Accessories

UB-PROG4-V31

Programming unit for ultrasonic sensors with Teach-in input at pin 2

OMH-ML7-01

Mounting aid for ML7 and ML8 series, Mounting bracket

V31-GM-2M-PVC

Female cordset, M8, 4-pin, PVC cable

V31-WM-2M-PVC

Female cordset, M8, 4-pin, PVC cable

Description of Sensor Function

The ultrasonic sensor transmits ultrasonic packets in quick succession and responds to their reflection off the detected object. The sensor has a switch output. The switching point is progammable (Teach-In). Objects beyond the taught-in switching point are not detected (background suppression).

Teach-In of Switching Point SP

To teach in a switching point, proceed as follows:

- 1. Connect the sensor and turn on the operating voltage.
- 2. Place the object to be detected at the required distance.
- 3. Connect the teach-in input (ET) to -U_B. This can be done usingthepushbutton or the controller.
- The LED will start flashing after 3 seconds to indicate that the sensor is ready to start the teach-in process (*).
- 4. Disconnect the teach-in input (ET) with -U_B. The switching point SP has now been taught in ^(*).
- (*) If no object is detected within the sensing range of the sensor, the sensor will start flashing at a faster rate. The switching point remains unchanged.

Safety Note

The use of this device in applications, where the safety of persons depends from the devices function, is not allowed!
