

PSL-MLD Multiple Lockout Device With PSL-MLDC Durable Cable

PSL-MLDC Durable Cable for Multiple Lockout Device

Prevents inadvertent, accidental or unintentional energization of gate valves and the electrical circuit for disconnect switches. Immobilizes large and cumbersome devices. May be used as a hasp (6 lock maximum) – No Installation Tools Required

Installation Instructions for PSL-MLD used as gate valve lockout device

cable.

Step 1: Verify valve is de-energized. Thread end of cable through gate valve handle and then through loophole of

Step 2: With loophole tight against the gate valve and lockout open, continue threading end of cable through the pre-notched opening of lockout double.

Step 3: Cinch up plastic lockout body onto cable, forming a secure bond.

Step 4: Insert up to six padlocks and tags into holes of the hasp. Verify that the lockout device secures the gate valve in a safe or off position.

Installation Instructions for PSL-MLD used as a disconnect switch lockout device

Step 1:
Verify disconnect is de-energized.
Thread cable through holes on each disconnect handle. Insert end of cable through loophole and tightly hold firm near lockout point.

Step 2: Thread end of cable through prenotched opening of lockout device.

Step 3: Cinch up plastic lockout body onto cable, forming a secure bond.

Step 4: Insert up to six padlocks and tags into holes of the hasp. Verify that the lockout device secures the disconnect switches in a safe or off position.

Instructions and photos demonstrate installation with the loop hole of the cable. User shall determine if threading the cable in both the top hole and pre-notched opening better secures the energy isolating device in a safe or off position.

- The PSL-MLD accommodates Panduit PSL-6, PSL-7, PSL-8 padlock series (0.3" shackle diameter maximum)
- The PSL-MLDC six foot coated galvanized steel cable may be purchased seperately. For extended cable lengths order 200 foot cable, cable crimps, and crimp tool (PSL-MLDC200, PSL-MLD-CRIMP, and PSL-MLD-TOOL).

Installation Procedure Warning!

Always perform an Electrical De-Energization Test and a Blocking verification Test before using this product.

ELECTRICAL DE-ENERGIZATION TEST:

All associated circuitry and/or energy isolating devices should be electrically verified as de-energized prior to and following the installation of the lockout device.

BLOCKING VERIFICATION TEST:

If this lockout device cannot be affixed in a manner that will hold the appropriate energy isolating devices in a safe or off position, the devices SHALL NOT be used.

APPROPRIATE USE of these lockout devices is the sole responsibility of the user in relation to compliance with OSHA's Lockout/Tagout regulations

Before using this product, user shall determine the suitability of the product for his intended use. User assumes all risk and liability whatsoever in connection with the installation of this product. PANDUIT DISCLAIMS ALL LIABILITY FOR ANY INJURY, LOSS OR DAMAGE, WHETHER DIRECT OR CONSEQUENTIAL, ARISING OUT OF THE INSTALLATION AND USE OF THE PRODUCT.

*Our products are warranted to be free from defects in material and workmanship at the time of sale but our obligation under this warranty is limited to the replacement of any product proved to be defective within six months (for product) or 90 days (for tools) from the date of delivery. Tool warranty is void if Panduit tools are modified, altered or misused in any way. Use of Panduit tooling with any product other than the specified Panduit products for which the tool was designed, constitutes misuse.
