

## MENNEKES® offers a full line of both Non-Metallic and Stainless Steel Disconnect Switches.

Units range from 20 Amp - 200 Amp and are rated up to 150 HP @ 480Vac. Several enclosure sizes and styles are available to maximize installation and design options.

Poured-in-place gasket never pulls out for a long lasting NEMA 4X seal.

HP rated disconnect switch with top profile auxiliary contacts. DIN rail mounting facilitates installation and service requirements.

Impact modified enclosure is resistant to many chemicals and made with UL 94 V-O flame retardant materials.

Unit shown:  
ME 30MS1A-M2

Shown with optional cover retaining strap.

Mounting tubes minimize footprint; mounting feet are not required.

Rugged handle clearly indicates ON/OFF status & complies with OSHA LO/TO regulations.

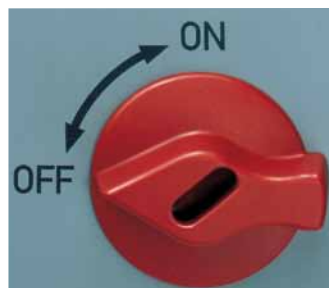

Captive stainless steel fixing screws.

### Hidden Hinge System

Available on MS2A enclosure.

### High Visibility Handle

Clean design does not "puddle" or hold particles.

### Model with Installed Control Switch

Disconnects with 3-position selector switch are factory stocked.
