# Accessories

#### UB-PROG4-V31

Programming unit for ultrasonic sensors with Teach-in input at pin 2

#### OMH-ML7-01

Mounting aid for ML7 and ML8 series, Mounting bracket

#### V31-GM-2M-PVC

Female cordset, M8, 4-pin, PVC cable

#### V31-WM-2M-PVC

Female cordset, M8, 4-pin, PVC cable

## **Description of Sensor Function**

The ultrasonic sensor transmits ultrasonic packets in quick succession and responds to their reflection off the detected object. The sensor has a switch output. The switching point is progammable (Teach-In). Objects beyond the taught-in switching point are not detected (background suppression).

## **Teach-In of Switching Point SP**

To teach in a switching point, proceed as follows:

- 1. Connect the sensor and turn on the operating voltage.
- 2. Place the object to be detected at the required distance.
- 3. Connect the teach-in input (ET) to -U<sub>B</sub>. This can be done usingthepushbutton or the controller.
- The LED will start flashing after 3 seconds to indicate that the sensor is ready to start the teach-in process (\*).
- 4. Disconnect the teach-in input (ET) with -U<sub>B</sub>. The switching point SP has now been taught in <sup>(\*)</sup>.
- (\*) If no object is detected within the sensing range of the sensor, the sensor will start flashing at a faster rate. The switching point remains unchanged.

## Switching characteristics and display LED

unusable	Sensing range	Output	LED
area	Adjustment range		
		-U <sub>B</sub>	Off
		+U <sub>B</sub>	On
