

TYPE SFT

Features

- Self fusing
- 700 PSI tensile strength
- Insulates 8,000 volts per layer
- Withstands 500° F
- Flexible at -85° F
- Mil-Spec-I – 46852

Wrap 'N Seal Silicone Tape is a self-fusing silicone tape suitable for many applications, including wrapping electrical connections and wire harnesses. The silicone tape only bonds to itself with no adhesive mess. It conforms to any shape and withstands UV rays, acids and fuels. Once wrapped, it bonds immediately, forming a permanent air and watertight seal. It becomes permanently fused in 24 hours.
