## Single Key (M12) TPE Micro-Link™ Cable Assemblies

*Check up to five results to perform an action.*

### Micro-Link™ Interconnects, Cable Assemblies & Receptacles.

Remke's family of Micro-Link (M12) Industrial Interconnects and cordsets includes :

- ε Offering all Micro-Link connectors in four different materials - PVC, PUR, TPE and rubber - to protect against numerous environmental and temperature concerns.
- ε A Shielded Connector that features a 360° aluminum mylar foil shield to minimize electrical interference that tends to disrupt the signal to the control device.

Micro-Link interconnects have been designed for low amperage AC or DC control systems and are compatible with the pin configurations used by major U.S. and European sensor manufacturers.

The Micro-Link family of connectors, cable assemblies and receptacles allow fast and easy replacement of 12mm to 18mm sensors, switches and control components.

These connectors also :

- ε Provide NEMA 6P and IP 68 protection for enhanced moisture resistance
- ε Feature factory molded-to-the-cable construction for durability
- ε Mechanically keyed to eliminate mismatching
- ε Available in 2-6 pole male and female plugs, straight or 90° configurations, single or dual keyway design with optional LED's and cable with or without braiding.

Another important design feature of Remke's Micro-Link Connector are the 'Ribs' - which are molded into the exterior housing to increase the grip-surface thus reducing the chance for slip-off's or the need for disconnection tools. This design feature reduces maintenance and replacement costs.

These connectors are a UL Recognized Component and are ROHS Compliant.
