SmartStruxure Lite solution

SE8300 Room Controller

Low Voltage Fan Coil Controller and Zone Controller

Application specific controller with customizable covers and screen colours. The SE8300 is a low voltage fan coil terminal equipment controller suitable for commercial and high end hospitality markets. It can also be used as a zone controller.

SE8300 Room Controller Features

The perfect balance between simplicity and sophistication. Select from a wide variety of casings, fascias, and configurable screen colours to match decor. Display your own logo and custom messages on screen to reinforce your brand and provide a more enjoyable occupant experience.

Introduction

Smart energy management has never been easier than with the SE8300 series Fan Coil Room Controllers. Designed for new construction and retrofit projects, the Room Controllers dramatically decrease project delivery costs by reducing installation, configuration and commissioning time. No complex software or tools are required to customize functionality in order to meet your applications requirements. The Room Controllers provide all the advanced features and monitoring functions required by modern building automation systems in a simple compact enclosure.

Application specific and programmable

The SE8300 Room Controllers are both application-specific AND programmable. This enables the modification of pre-configured control sequences, or the creation of entirely new control sequences for HVAC, lighting and other applications. The Room Controllers are specifically designed to provide exceptional temperature control of multi-speed Fan Coil units. When compared to traditional building automation controllers, the SE8300 series Fan Coil Room Controllers provide unmatched return on investment.

Touch screen with customizable user experience

The touch screen of the SE8300 offers a customizable user experience with selection of languages, temperature scales, buttons, and screen colours. It also supports the upload of an image or logo that becomes the default standby screen of the device. Custom messages can also be displayed on-screen using BACnet® objects when the SE8300 is integrated to a BACnet system.

Selectable languages

Select from the following 20 languages: English, French, Spanish, Chinese, Russian, Arabic, Czech, Danish, Dutch, Finnish, German, Hungarian, Indonesian, Italian, Norwegian, Polish, Portuguese, Slovak, Swedish and Turkish.

Optional passive infrared motion sensor

All models can be equipped with a discrete optional Passive Infrared (PIR) motion sensor. With the embedded sensor, the SE8300 uses advanced occupancy routines to generate automatic energy savings during occupied and unoccupied periods without sacrificing occupant comfort.

AT A GLANCE

Custom design

- Touch screen interface
- 2 casing options
- Multiple fascia options
- 5 selectable screen colors
- Supports the upload of a custom standby screen
- Supports the display of custom messages when integrated to a BACnet system
- English, French, Spanish, Chinese, Russian and other selectable languages
- Interchange between °C/°F
- Advanced scheduling functions

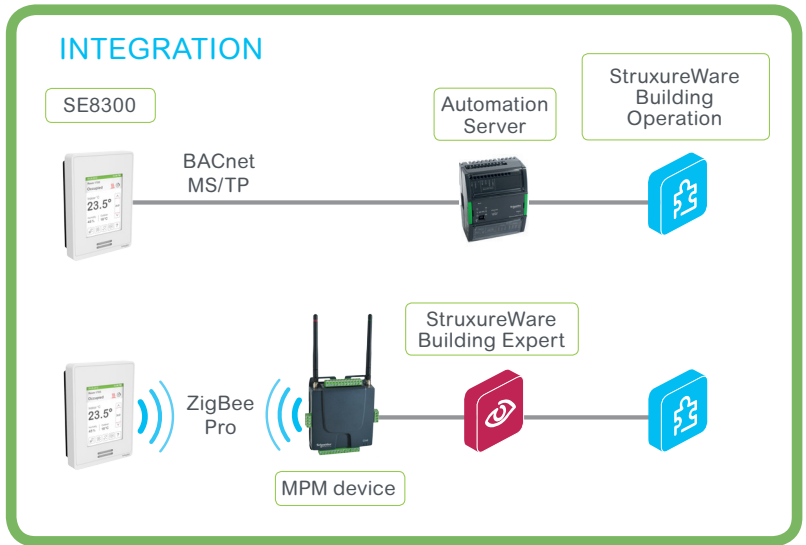

Options and accessories

- On-board optional occupancy sensor (optional)
- RH sensor with dehumidification control (optional)
- Can be used with ZigBee Pro wireless sensors
- ZigBee Pro communication module
- CO₂ sensor communication module
- Can be used with SC1300/SC2300 relay for mixed voltage applications

SE8300 Room Controller Features

Product Highlights

- Suitable for both commercial and hospitality markets and systems
- Customizable colour digital touch screen interface with multi-language support
- Fully programmable control sequences using scripting
- On board configuration interface utility
- Configurable fan sequence of operation
- Configurable Scheduler.
- Change of value (COV) function for BMS integration.
- Humidity sensor with on-board dehumidification strategy (model dependent)
- Optional occupancy sensor
- Advanced occupancy and scheduling functions for commercial and lodging applications
- Optional wireless door and window switches (with optional ZigBee Pro® card) available

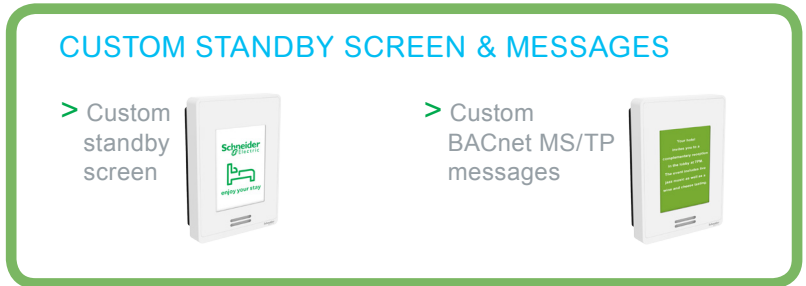

Supported Networking Protocols

- BACnet MS/TP (B) (selectable)
- Modbus (B) (selectable)
- ZigBee Pro wireless mesh network (P) (optional)

Integration to Schneider Electric Systems

- SE8300 can be integrated to SmartStruxure™ Lite, SmartStruxure, and other Schneider Electric systems.
- Wireless integration to MPM devices (P)
- Wireless integration to BACnet IP, oBIX and EWS via MPM devices (P)
- Direct wired integration to BACnet MS/TP (B)
- Direct wired integration to Modbus (B)

Architects can custom match styling to decor

- Select from 2 casings and multiple fascias
- Five screen colors are also selectable through the interface

> 5 configurable screen color schemes

> Multiple fascias

- Silver finish
- White
- Glossy white
- Light tan wood
- Dark brown wood
- Dark black wood
- Brushed steel finish

> 2 casings

White

Silver

SE8300 Room Controller Features

Programming the SE8300 with Lua

The SE8300 controllers are programmable using the open programming language Lua. Although building management systems often use open protocols and standards, their Program BACnet objects and scripting features remain proprietary and incompatible with third party devices. The SE8300's use of an open language enables operability with all systems.

Programming with BMS Integration

When integrated into a BACnet MS/TP building management system, the SE8300 offers 10 Program BACnet objects able to contain 480 characters each. No special software, license or tool is required.

- BACnet MS/TP integration into BMS
- 10 Program BACnet objects (Lua scripts)
- Each object can contain maximum of 480 characters

Programming without Integration

When there is no BACnet MS/TP integration, a Lua script can be uploaded directly into the SE8300 unit using the Uploader SE8000 tool. Unlike the 10 PG objects used when the unit is integrated via BACnet MS/TP, there is only one script, which can contain up to 16KB.

- No BACnet MS/TP integration
- 1 Lua script of 16KB max.
- Uploader SE8000: upload scripts using this PC software tool and a USB/Micro-USB cable

Applications: HVAC and Beyond

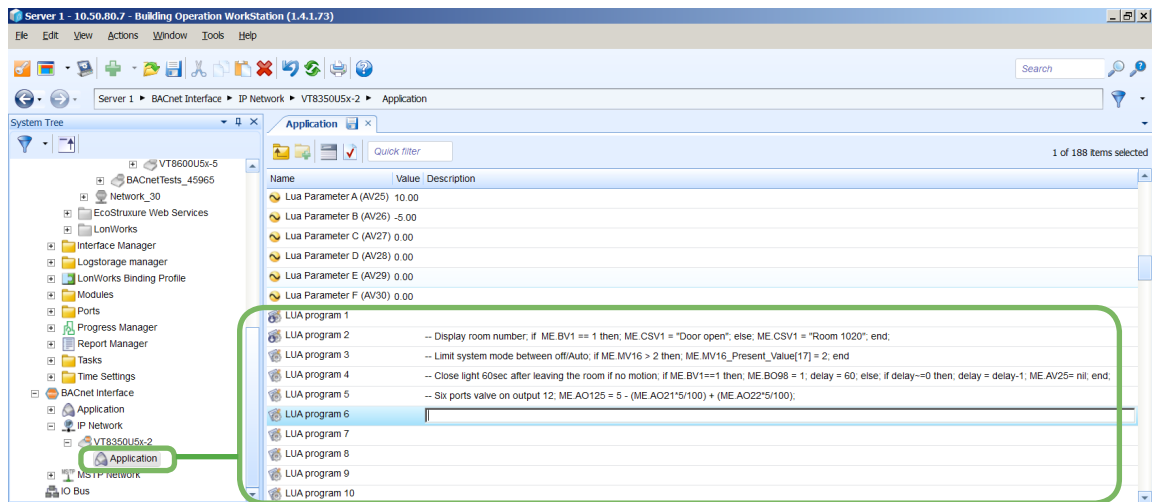

Programming can be used to go beyond the pre-configured control sequences of the SE8300 to create customized HVAC applications. It can also be used to comply with specific project requirements and manage other applications, such as lighting and other equipment.

Using Lua scripts also enables you to take advantage of the extra inputs and outputs of the SE8300 to manage other devices, such as sensors and relays.

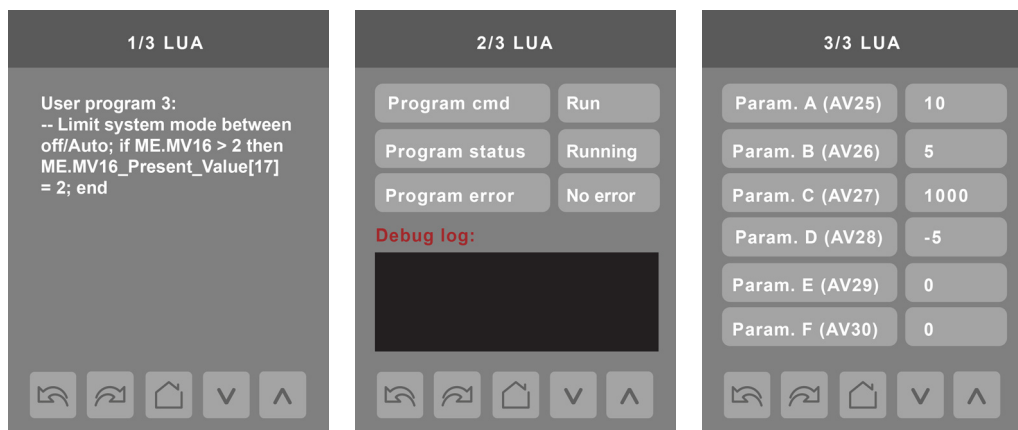

Uploader SE8000

Lua scripts, standby screen images and firmware upgrades can be loaded into the SE8300 using the Uploader SE8000 tool and a USB/Micro-USB cable.

> PG objects of the SE8300 viewed through a BMS

> PG objects of the SE8300 viewed through its touch-screen display

SE8300 Room Controller Features

Mixed-Voltage Applications SC1300/SC2300

The SE8300 can be used for mixed-voltage applications by incorporating a SC1300 (110/130 V) or SC2300 (220/240 V) mixed-voltage relay. For SC1300/SC2300 relay pack features, consult the SC1300/SC2300 specification sheet.

SE8300 as a Zone Controller

The SE8300 can also be used as a Zone Controller to control ON/OFF, floating, or 0 to 10 Vdc heating or cooling terminal equipment such as pressure dependent VAVs, Valves, and other end devices.

The following list shows common Zone Controller applications:

- Cooling only VVT zone with reheat
- Fin-tube radiators
- Cabinet heaters
- Radiant panel heaters
- Electric re-heat zones
- Terminal reheat

The above options are similar to those provided by the SE7200 series Room Controllers.

TYPICAL LOW VOLTAGE FAN COIL APPLICATION

Standard wired BACnet MS/TP communication and optional ZigBee Pro communication module upgrade

SE8300 Room Controller Specifications

Specifications

SE8300

Dimensions

12cm/4.72in (H) x 8.6cm/3.38in (W) x 2.5cm/1in (D)

Power Requirements

Input: 24VAC \pm 15%, 50/60Hz

Input: 24 - 28VAC 50/60Hz (with CO₂ sensor module)

Device consumption: up to 12 VA

Transformer maximum rating: 100 VA, 4.17 A

Output Ratings

Relay rating: 28 Vac 50/60Hz, 1.0 Amp., in-rush = 3.0 Amps; pins 1, 2, 3, 4, 5, 8, 9

Digital optomos output rating: 28 Vac 50/60Hz, 0.3 Amp., in-rush = 1.5 Amps; pins 9, 10, 11, 12

Analog: 0 - 10 Vdc in 2 kilo-ohm resistance minimum load (maximum 5 mA); pins 9, 10, 11, 12

Operating Conditions

0 °C to 50 °C (32 °F to 122 °F)

0% to 75% R.H. non-condensing

Storage Conditions

-30 °C to 50 °C (-22 °F to 122 °F)

0% to 75% R.H. non-condensing

Temperature Sensor

Local 10 K NTC type 2 thermistor

Temperature Sensor Resolution

\pm 0.1 °C (\pm 0.2 °F)

Temperature Control Accuracy

\pm 0.5 °C (\pm 0.9 °F) @ 21 °C (70 °F) typical calibrated

Humidity Sensor and Calibration

Single point calibrated bulk polymer type sensor

Humidity Sensor Precision

Reading range from 10-90 % R.H. non-condensing

10 to 20% precision: 10%

20% to 80% precision: 5%

80% to 90% precision: 10%

Humidity Sensor Stability

Less than 1.0 % yearly (typical drift)

Dehumidification Setpoint Range

30% to 95% R.H.

Occ, Stand-By and Unocc Cooling Setpoint Range

12.0 to 37.5 °C (54 to 100 °F)

Occ, Stand-By and Unocc Heating Setpoint Range

4.5 °C to 32 °C (40 °F to 90 °F)

Room and Outdoor Air Temperature Display Range

-40 °C to 50 °C (-40 °F to 122 °F)

Proportional Band for Room Temperature control

Cooling and Heating: Default: 1.8°C (3.2°F)

Analog Inputs

Modulating 0-10 VDC across UI19 to Common

Binary Inputs

Dry contact across terminals UI16, UI17 and UI19 to Common

Remote Temperature Sensor Requirements

10 K NTC type 2 thermistor

Wire Gauge

Power supply: 18 gauge or larger,

Communications: 24 gauge or larger

Approximate Shipping Weight

0.34 kg (0.75 lb)

THIS DEVICE COMPLIES WITH PART 15 OF THE FCC RULES. OPERATION IS SUBJECT TO THE FOLLOWING TWO CONDITIONS: (1) THIS DEVICE MAY NOT CAUSE HARMFUL INTERFERENCE, AND (2) THIS DEVICE MUST ACCEPT ANY INTERFERENCE RECEIVED, INCLUDING INTERFERENCE THAT MAY CAUSE UNDESIRABLE OPERATION.

Check with your local government for instruction on disposal of these products.

THIS PRODUCT FOR COMMERCIAL USE ONLY

Room Controller Input Power

Usage of the CO₂ sensor module within the Room Controller draws additional power. It is recommended when using the CO₂ sensor module, the site transformer be capable to accommodate the additional power consumption. Room Controller power consumption of 12 VA and input voltage range of 24 - 28 VAC is required.

Dimensions

* Note: SE8300 models shipped before September 17th 2014 have the following Output Ratings:

Optomox output: 30 AC/DC, 0.5 Amp. (above 25 °C, reduce by 5mA/°C)
 Analog: 0 - 10 Vdc in 2 kilo-ohm resistance minimum load (maximum 5 mA)

VCM8000V5045P Module Versions

All VCM8000 ZigBee Pro modules shipped after December 15, 2016 are Version 9 (V9) modules. The V9 module is required for the SE8300 Room Controller to activate functionality of the CO₂ Sensor Module. The SE8300 Room Controller must also be running Firmware version 1.5.1 to activate CO₂ Sensor Module functionality.
