

Product Update Announcement

Poly Cord Grips

Issue date: 7 January 2020

New Poly Cord Grips 1/2" to 1-1/2"

The purpose of this product update is to announce the release of new poly cord grips for the 1/2" to 1-1/2" NPT sizes. This change in our poly cord grip offerings is required to address a supply chain issue affecting those sizes.

The change does not affect our 2" poly cord grip offerings, our aluminum cord grip offerings, or our Hazardous-Location cord grip offerings. Those remain unchanged.

In conjunction with this change, we will unfortunately no longer be able to offer the wire mesh option for poly cord grips. In applications where the wire mesh is required, please offer your customers an aluminum cord grip, as the wire mesh option remains available for those.

While this change is effective immediately for 1/2" and 3/4" NPT poly cord grips, we will consume our remaining stock of the old style 1", 1 1/4" and 1 1/2" poly cord grips before inactivating those part numbers. Orders received with the old part numbers for 1" to 1 1/2" NPT poly cord grips will be fulfilled as long as stock permits. After that, Customer Service will work with customers to update orders to the new part numbers. The new part numbers for any size may be ordered anytime following this announcement.
