| $\mathbf{2}$ | Plastic fixing ring and shaped ring |
| $\mathbf{3}$ | Metal ring |
| $\mathbf{4}$ | Metal fixing ring and shaped ring |

## Lock

Z Without lock
A Lock in all directions

| Joystick height |  |
| :--- | :--- |
| $\mathbf{1}$ | Standard $(55 \mathrm{~mm})$ |
| $\mathbf{2}$ | Reduced $(45 \mathrm{~mm})$ |

## Actuation

4B UP spring-return, RIGHT spring-return,
4B DOWN spring-return, LEFT spring-return
2F LEFT spring-return, RIGHT spring-return
2B UP spring-return, DOWN spring-return
4A UP maintained, RIGHT maintained,
DOWN maintained, LEFT maintained
2E LEFT maintained, RIGHT maintained
2A UP maintained, DOWN maintained

## Main features

- Protection degrees IP67 and IP69K
- 2 possible heights:
standard ( 55 mm ) and reduced ( 45 mm )
- Versions with central lock
- Versions with spring-return or maintained actuation
-Two-step actuation

## Quality marks:

## C $\mathcal{E}$, (1)w EH [

UL approval:
E131787
EAC approval:

## General data

## Protection degrees IP67 and IP69K

P69\%
The elastic hood of the Pizzato joystick is made in a single seamless piece that completely encloses the lever, in this way without leaving the minimum aperture or junction.
This particular solution (patent pending) is present in all the versions of the joystick, including the versions with reduced height and central lock and is the most effective method for ensuring protection from all possible infiltrations of dirt and water. These devices can therefore be used in all environments where the maximum protection of the housing is required and pass both the IP67 immersion test according to EN 60529 and test IP69K according to ISO 20653 with jets of water at 100 bar and temperature $80^{\circ} \mathrm{C}$.

## Central lock

To prevent accidental operation, the E2 MA series joystick can be ordered in versions with central lock.
In these versions the lever remains fixed in the central position and can be steered in the various directions only after being unlocked by simply pulling the release disk. The pulling release movement avoids unwanted unlocking actions.

## Easy configuration of the contacts

The joystick is paired with a mounting adapter with four slots, thus allowing to associate different types of contact blocks to every single direction of actuation. Single or double contact blocks, even on two levels, can be used.
There are therefore no constraints on the type of contact block, the users can freely install the standard contact block in the configuration they prefer.

## Two-step actuation

Two-step actuation in every direction is possible by connecting in series to the normal NO contact blocks additional NO contact blocks provided with early make contacts. This option can be used for example to control two-speed actuations in the same direction.

## Maintained or spring-return actuation

Versions with 2 or 4 directions are available, and the single directions can have a maintained actuation, in which the lever remains in the tilted position, or spring-return actuation, in which the lever automatically returns to the central position.

## Two compact forms

With the standard height version ( 55 mm ), there is also a reduced height ( 45 mm ) version, ideal for all situations where a low height is required. Even so, the reduced height version of the joystick does not dispense with any of the standard version options, such as the possibility of being provided with central lock.

## Labels for the joystick

The joystick can be paired with specific circular and rectangular labels. This accessory, available in black or grey colour, is the ideal complement for the joystick at both the functional and aesthetic level, creating an assembly of original and elegant design. The labels specify with clear indications the functions performed by the joystick, and can be customised with symbols or written text. The laser-engraved markings are indelible. The application of the label does not alter the IP protection degree of the device.

## Selection table

Selection table for complete units

## Selection table for complete units with two-step actuation

Legend:

- maintained actuation
spring-return actuation

## Dimensions

## Minimum distances for installation

Standard height joystick
$\mathrm{A}=70 \mathrm{~mm}$

Reduced height joystick
$\mathrm{A}=60 \mathrm{~mm}$

## Maximum number of contact blocks

4-slot mounting adapter
Joystick E2 •MA•••••••

maximum number: 8 contact blocks 2 levels

The assembly of the 2 lateral actuators, supplied with the joystick, must be done after the fixing of the joystick.

## Mounting adapter

 Packs of $\mathbf{1 0}$ pcs.
