

M9102-AGA-2S, -3S and M9104-xGA-2S, -3S Series Electric Non-Spring-Return Actuators

Description

The M9102 and M9104 Series Actuators are direct-mount, non-spring-return electric actuators that operate on AC 24 V power. These synchronous motor-driven actuators provide floating control (AGA), floating control with automatic shutoff (IGA), and proportional control with selectable 0-10 or 2-10 VDC (GGA). The -2S models are equipped with plenum cables, and the -3S models are equipped with terminal blocks.

All models are compact in size and are easily installed on VAV boxes, Variable Volume and Temperature (VVT) two-position zone applications, or small- to medium-sized dampers with a round shaft up to 1/2 in. (13 mm) in diameter or a 3/8 in. (10 mm) square shaft.

The M9102 Series Electric Non-Spring-Return Actuators provide a running torque of 18 lb·in (2 N·m), and the nominal travel time is 30 seconds at 60 Hz (36 seconds at 50 Hz) for 90° of rotation. The M9104 Series Electric Non-Spring-Return Actuators provide a running torque of 35 lb·in (4 N·m), and the nominal travel time is 60 seconds at 60 Hz (72 seconds at 50 Hz) for 90° of rotation.

Refer to the M9102-AGA-2S, -3S and M9104-xGA-2S, -3S Series Electric Non-Spring-Return Actuators Product Bulletin (LIT-1201742) for important product application information.

Features

- Two Torques Available: 18 and 35 lb·in (2 and 4 N·m) — offer the most suitable choice for the specific application.
- Short 30-Second Travel Time Available provides a quick response for two-position zone applications.
- 35 dBA Nominal Audible Noise Rating meets the audible noise requirements for open-ceiling environments.
- Synchronous Drive provides a constant rotation time that is independent of the load.
- 100,000 Cycle Rating provides years of trouble-free service.
- Direct Shaft Mounting with Single-Screw Coupler — reduces installation time and provides three-point shaft gripping.
- Magnetic Clutch protects the actuator gear train and the damper from damage due to excessive torque during a stall condition.
- Manual Gear Release simplifies actuator setup and adjustments in the field.
- Plenum Cable or Screw Terminal Electric Connections — make wiring quick and easy.

- Floating, Floating with Timeout, and Proportional 0(2) to 10 VDC Control Inputs Available — offer a full range of control input options.
- Small, Compact Design allows installation in tight-fitting locations.

Applications

The M9102 and M9104 Series Electric Non-Spring-Return Actuators are designed to position balancing, control, round, and zone dampers in HVAC systems. These electric actuators are also designed to position blades in a VAV box, or they can be used in VVT two-position zone applications.

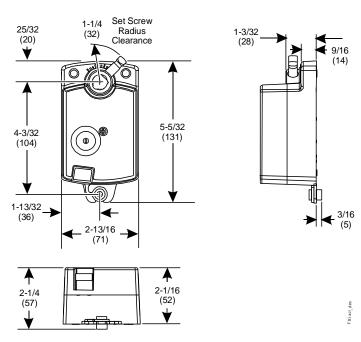

Each actuator mounts directly to the surface in any convenient orientation using a single No. 10 self-drilling sheet metal screw (included with the actuator). No additional linkages or couplers are required. Electrical connections on the actuator are clearly labeled to simplify installation.
