## Stock Drives Catalogue

Variable Speed Drives  
& Accessories

UK Headquarters, Welshpool

### Inverter Drives

**Inverter Drives** is dedicated to the design and manufacture of sophisticated electronic variable speed drives, used to control motors in a wide variety of industrial and energy saving applications.

### The Organisation

State of the art UK headquarters house specialist facilities for innovation, manufacturing and global marketing.

The company pledges to implement and operate the ISO 14001 Environmental Management System to enhance environmental performance.

All operations, including innovation, are accredited to the exacting customer focused ISO 9001 quality standard.

The company's products are sold globally by a network of specialist distributors in over 80 different countries. Inverter Drives' unique and innovative Optidrive range is designed for ease of use and meets recognised international design standards for CE (Europe), UL (USA) and RCM (Australia).

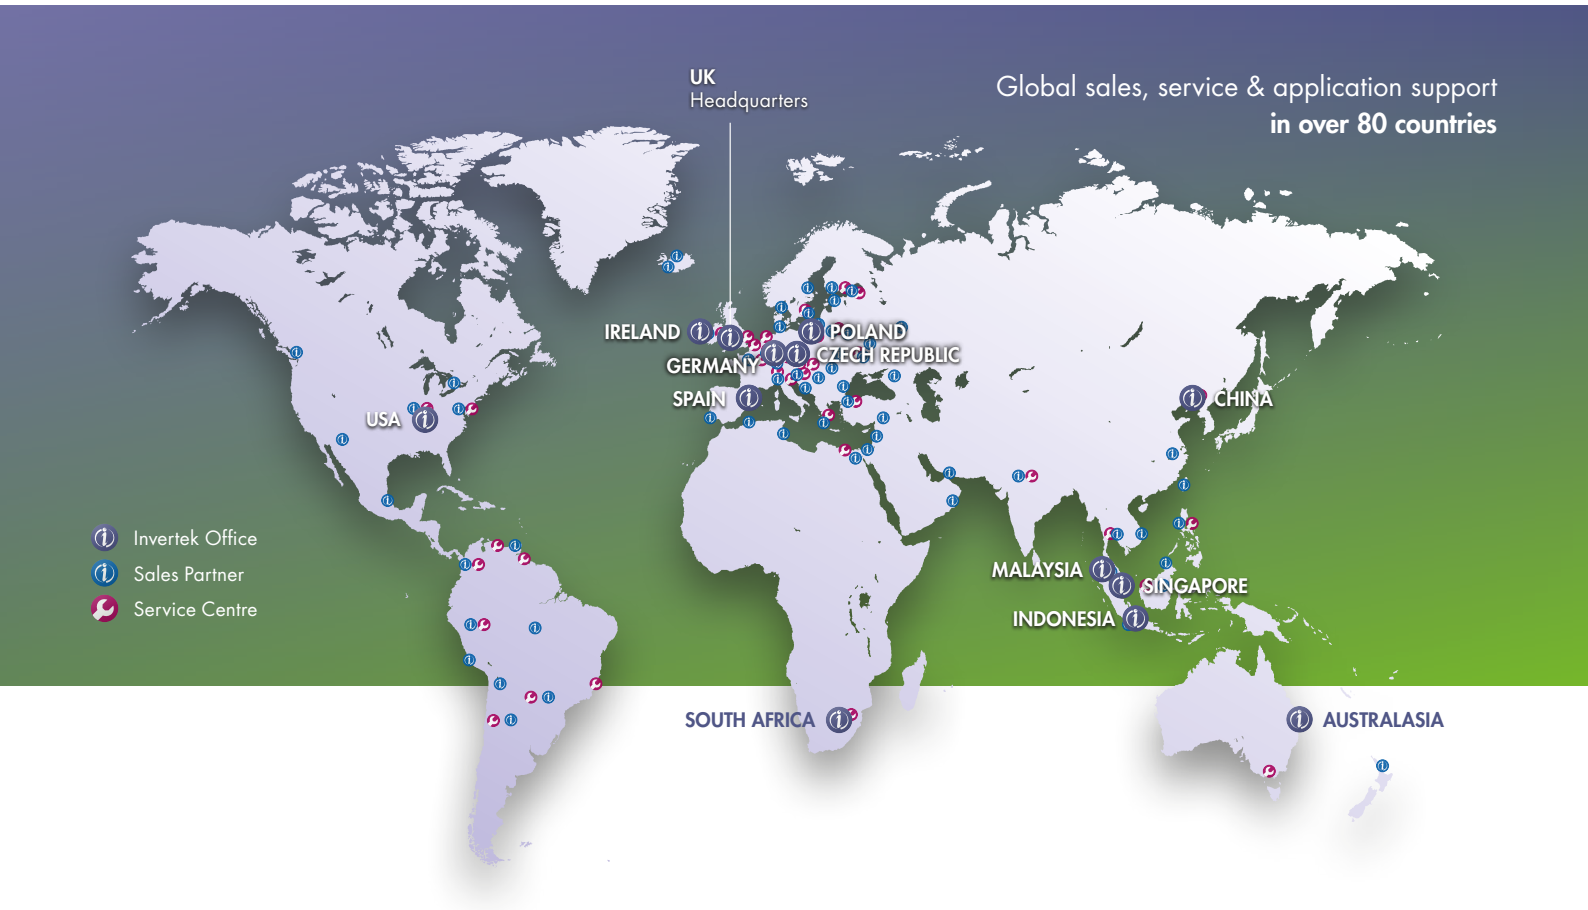

### Innovative Products

- Easy to use variable speed drives
- Incredible performance
- Robust & reliable
- Low cost of installation & ownership
- Wide power range  
0.37–250kW, 115V–600V

# Company Overview

Online Support    Pre-sales Support    Customer Service    Technical Support    Knowledge Management    Field Service    Logistics & Distribution    Spare Parts & Repair    Service Contracts    International Support

# OPTIDRIVE™ P<sup>2</sup>

AC Variable Speed Drive

0.75 – 250kW / 1 – 350HP  
**200 – 600V** Single & 3 Phase Input

## World Leading Motor Control

Controlling the latest generation of permanent magnet motors and standard induction motors

Optidrive P2 offers the perfect combination of high performance together with ease of use to allow even the most demanding applications to be tackled easily.

- Low ambient operation (-10°C)
- Dedicated Hoist Mode
- CAN and Modbus RTU communication as standard

### High Performance

#### Sensorless Vector Control

Up to 200% torque from zero speed ensures reliable starting and accurate speed control under all load conditions.

#### PM Motor Control

Future proof. Allows upgrade to the latest generation of high efficiency permanent magnet motors.

#### I/O & Communications

Optidrive P2 supports a wide range of interfaces to machine control systems.

### Low Cost Installation

#### Built-in EMC Filter

An internal filter in every Optidrive P2 saves cost and time for installation.

#### Integral Brake Transistor

Saves space, cost and time for installation.

### Powerful PC based commissioning software

## OptiTools Studio

OptiTools Studio allows parameter upload, download and storage and access to Optidrive P2 Simple PLC functionality.

See Page 24

### OPTISTICK

OPT-2-STICK-IN

Bluetooth®

- Fast parameter copying between drives
- Bluetooth PC interface for OptiTools Studio commissioning software

## Simple PLC Functionality

A wide range of function types available including:

- Programmable Logic Functions
- Comparators
- Timers
- Mathematical Functions
- Drive specific functions

All blocks can be easily combined to create flexible programs.

Programs can be protected to prevent unauthorised copying.

Complete control over the drive including all inputs and outputs.

### Safe Torque Off (provided as standard)

Optidrive P2 features a safe torque off function to allow simple integration into machine critical safety circuits.

- Simple machine design reduces component costs, saves panel space and minimises installation time
- Faster shut down and reset procedures reduce system maintenance time
- Better safety standard compared to mechanical solution
- Better motor connection. Single cable with no interruption.

### With

### Without

**IP20**

Up to 250kW

**IP55**

Up to 160kW

**IP66**

Up to 11kW

## Advanced Motor Control

Optidrive P2 has been uniquely developed to allow a wide range of different motor types to be used, with only parameter changes being required. This technology allows the same drive to be used in a wide range of applications, allowing OEM's and end user alike to take advantage of the energy saving provided by using the latest motor technologies.

### AC Induction Motors

The majority of AC motors in use today around the world are standard induction motors. These motors are relatively low cost, readily available and provide good performance with long service life. With the ever increasing focus on energy efficiency, motor manufacturers have refined and improved their designs in recent years.

Optidrive P2 has been developed to provide optimum control and maximum efficiency when operating with older motors designs, or newer high efficiency designs.

Operation can be in simple V/F control mode or in High Performance Third Generation Vector Mode, which provides up to 200% torque from zero speed without requiring an encoder.

### Permanent Magnet AC Motors

Permanent magnet AC motors provide improved efficiency compared to standard induction motors. Using permanent magnets in the motor construction eliminates the need for any magnetising current, reducing electrical losses. PM motors have been used for many years in high performance applications, however this has always required the use of a feedback device, such as a resolver or encoder. Optidrive P2 has been designed to operate with AC PM motors without requiring any feedback device, allowing them to be used for their energy efficiency benefits without incurring extra cost and complexity in applications which do not require position feedback.

### Brushless DC Motors

BLDC motors are similar to AC PM motors, however the design requires a slightly different control method to optimise the performance. Optidrive P2 has the flexibility to control this type of motor, requiring only simple parameter changes. This provides much greater flexibility for OEM's, allowing Optidrive P2 to be used in a variety of applications, with various motor types.

### Synchronous Reluctance Motors

Synchronous Reluctance Motors (SynRM), not to be confused with Switched Reluctance Motors, share a similar stator construction to standard induction motors, however the rotor is substantially different, in order to improve the overall efficiency of the motor. SynRM motors are ideally suited to variable torque applications.

Optidrive P2 can control synchronous reluctance motors, allowing the energy saving benefits to be realised.

# OPTIDRIVE™ E<sup>3</sup>

## Easy to Use

### General Purpose Drive

Focused on ease of use, **Optidrive E3** provides unrivalled simplicity of installation, connection and commissioning, allowing the user to benefit from precise motor control and energy savings within minutes.

#### Simple Commissioning

With just 14 basic parameters and application macro functions providing rapid set up, Optidrive E3 minimises start-up time.

#### Intuitive Keypad Control

Precise digital control at the touch of a button.

#### Application Macros

Switch between **Industrial**, **Pump** & **Fan** modes to optimise Optidrive E3 for your application.

Industrial | Pump | Fan

## IP20

Compact, robust and reliable general purpose drive for panel mounting

## Up to 22kW

- ✓ Easy to use
- ✓ Compact & robust

### Take a closer look at the stunning Optidrive E3

[ptidrive-e3](https://www.invertek.com/ptidrive-e3)

### Sensorless Vector Control for all Motor Types

#### IM

IE2 & IE3  
Induction  
Motors

#### PM

AC Permanent  
Magnet Motors

#### BLDC

Brushless DC  
Motors

#### SynRM

Synchronous  
Reluctance  
Motors

Precise and reliable control for  
**IE2, IE3 & IE4 motors**

## IP66

Enclosed drives for direct machine mounting, dust-tight and ready for washdown duty

### Up to 7.5kW

- ✓ Dust-tight
- ✓ Washdown ready

Switched or Non-Switched

### Coated Heatsink as Standard

Ideal for hygiene based operations requiring washdown — such as food and beverage

### Fanless Heatsink

For reliable, cost effective operation

IP66 / NEMA 4X

### Key Features

- ✓ Internal Category C1 EMC filter
- ✓ Internal PI control
- ✓ Internal brake chopper
- ✓ Dual analogue inputs
- ✓ Operates up to 50°C
- ✓ Bluetooth® connectivity
- ✓ Option for control of single phase motors

**Modbus RTU**  
**CANopen**

on-board as standard

### Internal Category C1 EMC Filter

An internal filter in every Optidrive E3 saves cost and time for installation.

Cat C1 according to EN61800-3:2004

# Application Macros

Switch modes at the touch of a button to optimise Optidrive E3 for your application

Single parameter application macro selection

## Industrial Mode

**Industrial Mode** optimises Optidrive E3 for load characteristics of typical industrial applications.

**Applications include:**

- ✓ Conveyors
- ✓ Mixers
- ✓ Treadmills

---

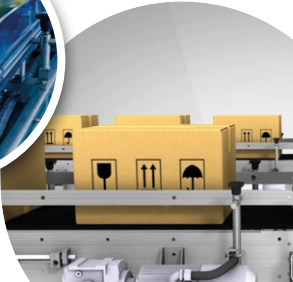

**Sensorless Vector** provides high starting torque and excellent speed regulation

---

**IP20** panel mount units or **IP66** for direct machine mounting

Rapid parameter cloning using **OPTISTICK**

## Pump Mode

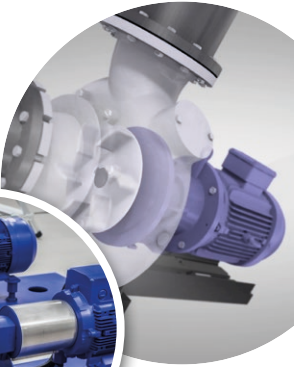

**Pump Mode** makes energy efficient pump control easier than ever.

**Applications include:**

- ✓ Dosing Pumps
- ✓ Borehole Pumps
- ✓ Transfer Pumps
- ✓ Swimming Pools
- ✓ Spas
- ✓ Fountains

---

- Constant or variable torque
- Internal PI control

## Fan Mode

**Fan Mode** (inc. fire operation) makes air handling a breeze, ideal for simple HVAC systems.

**Applications include:**

- ✓ Air Handling Units
- ✓ Ventilation Fans
- ✓ Circulating Fans
- ✓ Air Curtains
- ✓ Kitchen Extract

---

- High efficiency **variable torque** motor control
- Flying start capability
- Mains loss ride through
- PI control

---

### Instant Power Savings

The graph below shows the incredible efficiency of Optidrive E3 for controlling airflow compared to traditional damper control methods.

| Air Volume (%) | Outlet Damper (kW) | Inlet Damper (kW) | Optidrive E3 (kW) |
|----------------|--------------------|-------------------|-------------------|
| 0              | 0                  | 0                 | 0                 |
| 20             | 55                 | 35                | 5                 |
| 40             | 75                 | 50                | 15                |
| 60             | 90                 | 65                | 30                |
| 80             | 98                 | 85                | 55                |
| 100            | 100                | 100               | 100               |

# OPTIDRIVE™

For Single Phase Motors

IP20

IP66

Up to 1.1kW

Single Phase Motor Control for PSC & Shaded-Pole Motors

## Key Features

- ✓ 110–115V and 200–240V models
- ✓ Small mechanical envelope
- ✓ Rugged industrial operation
- ✓ Fast setup, and simple operation with 14 basic parameters
- ✓ Unique motor control strategy optimised for single phase motors
- ✓ Motor current and rpm indication
- ✓ Built in PI control, EMC filter (C1) & brake chopper
- ✓ Application macros for industrial, fan and pump operation
- ✓ Bluetooth® connectivity

Modbus RTU

CANopen

on-board as standard

150% overload for 60 secs  
(175% for 2 secs)

Pump control in swimming pools & spas

Simple airflow control

## Dedicated to Single Phase Motor Control

Designed to be cost effective and easy to use, the Optidrive E3 for Single Phase Motors is for use with PSC (Permanent Split Capacitor) or Shaded-Pole Single Phase induction motors.

Optidrive E3 for Single Phase Motors uses a revolutionary motor control strategy to achieve reliable intelligent starting of single phase motors.

- Removes the need for 3 phase supply wiring
- Provides the same performance features as the 3 phase Optidrive E3
- The ideal energy saving solution where high starting torque is not required — typically including fans, blowers, centrifugal pumps, fume extractors and air flow controllers

## Special Boost Phase

To ensure reliable starting of single phase motors, the drive initially ramps the motor voltage up to rated voltage whilst maintaining a fixed starting frequency, before reducing the frequency and voltage to the desired operating point.

## Energy Efficient Fan & Pump Control

- AC Induction (IM) Motors
- AC Permanent Magnet (PM) Motors
- Brushless DC (BLDC) Motors
- Synchronous Reluctance (SynRM) Motors

Multi Language  
OLED Display

### Key Features

### How much energy could you save?

Estimate potential energy savings, CO<sub>2</sub> emissions and financial savings for your application with the Invertek Drives Energy Savings Calculator app.

calculator

## Save Energy

**Accurate speed control** of fans and pumps provides the most energy efficient control method

**Energy optimisation function** minimises energy usage in real time under partial load conditions

**Sleep & wake functions** ensure operation only when required

## Save Money

**Advanced on-board features** remove the need for peripheral equipment

**Intelligent maintenance interval** timing allows programmable maintenance reminders, avoiding costly downtime

**Automatic load monitoring** provides an early warning of potential faults, such as belt failures or blocked filters

## Save Time

**Built in keypad and OLED text display** provides intuitive operation

**Simple parameter structure** with carefully selected default values reduce commissioning time

**Practical design** allows easy access to power and control terminals without specialist tools

### Fire Override Mode

Fire override mode ignores signals and alarms, keeping the drive operating for as long as possible.

This feature is crucial for ensuring smoke extraction from buildings in the event of a fire.

Selectable Normally Open or Normally Closed logic means that the Optidrive Eco can be easily configured to the signal produced by your fire management system.

With an independently set speed for fire mode operation, selectable as either forward or reverse direction, the Optidrive Eco has the flexibility to match the needs of your fire control system.

### Improved Fan Efficiency

#### Unique Eco Vector Sensorless Control

Optidrive Eco uses advanced motor control, designed to provide the most energy efficient motor control possible. Operation with standard IM Motors, Permanent Magnet or Synchronous Reluctance motors is possible, all without requiring any feedback device or optional modules – simply change parameters to suit the connected motor, autotune and operate!

Eco Vector continuously adjusts in real time to provide the most efficient operating conditions for the load, typically reducing energy consumption by 2 – 3% compared to standard AC drives – providing similar long term costs savings to selecting a higher efficiency motor.

#### Energy Optimised Design

Optidrive Eco up to frame size 5 are designed with film capacitors, replacing the traditional electrolytic capacitors used in the DC link. Film capacitors have lower losses, and also remove the need for AC, DC or swinging chokes, improving overall drive efficiency. Efficiency is improved by up to 4% compared to standard AC drives, whilst also reducing supply current total harmonic distortion (iTHD), improving the Real Power Factor and reducing total input current, leading to cost savings on installation through reduced cable and fuse ratings and smaller supply transformer rating.

### PID Control

Optidrive Eco has a PID controller built in that is fully integrated with both HVAC and energy efficient features and is packaged in a user friendly way to ensure ease of use and fast commissioning.

# Energy Efficient Pump Control

**OPTIFLOW™**

A standard feature on every Optidrive Eco

## OPTIFLOW™

Co-ordinated pump station control, built into each drive as standard, allows independent control of multiple pump applications.

- All pumps operate as variable speed for maximum energy saving.
- Equal run time sharing across every pump.
- Automatic system reconfiguration in the event of a pump fault (including the master pump).
- Continued system operation when drives are individually powered off (including the master drive).
- Communication and +24V control voltage shared between drives via a standard RJ45 patch lead.
- Independent maintenance indicators for each pump.
- Any pump can be switched to Hand operation at the touch of a button, and will automatically rejoin the network when switched back to Auto.
- For waste water applications each pump can be set for blockage/ragging detection and activate an automatic de-ragging/pump cleaning cycle.
- Optional mains isolator with lock-off for safe pump maintenance.
- Optiflow function configured through simple parameter set-up and intelligent drive self configuration.

## Pump Efficiency

### In-built Sleep Mode with Auto-boost

Sleep mode saves energy by detecting when a pump is running inefficiently and producing little useful work. Optidrive Eco can be programmed to enter into a sleep/disabled mode until the demand increases. To help prevent sleep mode oscillation, Optidrive Eco can automatically initiate a boost cycle to increase pressure on starting or stopping.

## Drive Controlled Bypass

Intelligent features within the Optidrive Eco allow a bypass circuit to be implemented. Activation of Bypass mode can be determined intelligently by the Optidrive Eco drive based on a command from the building management system. The drive can be set to automatically select bypass mode when entering into a trip condition ensuring minimal disruption to service.

## Avoid Pump Downtime

### Blockage Detect/Clear

Optidrive Eco can detect potential pump blockages in real time and trigger a programmed cleaning cycle to automatically clear them, preventing downtime.

### Pump Clean/Stir Cycle

Triggered by a settable period of inactivity, a configurable cleaning cycle can be run to clear sediment, ensuring the pump is ready to run when needed.

### Dry Run Protection

Optidrive Eco can evaluate a pump's speed/power and shut it off or warn when the pump starts to run dry, protecting it from heat/friction damage.

## Cascade Control Pump Staging

### Variable speed duty pump with up to 4 assist pumps

Optidrive Eco can provide automatic operating time monitoring and balancing for assist pumps to share duty cycle. Run time clocks for all fixed speed assist pumps are maintained and visible within the Optidrive Eco for integration into the pump system maintenance schedules.

### Motor Preheat Function

Optidrive Eco features a motor preheat function to help ensure moisture is not permitted to collect on the motor in periods of inactivity and prior to motor start up. In addition, the motor preheat function can be used to keep condensation from developing on the motor as the motor cools down immediately following a stop. The feature is fully configurable, meaning the pump can be always available the instant it is required.

# OPTIDRIVE™ Size 8

200 – 250kW / 300 – 350HP  
**380 – 480V**

## High Power Drive Module

Optidrive Frame Size 8 extends the power rating capacity of Optidrive P2 and Optidrive Eco products up to 250kW / 350HP.

Combining all the features of the standard products, and providing the ability to control motors with rated current up to 450Amps, Frame Size 8 is available as an IP20 chassis unit suitable for control cabinet mounting.

Optional accessories include an EMC filter to meet Category C2, along with a range of input line chokes and output chokes.

# Keypads & Displays

## OPTIPOINT 2

Remote Keypad & LED Display

OPT-2-OPOINT-IN

## OPTIPAD

Remote Keypad & OLED Display

### Optipad Language Support

#### OPT-2-OPPAD-IN

- English
- German
- Spanish
- Italian
- French
- Swedish
- Russian
- Polish
- Portuguese
- Finnish

#### OPT-2-OPPAD-TU

- English
- German
- Turkish

Optipoint 2 and Optipad units act as the remote keypad and display for the Optidrive on the network which has the same serial address. The physical layout and the operation of the Optipoint keypad and display mimic the Optidrive exactly.

### Specification

#### OPTIPOINT 2

- Real-time keypad and display operation mimics Optidrive
- Single electrical interface for power and data
- Communicates with any compatible drive across a network
- Easy keypad switching to other network addresses
- IP54 rated when through panel mounted
- Bright LED Display
- Membrane keypad
- Parameter lock function available
- 3m Data Cable included

#### OPTIPAD

In addition to Optipoint 2 features, Optipad benefits from:

- Multi-language OLED Display
- IP55 rated

- Simple plug in RJ45 connection
- 24 Volt DC Power provided directly by the Optidrive
- RS485 2 Wire Signal Interface
- Operating Temperature: -10°C to +50°C
- Storage Temperature: -40°C to +60°C

#### Compatible with:

- Optidrive E3
- Optidrive P2
- Optidrive Eco

### Configuration

Depending on the requirement of the application, Optipoint 2 and Optipad keypads can be used in the following different ways:

#### 1 keypad with 1 drive

#### 1 keypad with multiple Optidrives (up to 63 max)

#### 2 keypads with 1 drive

#### 2 keypads with multiple Optidrives (up to 63 max)

Add a communication interface or extend functionality

Optidrive Compatibility

# OptiTools Studio

## Powerful PC Software

Drive commissioning and parameter backup

## OPTISTICK

Rapid Commissioning Tool

OPT-2-STICK-IN

- Powerful PC based commissioning and programming software
- Multi Drive Network Support

### Supports two key functions:

- Drive Programming & Commissioning
  - Parameter Upload, Download & Storage
  - Changed Parameter Highlighting
  - Parameter List Printing
- Provides Access to Optidrive P2 & Eco PLC programming function
  - Function Blocked Based PLC Logic Programming
  - Advanced Drive Control Functions
  - Multiple Functions can be easily combined to produce powerful solutions
  - Program protection to prevent unauthorised copying
- Real-time scope function and data logging
- Real-time data monitoring

### Compatible with:

Windows XP, Windows Vista, Windows 7, Windows 8, Windows 8.1 & Windows 10

- Allows rapid copying of parameters between multiple drives
- Provides Bluetooth wireless interface to a PC running OptiTools Studio
- Backup and restore of drive parameters

### Compatible with:

Optidrive E3, Optidrive P2, Optidrive Eco

## PC Connection Kit

OPT-2-USB-OBUS

OPT-2-USB-OBUS is a dedicated PC connection kit for all Optidrive models, allowing direct connection from the PC USB port to the drive RJ45 communication connection for use with Optitools studio software.

### Key Benefits

- To provide interface between PC and drive
- For use with OptiTools Studio PC software
- Provides electrical isolation between PC and drive network

### Features

- Isolated USB - RS485 connection adaptor
- USB2.0
- Compatible with Windows XP, Vista, 7, 8, 8.1, 10
- Supports Optitools Studio PC software connection to the drive
- 1.5 metre cable lengths

### Configuration

## RS485 Data Cable Splitter

OPT-J455P (RJ45 1 - 2 way)

RS485 data cable splitter is an RJ45 1 to 2-way connection block

## RJ45 Data Cables

RJ45 to RJ45 RS485 Data Cable, 0.5m length, Blue  
OPT-J4505

RJ45 to RJ45 RS485 Data Cable, 1.0m length, Blue  
OPT-J4510

RJ45 to RJ45 RS485 Data Cable, 3.0m length, Blue  
OPT-J4530

## EtherNet Module

OPT-2-ETHEG-IN

- ODVA compliant EtherNet/IP Modbus Translator Device
- Compatible with all drive platforms: P2, E3 & Eco
- Integrated network switch: simplifying network architecture
- Compatible with RSLogix and CoDeSys PLCs

## RJ45 8 Way Network Hub

OPT-2-RJHUB-IN

## RJ45 Terminator

OPT-2-RJTRM-IN

# Input Chokes

Reduce supply harmonic current distortion and increase protection against mains voltage spikes and notches

Input chokes can be used to reduce the supply line harmonic currents and voltage distortion generated by almost all inverter drives on the market today. Invertek Drives have selected a range of chokes matched to the Optidrive range to provide the best reduction in supply current harmonics whilst also providing enhanced protection for the Optidrive against transient voltages ('spikes') or other mains borne interference.

Input chokes are available for the complete range of Optidrive products, and are recommended for use in all installations and in particular:

- where the local mains supply quality may be poor or unknown
- where high current switching loads such as large DC drives or soft starts are operating
- where the mains supply impedance is low
- in remote areas prone to lightning strikes

## Fourier Analysis of Harmonic Distortion

The graph shows the effect of using an input choke on typical 4kW/ 5HP drive. The 50Hz current is used as a reference and is the current which delivers the useful power to the motor. The reduction in the total effective (RMS) current is clear.

| Part Number    | Phases | Optidrive Size | Enclosure IP | Connection (mm <sup>2</sup> ) | L (mm) | H (mm) | B (mm) | Rated Volts | Rated Amps | Inductance (mH) | Weight (kg) |
|----------------|--------|----------------|--------------|-------------------------------|--------|--------|--------|-------------|------------|-----------------|-------------|
| OPT-2-L1016-20 | 1      | 1              | 20           | 4                             | 78     | 80     | 78     | 230 Max     | 16         | 1.8             | 1.1         |

Output filters improve the quality of the output waveform

In most applications, the unfiltered output from an inverter drive gives satisfactory performance but to improve system functionality, reliability and longevity, output filtering is strongly recommended in some applications, including:

- Long motor cables, up to 200m
- High capacitance motor cables (i.e. typical "pyro" wire, used for fire protection)
- Multiple motors connected in parallel
- Motors without inverter grade insulation (typically older motors)

## Key Features

- Limits output voltage gradient, typically  $<200V/\mu s$
- Limits transient over voltages at the motor terminals, typically  $<1000V$
- Suppression of mains conducted interference in lower frequency ranges
- Compensation of capacitive load currents
- Reduction of RFI emissions from the motor cable
- Reduction of motor losses and audible noise caused by ripple

## Comparison of Characteristics

Without filter

With filter

**Note:** Switching pulse rises slower and to a lower amplitude with filter.

### OPTIFILTER

#### RFI Line Filters

All Optidrive products are manufactured as standard with an internal EMC filter, unless specified by the customer. In general, this internal filter will provide compliance with international standard requirements for the majority of industrial installations and applications.

Where a higher standard of EMC compliance is desired or required, Invertek Drives can provide a range of suitable filters to ensure that an EMC compliant solution for all possible applications can be realised.

| Part Number    | Supply Phases | Optidrive Size | Enclosure IP | Length (mm) | Width (mm) | Depth (mm) | Rated Amps | Weight (kg) |
|----------------|---------------|----------------|--------------|-------------|------------|------------|------------|-------------|
| OPT-2-E1010-20 | 1             | 1              | 20           | 180         | 70         | 65         | 10         | 1.5         |

## OPTIBRAKE

### Dynamic Braking Resistors

Optibrake dynamic braking resistors are designed specifically for the Optidrive range. For use with high inertia loads which need to be stopped rapidly. Optibrake dynamic braking resistors assist the Optidrive in managing the electrical energy returned from the motor during braking by converting it to heat energy.

| Part Number | Optidrive Size | Resistance | Rated Voltage | Rated Power (W) |       |
|-------------|----------------|------------|---------------|-----------------|-------|
|             |                |            |               | Continuous      | Peak  |
| OD-BR100-IN | 2, 3           | 100        | 900 VDC       | 200             | 12000 |
| OD-BRES4-IN | 4, 5           | 22         | 900 VDC       | 500             | 21000 |

## Local Isolator

Local isolator option allows complete disconnection of the incoming AC power to the drive. The isolator mounts directly to the drive, and provides a local disconnect option. The handle can be padlocked in the off position for safe maintenance.

| Part Number    | Optidrive Size | H (mm) | W (mm) | D (mm) |
|----------------|----------------|--------|--------|--------|
| OPT-2-ISOLO-S4 | 4              | 170    | 173    | 80     |
| OPT-2-ISOLO-S5 | 5              | 230    | 235    | 100    |

## Through Hole Mount Kit

Through hole mount kits allow optidrive to be mounted through panel, ensuring that the heat from the drives heat sink is kept spate from the control electronics. This allows the optimum panel cooling arrangement to be used, with best possible separation of hot and cold air.

Through panel mounting kits can be used with all IP55 frame size 4–7 units.

| Part Number  | Optidrive Size | Panel Cut Out Dimensions |             | Mount Dimensions |               |
|--------------|----------------|--------------------------|-------------|------------------|---------------|
|              |                | H mm (in)                | W mm (in)   | A mm (in)        | D mm (in)     |
| OPT-2-THMT04 | 4              | 425 (17.3)               | 180 (7.09)  | 228 (8.98)       | 521.5 (20.53) |
| OPT-2-THMT05 | 5              | 515 (21.26)              | 240 (9.65)  | 292 (11.5)       | 612.5 (24.11) |
| OPT-2-THMT06 | 6              | 815 (34.06)              | 335 (13.39) | 398 (15.67)      | 924 (36.38)   |
| OPT-2-THMT07 | 7              | 1230 (50.4)              | 335 (13.39) | 398 (15.67)      | 1342 (52.83)  |

**Inverterk Drives Ltd** is dedicated to the design, manufacture and marketing of electronic variable speed drives. The state of the art UK headquarters houses specialist facilities for research & development, manufacturing and global marketing. The company pledges to implement and operate the ISO 14001 Environmental Management System to enhance environmental performance.

All company operations are accredited to the exacting customer focused ISO 9001:2008 quality standard. The company's products are sold globally in over 80 different countries. Inverterk Drives' unique and innovative drives are designed for ease of use and meet with recognised international design standards.

UK Headquarters, Welshpool

## Global Drive Solutions

Inverterk Drives operate at the heart of automated systems around the world

### Crane Control

Demanding application at South African mine

### Machine Tool OEM

UK machine tool supplier specifies Optidrive

### Manufacturing

IP66 washdown duty drives in Singapore

### Food Processing

Precision conveyor control in Spain

### Amusement Parks

Reliable control of difficult loads in Spain
