N-Tron[®] Networking Series

▶▶▶ Industrial Managed Gigabit PoE+ IP67 Switch

Red Lion's N-Tron[®] series NT24k[®]-16M12-POE IP67 managed Gigabit Ethernet switch provides a rugged, dust proof and water resistant enclosure with sixteen 10/100/1000Base-T(X) M12 X-coded ports to create a reliable and secure network capable of delivering up to 30 Watts of power per port to connected PoE capable devices.

The versatile NT24k-16M12-POE managed switch features 16 M12 X-Code Gigabit copper ports and is housed in a dust proof and water resistant IP67-rated enclosure with redundant 22-49 VDC power inputs. Designed to handle the most demanding environments, the NT24k-16M12-POE offers wire-speed throughput, high shock and vibration tolerance and a wide -40° to 80°C operating temperature range. Rugged, reliable and easy to use, the NT24k-16M12-POE switch offers a 240 Watt PoE budget that can be allocated to any of its 16 ports, up to 30 Watts per port. IGMP auto-configuration, IEEE 802.1x with RADIUS remote server authentication and N-Ring™ fast healing ring technology ensure quick deployment and robust secure network communications. The NT24k-16M12-POE is designed to provide reliable operation in railway and other industrial applications subject to shock, vibration and other extreme conditions. Models with bypass relay ports enable data to continue to flow even in the event of a power outage, making this an ideal choice for rail applications.
