

VSD Series II Variable Speed Enclosed IntelliPass and IntelliDisconnect Drives

Description

The Johnson Controls® VSD Series II Variable Speed Enclosed IntelliPass and IntelliDisconnect drives, powered by Eaton® technology, provide a premier intelligent drive integrated with a reliable bypass configuration. The IntelliDisconnect variable speed drive combines a premier quality drive with a manual motor protector (MMP) and disconnect (no bypass). The IntelliPass bypass is a two- or three-contactor design using the Eaton 24 VDC Series of contactors and power supplies. The features, function, and form allow the drive and bypass to become an integrated design. The IntelliPass drives come standard with an Eaton/Cutler-Hammer® MMP integrated into the drive and bypass design.

Refer to the *VSD Series II Variable Speed Enclosed IntelliPass and IntelliDisconnect Drives Product Bulletin (LIT-12011814)* for important product information.
