Low Voltage Directive 2006/95/EC, Machinery Directive 2006/42/EC and EMC Directive 2004/108/EC.
Positive contact opening in conformity with standards:
IEC 60947-5-1, EN 60947-5-1.

Installation for safety applications:
Use only switches marked with the symbol $\Theta$ aside the product code. Always connect the safety circuit to the NC contacts (normally closed contacts: 11-12, $21-22$ or 31-32) as stated in standard EN 60947-5-1, encl. K, par. 2. Actuate the switch at least up to the positive opening travel shown in the travel diagrams on page 240 . Operate the switch at least with the positive opening force, indicated between brackets below each article, aside the minimum force value.
§ If not expressly indicated in this chapter, for correct installation and utilization of all articles see chapter utilization requirements from page 235 to page 246.
