

A25 Series Warm Air Limit Control with Manual Reset

Description

The A25 Warm Air Control Locks out on a temperature increase to the control setpoint. Manual reset is required before the electrical contacts can be reclosed.

The A25 Control is normally located in a return air duct and is wired to shut down air conditioning or ventilating fans when the temperature of the air becomes excessively hot.

Refer to the *A25 Series Warm Air Control with Manual Reset Product Bulletin (LIT-125118)* for important product application information.

Action on Increase of Temperature

A25AN-1 Warm Air Limit Control

A25AP-1 Warm Air Limit Control

Applications

Use for high temperature cut-out.

Features

- trip-free reset lever does not permit restarting until the reset lever is manually released
- the rod and tube type sensing element provides positive control action

Repair Information

If the A25 Series Warm Air Limit Control with Manual Reset fails to operate within its specifications, replace the unit. For a replacement control, contact the nearest Johnson Controls® representative.

Technical Specifications

The maximum element temperature is 300°F (149°C).
