

## 2-wire programmable transmitter

### 6334A

- TC input
- High measurement accuracy
- Galvanic isolation
- Programmable sensor error value
- 1- or 2-channel version

#### Application

- Linearized temperature measurement with TC sensor.
- Amplification of bipolar mV signals to a 4...20 mA signal, optionally linearized according to a defined linearization function.

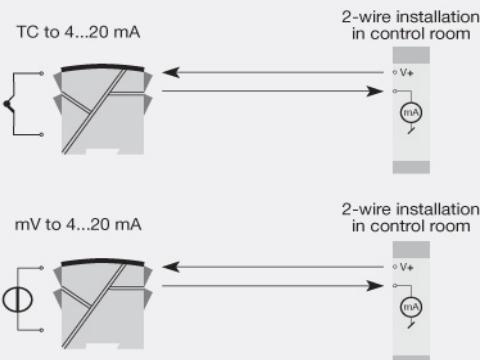

#### Technical characteristics

- Within a few seconds the user can program PR6334A to measure temperatures within all TC ranges defined by the norms.
- Cold junction compensation (CJC) with a built-in temperature sensor.
- A limit can be programmed on the output signal.
- Continuous check of vital stored data for safety reasons.

#### Mounting / installation

- Mounted vertically or horizontally on a DIN rail. Using the 2-channel version up to 84 channels can be mounted per meter.
- The 6334A can be mounted in zone 2 and zone 22.
