

STP120/STP220/STP620

Water Temperature Sensor

STP120, STP220 and STP620 water temperature sensors are designed for fast applications, for example hot water generated by a plate heat exchanger. The STP120, STP220 and STP620 temperature sensors are intended for immersion mounting in pipe systems without requiring a pocket (well). The STP120 includes the Vista NTC 1.8 kohm element and the insert probe is made of stainless steel. The STP220 includes the NTC 10 kohm type 2 element for I/NET systems, whilst the STP620 includes the Satchwell NTC 5.02 kohm element. The sensors have a G1/2" (DN 15) male thread connection. The housing is equipped with a 20mm cable fitting. A 20mm cable gland is supplied.
