

The TAH20 is a completely encapsulated thick film resistor in the TO220 package outline. Rated for 20 watts @ 25°C case temperature, these resistors are electrically isolated, and molded in a high temperature case.

Designed for heat sink mounting, the symmetrical package is ready for use with snap-on style heat sinks (we recommend use of thermal grease). The TAH20 Series is very low inductance, and available in a wide range of resistance values in standard 5% tolerance, and 1% available by special order.

Ohmite's new TCH35 TO220 package resistor provides 35 watts of steady state power when properly used in today's well defined heat sink applications.

These very low inductance resistors are built under proprietary processes that deliver 75% more power handling capability than other TO-220 package resistors of similar size.

Standard lead forms are provided for manual or automatic insertion.

A single screw mounting tab connects to the heat sink and should be accompanied by the use of a thermal compound. The TCH35 Series offers a low thermal resistance to the heat sink of  $< 4.28^\circ\text{C/W}$ .

## FEATURES

- 35W Power Rating @ 25°C
- Very Low Inductance Design
- Single Screw Mounting
- Low Thermal Resistance to Heat Sink @  $R_{TH} < 4.28^\circ\text{C/W}$
- Resistance Element is Electrically Insulated from Metal Heat Sink Mounting Tab

## APPLICATIONS

- Switching Power Supplies
- Snubbers
- High Frequency
- Voltage Regulation
- Low Energy Pulse Loading
