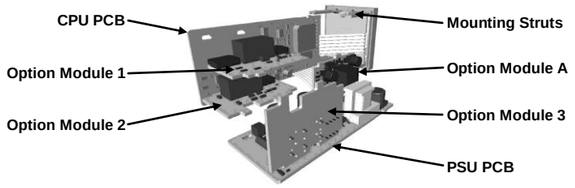
$^1/_{16}$ - $^1/_8$ - $^1/_4$ DIN PROCESS CONTROLLERS CONCISE PRODUCT MANUAL (59300-7)

CAUTION: Installation should be only performed by technically competent personnel. It is the responsibility of the installing engineer to ensure that the configuration is safe. Local regulations regarding electrical installation & safety must be observed - e.g. US National Electrical Code (NEC) and/or Canadian Electrical Code. Impairment of protection will occur if the product is used in a manner not specified by the manufacturer.

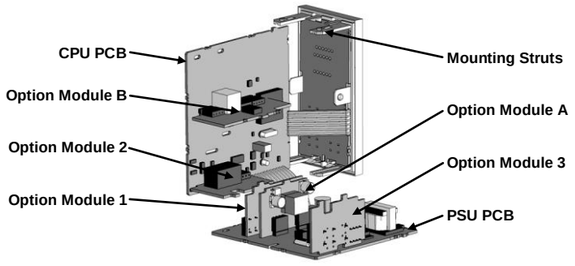
1. INSTALLATION

Some installation details vary between the three model sizes covered by this manual *(refer to section 10)*. These differences have been clearly shown.

Installing Option Modules: $^1/_{16}$ Din Size Instruments



Installing Option Modules: $^1/_8$ & $^1/_4$ Din Size Instruments

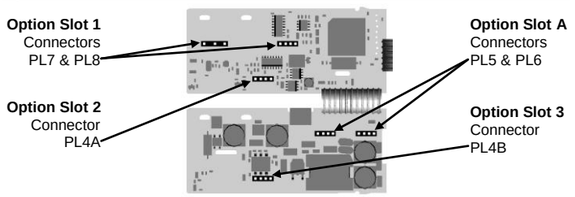


To access modules 1, A or B, first detach the PSU and CPU boards from the front by lifting first the upper, and then lower mounting struts. Gently separate the boards.

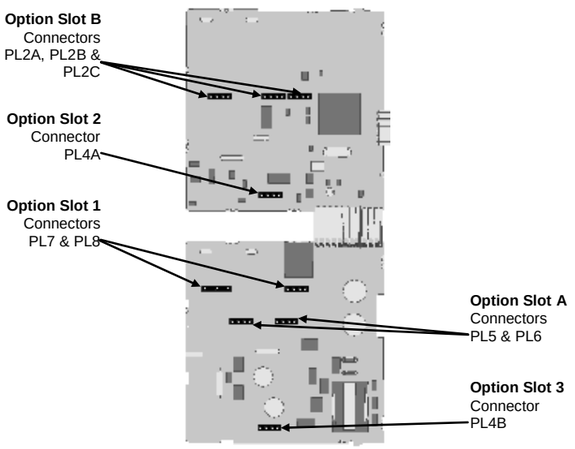
a. Plug the required option modules into the correct connectors, as shown below.
b. Locate the module tongues in the corresponding slot on the opposite board.
c. Hold the main boards together while relocating back on the mounting struts.
d. Replace the instrument by aligning the CPU and PSU boards with their guides in the housing, then slowly push the instrument back into position.

Note: Option modules are automatically detected at power up.

Option Module Connectors: $^1/_{16}$ Din Size Instruments



Option Module Connectors: $^1/_8$ & $^1/_4$ Din Size Instruments

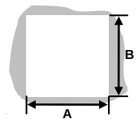


Panel-Mounting

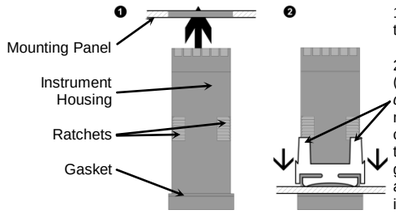
The mounting panel must be rigid, and may be up to 6.0mm (0.25inch) thick. Cut-out sizes are:

Cut-Out Dim A	Cut-Out Dim B
$^1/_{16}$ & $^1/_8$ Din = 45mm	$^1/_{16}$ Din = 45mm
$^1/_4$ Din = 92mm	$^1/_8$ & $^1/_4$ Din = 92mm

For *n* multiple instruments mounted side-by-side, cut-out A is 48*n*-4mm ($^1/_{16}$ & $^1/_8$ Din) or 96*n*-4mm ($^1/_4$ Din)



Tolerance +0.5, -0.0mm



1. Insert instrument into the panel cut-out.

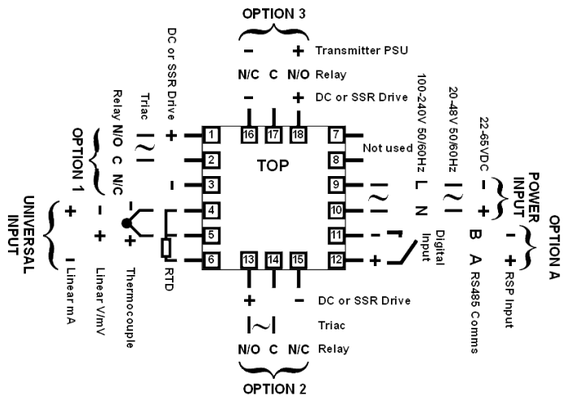
2. Hold front bezel firmly (*without pressing on display area*), and re-fit mounting clamp. Push clamp forward, using a tool if necessary, until gasket is compressed and instrument held firmly in position.

CAUTION: For an effective IP66 seal against dust and moisture, ensure gasket is well compressed against the panel, with the 4 tongues located in the same ratchet slot.

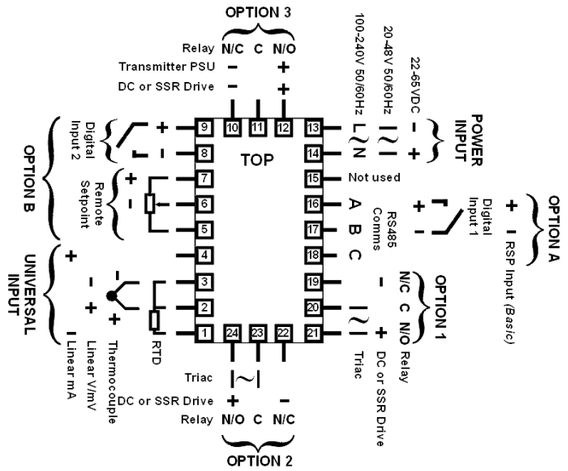
Rear Terminal Wiring: $^1/_{16}$ Din Size Instruments

USE COPPER CONDUCTORS (EXCEPT FOR T/C INPUT)

Single Strand wire gauge: Max 1.2mm (18SWG)



Rear Terminal Wiring: $^1/_8$ & $^1/_4$ Din Size Instruments



These diagrams show all possible option combinations. The actual connections required depends on the exact model and options fitted.

CAUTION: Check information label on housing for correct operating voltage before connecting supply to Power Input
Fuse: 100 – 240V ac – 1amp anti-surge
24/48V ac/dc – 315mA anti-surge

Note: At first power-up the message `Goto Conf` is displayed, as described in section 7 of this manual. Access to other menus is denied until configuration mode is completed
