

Digital Voltage Monitor Single & Three Phase 200 to 240VAC, Single Phase 200 to 600VAC, Three Phase

R-K # DPM-sup-instal-0713

Purpose

The purpose of the DPM is to monitor the line voltage supplying single and three phase systems, providing the opportunity to disconnect equipment if the voltages are outside of the selectable operational parameters.

Operation

If the voltages and rotation are within the selectable set-up parameters, the DPM will energize the internal relays, transferring the output contacts. If the voltages and/or rotation are outside any of the set-up parameters, the DPM internal relays will not energized.

If the line voltage does not meet all of the set-up parameters, the Default screen will toggle between the voltage screen showing the actual voltages and words describing the fault.

During transitions to relays energized or relays de-energized, the remaining time in seconds is displayed above the present relay condition ("ON" or "off"). **General Operational Specifications**

Line Voltages Monitored: 200 to 240VAC, 1Ø, 50/60Hz				
	200 to 600VAC, 3Ø, 50/60Hz			
Faults:	Overvoltage			
	Undervoltage			
	Phase Loss			
	Phase Rotation			
	Phase Imbalance			
	Frequency Out of Range			
Set-Up:	Membrane Buttons & Digital Display			
	Nominal Line Voltage			
	 Over/Undervoltage percentage (7% to 15%) 			
	 Trip Time Delay (2 seconds to 10 seconds) 			
	Re-Start Time Delay (Manual Reset to 4 minutes)			
	Phase Imbalance Percentage (3% to 10%)			
Screens:	Manufacture Name and Firmware Version			
	Average Voltage, Frequency, Imbalance, Relay Status			
	A-B, B-C & C-A Voltages, Relay Status			
	Nominal Voltage Selection			
	(Pay attention to 1Ø and 3Ø at the end of the voltages)			
	Over/Undervoltage Percentage Selection			
	Trip Time Delay			
	Re-Start Time Delay			
	Phase Imbalance Percentage Selection			
	History with Last 4 Faults			
	(Wraps back to Manufacture Name and Firmware Version)			
	(whap's back to manufacture manie and rinnwale version)			

Default Set-Up

The default set-up for the DPM as shipped from R-K Electronics is:Line Voltage:480VAC, 3ØOver & Undervoltage:±5%Trip Time Delay:5 secondsRe-Start Time Delay:5 secondsPhase Imbalance:5%

Custom Set-Up

The DPM uses 4 membrane buttons to allow the customer to change the set-up criteria for their particular line voltage and preferred parameters. The following listings show the arrangement and selections available by moving through the menu choices. The membrane buttons allow for movement right or left with wrap around to selection criteria and up and down within a selection for specific parameters.

You can select the set-up parameters with only the supply voltage connected.

Example: From the Default screen (A-B, B-C & C-A voltages with relay status) pressing the right Arrow will take you to the line voltage selection parameters. If you want to change the nominal voltage to a different voltage, press the Up or Down arrows. Once you have the line voltage (and number of phases) that you want displayed on the screen:

- 1. Pressing either the Right or Left arrow will set the new line voltage parameter into memory and take you to the next screen, or
- 2. After 30 seconds of no action, the new voltage parameter will be set into memory and the screen will go back to the default screen.

Example: If you want to change the Re-Start Delay to 3 minutes (default is 2 minutes) and you are on the Default screen:

- 1. Press the Right arrow until you get to the Re-Start Delay screen
- 2. Press the Up button until you have 3 Minutes on the screen
- 3. Pressing either the Right or Left arrow will set the new Re-Start Delay into memory and take you to the next screen, or
- 4. After 30 seconds of no action, the new Re-Start Delay will be set into memory and the screen will go back to the Default screen.

Screens

Manufacturer's Screen R-K Electronics DPM v0.0.00

Average Voltage Screen

VAvg Imb Hz 460 0 60 off

Default –

The Default screen shows the real time voltage detected on each of the 3 phases: A-B B-C C-A 460 459 461 ON

Voltage Selection Screen (Vertical Format)

200, 1Ø; 208, 1Ø; 220, 1Ø; 230, 1Ø; 240, 1Ø; 200, 3Ø; 208, 3Ø; 220, 3Ø; 230, 3Ø; 240, 3Ø; 380, 3Ø; 415, 3Ø; 440, 3Ø; 460, 3Ø; 480, 3Ø; 575, 3Ø; 600, 3Ø;

Over/Undervolage Percentage Screen (Vertical Format)

7%, 8%, 9%, 10%, 11%, 12%, 13%, 14% & 15%

Trip Time Delay Screen (Vertical Format)

2S, 3S, 4S, 5S, 6S, 27S, 8S, 9S & 10S

Re-Start Time Delay Screen (Vertical Format)

Manual, 2S, 3S, 4S, 5S, 6S, 7S, 8S, 9S,10S, 30S, 1M, 2M, 3M & 4M

Phase Imbalance Percentage Screen (Vertical Format)

3%, 4%, 5%, 6%, 7%, 8%, 9% & 10%

Fault Screen (Vertical Format)

"0" most recent fault, "1" previous fault, "2" third oldest fault & "3" fourth oldest fault

Fault words:

"Phase A Loss"	(There is no voltage sensed on 3-L1/S)	
"Voltage Low"	(Average line voltage is less than selected Undervoltage percentage)	
"Voltage High"	(Average line voltage is more than selected Overvoltage percentage)	
"Imbalance"	(One Phase is lower than the average voltage by more than	
	the Imbalance percentage)	
"Phase Loss"	(One phase is more than 30% below the Line Voltage selection)	
"Bad Rotation"	(The phase rotation sequence is reversed)	
"Bad Freq"	Line frequency out of allowable range of 45 to 65Hz)	

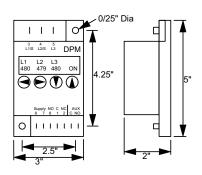

DPM with tabs (cover shows DPM with blocks)

Specifications

specifications			
Supply Voltage:	24VAC, 120VAC or 208/240VAC, 1Ø		
Part Number:	Tabs:	Pluggable Blocks	
12 VDC Supply:	DPM-12D-T	DPM-12D-B	
24 VDC Supply:	DPM-24D-T	DPM-24D-B	
24 VAC Supply:	DPM-24A-T	DPM-24A-B	
120 VAC Supply:	DPM-120A-T	DPM-120A-B	
240 VAC Supply:	DPM-240A-T	DPM-240A-B	
Display:	16 Character, 2 line; Back Lighting		
Voltage Accuracy:	Approx ±1%		
Buttons:	(4) Right & Left, Up & Down		
Line Voltage Ranges:	200 to 240VAC, 1Ø		
	200 to 600VAC, 3Ø		
Frequency Range:	45 to 65Hertz for all voltages		
Over & Undervoltage:	8% to 15%		
Phase Imbalance:	3% to 10%		
Phase Loss:	≥30% low voltage in any one phase		
Phase Rotation:	A-B-C		
Re-Start Time Delay:	1 second to 4 minutes		
	Manual Reset Option		
Trip Time Delay:	1 second to 30 se	econds	
Output:	SPDT Contact, 10A @ 120VAC		
	1NO Contact, 6A @ 240VAC		
Termination:	Tabs: Control Vol	tage: 0.187" Push-On tabs	
	Three Phase Volt	-	
Packaging:	Approx. 3"W x 5"	-
