• SM1PF00 20 has a single 0.2A thermal adjustment and magnetic tripping at 6 x In (1.2A).

**2** When fitting more than one breaker side by side, without leaving space between each to consent free air circulation on the breaker sides, and have simultaneous operation, the thermal trip adjuster must be positioned at a value 15% higher than the rated motor current.

## THERMAL TRIPPING CURVE (AVERAGE TIMES)

Tripping times can have a  $\pm 20\%$  deviation with respect to the average tripping curve value above.
