), W (white), Y (yellow)	
	Two-Color Alternate	A/G, A/W, A/PW, R/G, R/W, R/PW, G/W, G/PW	R/G
	Three-Color Alternate	R/G/W, R/G/PW	

Specifications

Applicable Standards	IEC60947-5-1, IEC60947-1 EN60947-5-1, EN60947-1 EN60598-2-1 UL508, CSA C22.2 No.14
Operating Temperature	–20 to +55°C (no freezing)
Operating Humidity	45 to 85% RH (no condensation)
Storage Temperature	–30 to +80°C (no freezing)
Impulse Withstand Voltage (illuminating part)	800V
Insulation Resistance	Between live and dead parts: 100 MΩ minimum
Dielectric Strength	Between live and dead parts: 2000V, 50/60 Hz , 1 minute
Pollution Degree	3
Vibration Resistance	5 to 55 Hz, amplitude 0.5 mm
Shock Resistance	1000 m/s²
Degree of Protection	IP67 (IEC60529) NEMA Type 4X Indoor Use Only (Note)
Housing Color	Black
LED Lamp Life	Approx. 50,000 hours (When used on complete DC at 25°C, brightness reduces to 50% of the initial intensity.)
Weight	140g (jumbo dome type, 1m cable) 50g (dome type, 1m cable) 50g (flat type, 1m cable)

Note: Jumbo dome type is NEMA Type 1 under UL listing.

LH Series Surface Mount Indicators

Safety Precautions

• Do not disassemble, repair, or modify the LH1D indicator, otherwise electric shock, damage, fire, or malfunction may occur.
• Do not pull out or push in the cable of the LH1D indicator, otherwise damage may occur. Provide a slack in the cable while wiring.

• The LH1D indicator is a general-purpose and industrial electronic device. Do not use the LH1D indicator for electronic equipment which may damage the human body or threaten life in case of malfunction or failure.

Operating Instructions

• LED elements may vary in colors and brightness.
• The LH1D indicator is vulnerable to static electricity. Take sufficient protection against static electricity and spikes.
• For one-color illumination of cable types, the green wire is cut short because it is not used. When cutting the cable for shorter wiring, cut the green wire short or make sure that the green wire is not used.

• The pin layout of connector type is shown at the right.

Green Cable (N.C)

Pin No.2   Pin No.1
Pin No.3   Pin No.4
• Excessive shock to the LH1D may cause damage or failure, and the internal lens may fall off even if no detects are found externally.
The internal lens may have fallen off when:
· The illumination varies greatly when viewed from the side.
· The indicator makes a rattling sound when shaken lightly.
When any of the above is observed, contact IDEC.
Note: Do not remove the lens.
The specified degree of protection cannot be assured when the lens is removed.

Lens   Internal lens

Base   Without lens
Panel Mounting

Using two M3 screws (M5 screws for jumbo dome types), install the LH1D indicator to a mounting surface. Tighten the screws to a torque of 0.6 N•m maximum (1.0 to 1.4 N•m for jumbo dome types). Mounting screws are not provided and must be supplied by the user.
•Jumbo Dome Type

Top   10.5
M5 screws
Bottom
Note 1: Take into account the thickness of the base (10.5 mm), when selecting the length of the screws.
Note 2: Take appropriate anti-loosening measures such as spring washers and screw locks.
Note 3: Install the LH1D using two M5 screws, one each on the top and the bottom.

•Dome Type

Lens
Housing
M3 Screws

Note: The dome lens is not removable. Do not attempt to remove the lens, otherwise damage will occur.

•Flat Type

Lens
Housing
M3 Screws

Incorrect

Note 1: Do not install the LH1D indicator by attaching only the lens, such as by taping down the lens. Otherwise internal components may come loose.
Note 2: Make sure that the back of the indicator is securely attached to the mounting surface, so that the lens cannot be easily removed.

### Inserting Marking Film into Flat Type Lens

1. Insert a flat screwdriver into the groove between the base and lens. Do not use flat screwdrivers with a tip width of 1.0 mm or more.
Base   Lens

2. Twist the screwdriver and disengage the lens from the base.
3. Remove the lens from the base.

4. Insert the edge of a marking film into the gap between the base and the diffusion plate, and place the marking film on top of the diffusion plate.

Marking Film
Gasket
Diffusion Plate

5. Install the lens. Ensure that the lens is installed snugly.

No Gap

Lens installed on the base snugly.
Note 1: Do not touch the gasket, as this may affect its waterproof characteristics.
Note 2: Do not touch the diffusion plate.

Markings

Legends and symbols can be printed on marking film for the flat lens. One 0.1mm-thick film can be installed. Marking film is not attached and must be supplied by the user.
Recommended marking film: Polyester

☐35 mm
Thickness: = 0.1 mm
