

The TT104N16KOF may possibly be replaced with the following devices:

TT92N16KOF
TT106N16KOF
IRKT105/16S90
SKKT106/16E

TT92N16KOF, which has a lower current rating, but is mechanically equivalent.

The TT106N16KOF is electrically equivalent, but varies mechanically, 26mm wide Vs. 20mm. Additionally, the gate/cathode pin orientation is different. See specifications.

The IRKT105/16S90 is electrically the same, but the pins are reversed on SCR2

The SKKT106/16E may also work, but pins 6 & 7 are reversed
