

STANDARD DC OUTPUT MODULES

Features

- > Rugged construction
- > 4000 volts of optical isolation between the field devices and the control logic (transient)

DESCRIPTION

DC output modules are used for controlling or switching DC loads. Each module provides 4000 volts (transient) of optical isolation between the field devices and the control logic.

Typical uses and applications for DC output modules include switching the following loads:

- DC relays
- DC solenoids
- DC motor starters
- DC lamps or indicators
- PLC logic
