

# Advantages of the TDRPRO-5100 Series Time Delay Relays

SECTION 5

## **The Complete System Solution!**

The TDRPRO-5100 Series is a programmable multi-function, multi-voltage time delay relay with multiple time ranges for the ultimate in flexibility. The TDRPRO-5100 features thumb wheel adjustment for impeccable accuracy. The two indicator LEDs allow the user to know when power is present at the coil, output is energized or if the relay is performing one of its 10 timing functions.

\*See Application Data (p. 5/2-5/3) for Function Definition.

- Offers a “one stop solution” for your power management system.
- Several configurations available to meet your individual needs.
- Switching capabilities up to 12 amps.
- The broad timing range meets most timing requirements.
- The 12 to 240 VAC/VDC input voltage range enables this timer to work with all popular voltages.
- The two LED status indicators; indicate status at a glance. The green LED is on when power is applied to the input terminals. The red LED blinks during timeout and is on when the output is energized.
- The tamper proof dust cover retains the settings and keeps the dust out.
- The thumb wheel adjustment for function and timing ensures accuracy and eliminates mechanical deviation.
- Color and appearance designed to high visibility in all environments.
- Engineering availability allows for customized control system solutions.
