

Module for emergency stops, end position monitoring for movable guards, semiconductor outputs (e.g. light barriers) and magnetic safety sensors

## Main features

**10A** 

- For safety applications up to SIL CL 3/PL e
- Input with 1 or 2 channels
- Choice between automatic start, manual start (CS AR-05 only) or monitored start (CS AR-06 only)
- Can be connected to semiconductor outputs (e.g. light barriers), to electromechanical contacts or to magnetic safety sensors
- Output contacts: 3 NO safety contacts, 1 NC auxiliary contact
- Supply voltage
- 24 Vac/dc, 120 Vac, 230 Vac

## Utilization categories

Alternating current: AC15 (50...60 Hz) Ue (V) 230 le (A) 3 Direct current: DC13 (6 oper. cycles/min.) Ue (V) 24 le (A) 4

# Quality marks and certificates:

| EC type examination ce | ertificate: IMQ CP 432 DM |
|------------------------|---------------------------|
| UL approval:           | E131787                   |
| CCC approval:          | 2013010305640211          |
| EAC approval:          | RU C-IT.АД35.В.00454      |

## Compliance with the requirements of:

Low Voltage Directive 2014/35/EU, Machinery Directive 2006/42/EC, EMC Directive 2014/30/EU

## **Code structure**

# **CS AR-05V024**

## Start mode

- 05 manual or automatic start
- 06 monitored start

## Connection type

- Screw terminals V
- Connector with screw terminals Μ
- X Connector with spring terminals

## General Catalogue Safety 2017-2018

# Safety module CS AR-05-06

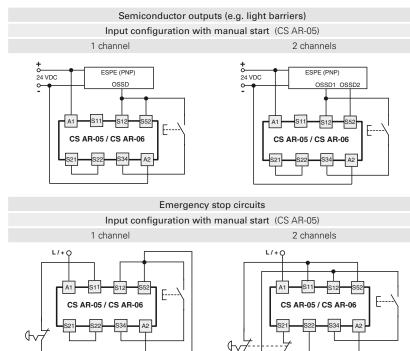

## Pin assignment

## Internal block diagram

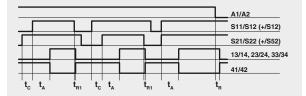

## Input configuration

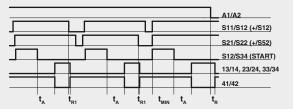

Function diagrams

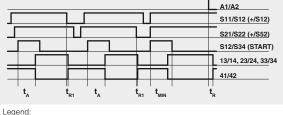

Configuration with automatic start (CS AR-05 only)

Configuration with monitored start (CS AR-06 only)

Configuration with manual start (CS AR-05 only)

 $\begin{array}{l} \textbf{t}_{\text{MM}}: & \text{Min. duration of start impulse} \\ \textbf{t}_{c}: & \text{simultaneity time} \\ \textbf{t}_{A}: & \text{response time} \end{array}$ 

t<sub>R1</sub>: release time
t<sub>R</sub>: release time in absence of power supply

Notes

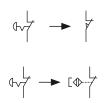

The configurations with one channel are obtained taking into consideration the CH1 input only. In this case it is necessary to consider time  $t_{R1}$  referred to input CH1, time  $t_{R1}$  referred to the supply, time  $t_{A}$  referred to input CH1 and to the start, and time  $t_{RM1}$  referred to the start.

Use module CS AR-06 with the circuit diagrams for manual start.

## Monitoring of movable guards and magnetics af etysens or statement of the second statement of the se

The safety module can monitor emergency stop circuits, control circuits for movable guards as well as magnetic safety sensors. Replace the emergency stop contacts with switch contacts or sensor contacts. The sensors can only be used in 2-channel configuration.

Application examples See page 251

The diagram does not show the exact position of the terminals in the product
