

Isolated DC/DC Converter

Description:

VLA106-24242 is a DC-DC converter. Its output power is 2.4W and the input is isolated from the output. The over-current protection circuit is built-in. This device is used for on-board power supplies in industrial control equipment.

Features:

- Input Voltage Range: 21.6 to 26.4V DC
- Output: +24V, 100mA (Output Power: 2.4W)
- Thin Profile, Lightweight Design
- Electrical Isolation Voltage Between Input and Output: 2500 V_{rms} for 1 Minute
- Built in Over-current Protection Circuit

Application:

On-board power supplies such as industrial equipment and control equipment.
