

Pauluhn® Lighting and Roughneck® Connectors

For more than a century, companies have relied on Cooper Crouse-Hinds for value they can trust to grow their business. By integrating a comprehensive line of electrical products, lighting and instrumentation with expert support, industry insights, and local availability, we enhance safety and productivity in the most demanding industrial, harsh and hazardous environments worldwide. This philosophy is at the core of every product we develop and every solution we engineer.

Roughneck® Plugs and Receptacles are built to take heavy abuse while providing a safe, simple, and secure connection.

- Receptacle bus bar can be mounted in the vertical, horizontal or 45° angle position for the ultimate in flexibility.
- Receptacle mounting shells feature our industry exclusive stainless steel rotating latch that provides a tool-free, secure connection.
- An optional stainless steel short throw design now available.
- Receptacle shells are lockout/tagout compatible.
- Male contacts are equipped with Cam-Lok's safe front insulated tip for increased safety.
- All contacts are silver plated copper.
- Roughneck Plugs and Receptacles are designed for use with 313-777 MCM cable and are rated up to 1000V and 1135A.
- Epoxy shell coating exceeds Coast Guard salt spray requirements.
- Available in Black, Red, White, Blue, Green, Brown, Orange, Yellow, Gray and Purple
- Provides NEMA 3R Environmental Protection.
- UL recognized in the USA and Canada.
- CE self certification.
