Magnecraft® Solid State Relays

SSRDIN

SPST-NO, 10 A to 45 A

SSRDIN Relay

Description

The SSRDIN relays offer a complete solid state package that is an energy-efficient, current switching alternative to standard electromechanical relays. Advantages include longer life cycles, less energy consumption, and reduced maintenance costs.

Feature	Benefit
Solid state circuitry	Involves no moving parts
Optically coupled circuit	Provides isolation between input and output circuits
Internal snubber	Helps protect the relay's internal circuit from high voltage transients
Internal heat sink	Provides factory tested thermal management
Integrated chassis ground	Simplifies system wiring
Fingersafe® terminals	Helps prevent an operator from touching live circuits
DIN and panel mounting	Increases functionality and ease of use and fits a variety of applications
