PRODUCT FEATURES

DECONTACTOR® Technology

Operating Instructions

When the plug and receptacle are latched together, the circuit is connected.

Pressing the pawl breaks the connection and opens the circuit. The plug is ejected to its rest position; The contacts are now dead.

Rotating the 'dead' plug 30° counterclockwise closes the safety shutter and frees the plug to be withdrawn from the receptacle.

The plug and the receptacle are separated. The safety shutter prevents access to live parts.

5 To reconnect, insert plug into receptacle, rotate 30° clockwise, and apply insertion force.

General Ratings
