

Radiant Heater and Fan Heater series FLH

Heat generated by electrical equipment operating under load will prevent the accumulation of condensation. After the equipment has been switched off however it cools down and gradually adapts to the ambient temperature, thus dropping below the dew point. This is the signal that triggers the radiant heater! These sources of heat prevent the formation of condensation by raising the internal temperature a few degrees above the ambient temperature.

In the interest of evenly distributing the heat, we recommend that the requirement of heating capacity is divided among several small heaters.

Level of protection

suitable for both
50 Hz and 60 Hz

115V...230V
(FLH 010-150)

Thermal data:	Radiant Heater								Fan Heater

Mechanical data:

Fitting position	any, vertical position preferred								airflow vertical, exit at top			
Construction	aluminium section, anodised (light-coloured)											
Weight	250 g	250 g	250 g	250 g	450 g	510 g	510 g	770 g	1.035 g	1.200 g		
Dimensions	A	A	A	A	B	B	B	C	D	E		
Protection class	I											
Connection	cable end or plug-in terminal								plug-in terminal			
Binding post clamping area	single filament: 2 x 0,5 - 2,5 mm ² , fine multi-filament: (soldered, wire and sleeve, pin terminal) 2 x 0,5 - 1,5 mm ²											
Mounting method	snap-in mounting for 35mm profile bar in accordance with EN 50022											

Supplementary data:

Operating temperature	- 40 °C (- 40 °F) ... + 70 °C (+ 158 °F)								- 20 °C (- 4 °F) ... + 70 °C (+ 158 °F)			
Storage temperature	- 40 °C (- 40 °F) ... + 70 °C (+ 158 °F)								- 40 °C (- 40 °F) ... + 70 °C (+ 158 °F)			
System of protection	IP 44 (cable end), IP 20 (plug-in terminal), when installed as specified											
Accessories	thermostat FLZ 510, FLZ 520, FLZ 530, hygrostat FLZ 600											
Approvals	UL approval											
Optional extra	2nd protection guard
