

# KEL-AD cap for attachment housings

KEL-adapter for attachment housings can be snapped onto attachment housings for heavy connectors. It is available in size 16 (-pole connectors) and 24 and has two bore holes with a diameter of 32mm and, in addition, in size 24 one hole with 20mm diameter.

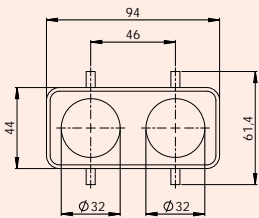

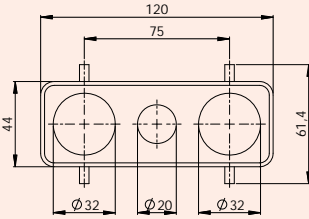

The parts can be equipped with KEL-DP (when using non pre-terminated cables). In addition KEL-QTE can be installed into the KEL 24 type. KEL-QTE offers one cable entry for non pre-assembled cables and one slotted entry for pre-terminated cables.

The user can expand familiar systems and has high flexibility in selection of the cable entry.

**A fast, professional und therewith economic solution.**

 The matching inserts can be found on page 31.
