## /// IS 230

With a scanning range of up to 40 mm , this series in the M30 design opens the greatest possible flexibility during mounting.
( $\epsilon$ M

## Benefits:

■ Wide spectrum of available ranges enables application in limited spaces

- The sensor can be mounted at a greater distance from moving parts
- The high sensitivity of the sensors makes them the inexpensive solution for special applications, e. g. for close-range detection of small parts
- Sturdy all-metal housing for permanent operation
