

Industrial Power Supplies

Introducing the latest family of Industrial Power Supplies from IMO

We have the Power

A power supply unit (PSU) is an electrical device that converts an incoming AC or DC electrical supply, into the correct voltage and power needed for industrial equipment. IMO's range of UL Approved single and three phase industrial power supplies have all been engineered to deliver reliable, high quality DC power to a control panel or automation system with the introduction of a range of compact switching power supply with universal AC and DC voltage inputs, short circuit protection, and a range of output DC voltage options.

These power supplies operate at high efficiencies, making them an exceptionally reliable power source for control panels and components such as, Programmable Logic Controllers (PLC), sensors, relays, contactors, timers, temperature controllers, process controllers and HMIs, all of which are available from IMO and all benefit from our 3-year warranty.

SPS Series - 12W to 150W

Our new SPS series of single phase UL approved power supplies offers a step/modular solution that is ideal for use within a consumer unit, for domestic and industrial applications including building automation applications.

The entire series offers Class II isolation, protecting the user from electrical shock without the need for earthing (LPS certified).

BPS Series - 15W to 180W

The BPS series of single phase UL approved industrial power supply provides a slimline solution for when space on the DIN Rail is limited, and offers an alternative to the LPS range of PSUs.

LPS Series - 10W to 480W

Our new LPS series of single and three phase UL approved industrial power supply offers the largest range encompassing both plastic and metal bodied PSUs, making them ideal for virtually every industrial application.

Featuring DC OK Relay on selected models (see Quick Feature Guide table overleaf), the LPS series offers the widest range of voltage outputs including 5V, 12V, 24V and 48V. All models up to 100W are supplied in slimline fanless plastic bodies, whereas the models from 150W upwards are supplied in fanless metal bodies. Additionally, the metal bodied LPS PSUs offer Power Factor Correction for improved efficiency as well as a reduction in power demand, which not only reduces running costs, but allows for more load. Three phase models can also accept bi-phase power input.

HPS Series - 120W to 480W

The HPS High Peak Power range features DC OK Relay across the entire range, and have been designed with higher peak performance of 150% in mind for more demanding applications that require greater power at start-up (fulfilling transient energy demands), removing the requirement to spend more money on PSUs with a higher rating. All HPS models are UL approved.

SPS, LPS & HPS Options & Ordering Information

PLEASE NOTE: The feasibility of a code number does not mean the effective availability of a product.

SPS - 1 - 015 - 5DC

Series	
SPS Modular PSUs	SPS
BPS Slimline PSUs	BPS
LPS Standard PSUs	LPS
HPS High Performance PSUs	HPS

Output Voltage V	
5DC	5V DC
12DC	12V DC
24DC	24V DC
48DC	48V DC

Phase	
Single Phase	1
Three Phase (LPS Series only)	3

GLOSSARY:

Over Temperature Protection	Unit shuts down in over temperature situation / auto recovery one unit cools to within operating threshold.
DC OK Relay	Local LED indication and potential free contact for signalling remote operating systems that the PSU is on, and the DC output is ok.
Built-in PFC	Power Factor Correction: Improved efficiency and reduction in power demand, hence a reduction in the load on the switching gear and cables, reduced costs to the consumer.
Class II	Equipment in which protection against electric shock does not rely on basic insulation only, rather additional safety precautions, such as double insulation or reinforced insulation are provided, ensuring no reliance on either protective earth or installation conditions.
Pass LPS	When an electronic circuit is powered by a limited power source (LPS), its output current and power are under guided limitation and the risk of fire can be reduced significantly.
Peak Power	Can withstand peak power demand for 3 seconds (refer to HPS Series peak power loading curves for more information).
Approval	Indicates international approval standard - see each PSU Series for specific approval.
Bi-Phase	Three phase PSU units can accept bi-phase power input (refer to derating graphs for more information).

SPS Series

Single Phase 12W-150W AC-DC DIN Rail Power Supplies

Key Features

- Class 2 LPS
- Universal input 90-264VAC / 127-370VDC
- Class II Isolation
- 100% full load burn-in test
- Modular design
- IP20 rated protection

LPS Series

Single Phase 10W-90W AC-DC DIN Rail Power Supplies

Key Features

- 5, 12 & 24 VDC
- Universal Input: 85-264VAC / 120-370VDC
- High Efficiency
- Short Circuit Protection
- Internal Input Filter
- IP20 Protection Rated
- Class 2

Technical Specification

LPS Series

Single Phase 120W-480W AC-DC DIN Rail Power Supplies

Key Features

- 12, 24 & 48 VDC
- Universal Input: 90-264VAC / 120-375VDC
- High Efficiency
- Short Circuit Protection
- Internal Input Filter
- IP20 Protection Rated

Technical Specification

Model	LPS-1-120-12DC	LPS-1-120-24DC	LPS-1-120-48DC
Input Voltage	90-264VAC / 127-375VDC		
Output Wattage	120W		
Output Voltage / Power Dissipation	12VDC / 24W	24VDC / 20W	48VDC / 19W
Output Current	10A	5A	2.5A
Efficiency	85.5%	88%	89%
General Specification			
Approval	cURus		
Isolation Voltage	3000VAC/4242VDC		
Isolation Resistance	100MΩ @ 500VDC		
Ambient Temperature	-20 to +70°C		
Derating	(61 to 71°C) 2.5%/°C		
Storage Temperature	-40 to +85°C		
Relative Humidity	10 to 95% RH		
Cooling	Free air convection		
Tightening Torque	0.8Nm		
Dimensions	L125 x W40 x D113 (126.5 inc. DIN rail mount) mm		
Weight	600g		
Case Material	Metal		
Input Specifications			
Rated Input Voltage	115 - 230VAC (auto select)		
Input Voltage Range	90-264VAC, 127-375VDC		
Line Frequency	50/60Hz		
Power Factor @ 115VAC	0.55 Typical (0.58 Measured)		
Power Factor @ 230VAC	0.70 Typical (0.75 Measured)		
Inrush Current (115 / 230VAC)	20 / 35A		
Output Specifications

Input		FG ⊕	FG ⊕
	N	AC / N	AC / N or DC-
	L	AC / L	AC / L or DC+
Output	-V	DC OUTPUT V-	DC OUTPUT V-
	+V	DC OUTPUT V+	DC OUTPUT V+

Installation

Ventilation / Cooling
 Normal convection
 All sides 25mm free space
 For cooling recommended

Connector Size Range
 AWG24-10 (0.2 ~ 4mm²) flexible / solid cable,
 8 m/m stripping cable end recommends
 Use copper conductors only, 60 / 75°C

Construction

Easy snap-on mounting onto the DIN-Rail (TS35/7.5 or TS35/15), unit sits safely and firmly on the rail.
