- Minimum Depth Indicator - Less Than $2.5^{\prime \prime}$ ( 60 mm ) of Space Required Behind the Panel
- Stackable Mounting Bracket Included for Easy Installation
- LCD: 4-1/2 Digit, 0.5" (12.7mm) High Display with Optional Negative Image, Bright Red Backlighting
- LED: 4-1/2 Digit, 0.4" (10.2mm) High Display
- Limited Range Display Scaling
- Standard Screw Terminals for Easy Installation
- Six Current Ranges: $200 \mu \mathrm{~A}, 2 \mathrm{~mA}, 20 \mathrm{~mA}, 200 \mathrm{~mA}, 2 \mathrm{~A}, 5 \mathrm{~A}$
- LCD: 85-250VAC or 9-32VDC Power Supply

LED: 85-250VAC Power Supply

Simpson's Mini-Max Voltage Indicators provide high quality, accuracy and reliability in a compact, 60mm deep case.

LCD (Liquid Crystal Display) Units offer a 4-1/2 digit, 0.5" (12.7mm) LCD display with an optional bright red, negative image, backlight.

LED (Light Emitting Diode) Units offer a 4-1/2 digit, 0.4" (10.2mm) display.

All units feature user-selectable decimal point, auto zero and limited scaling capabilities.

A unique mounting bracket is provided to allow for vertical or horizontal stacking of multiple indicators. All Mini-Max units feature a 3/64 DIN, high-impact plastic case. The LCD units have a clear viewing window and the LED units have a red viewing window.

## Installation and Panel Cutout

## Mounting Requirements

Insert the Mini-Max through the panel, and then slide the mounting bracket onto the Mini-Max. The mounting bracket allows Mini-Max units to be stacked side-to-side or top-to-bottom and to maintain the DIN standard panel arrangements in 24 mm by 72 mm multiples. Panel cutout instructions for stacking multiple units are provided under "stacking features."

DISPLAY
Type: 7 -segment LCD or LED
Height: LCD 0.5 " ( 12.7 mm )
LED $0.4^{\prime \prime}$ ( 10.2 mm )
Decimal point: 4-position selectable
Overrange indication:
LCD Most significant digit = " 1 "
LED Blinking display
LCD Backlighting: Optional negative image, red backlight

Polarity: Auto with "-" indication, " + " implied
POWER REQUIREMENTS
AC Volt: 85-250VAC @40-440Hz
DC Volt: 9-32VDC (LCD version only)

Power Consumption: (Non Fused)
85-250VAC: LCD 4.0VA (2.4W) max
LED 3.6VA (2.16W) max
9-32VDC: LCD 3W max

## NOISE REJECTION

CMRR: 86dB typical

ACCURACY @ $25^{\circ} \mathrm{C}$
LCD $\pm(0.5 \%$ of reading +50 count) ( $50 \mathrm{~Hz}-2 \mathrm{KHz}$ )
LED $\pm(0.5 \%$ of reading +10 count) $(50 \mathrm{~Hz}-5 \mathrm{KHz})$

ENVIRONMENTAL
Operating Temperature: 0 to $55^{\circ} \mathrm{C}$
Storage Temperature: -10 to $60^{\circ} \mathrm{C}$
Relative Humidity: 0 to $85 \%$ non condensing @ $40^{\circ} \mathrm{C}$
Temperature Coefficient:
( $0.2 \%$ of reading $\pm 0.5$ digits) / ${ }^{\circ} \mathrm{C}$
Warmup time: Less than 20 minutes

ANALOG TO DIGITAL CONVERSION
Technique: Integrating dual slope
Rate: 3 samples/second-typical

## MECHANICAL

Bezel: 0.95 " $\times 2.84^{\prime \prime}$ ( $24 \mathrm{~mm} \times 72 \mathrm{~mm}$ )
Depth: 2.36" (60mm)
Panel cutout: $0.88^{\prime \prime} \times 2.68^{\prime \prime}$
( $22.2 \mathrm{~mm} \times 68 \mathrm{~mm}$ )
Weight: LCD 3.5 oz (99.2g)
LED $2.60 z(74 \mathrm{~g})$

## Case Material:

94-0,UL-rated glass-filled thermoplastic

Isolation: 250Vrms

| :--- | :---: | :---: | :---: | :---: | :---: |
| Range | Resolution | Voltage | Max Input | Voltage | Max Input |
|  | M245 | Drop | Unfused | Drop | Unfused |
| 200 uA | 10 nA | 200 mVdc | 10 mA | 200 mVdc | 6 mA |
| 2 mA | 100 nA | 200 mVdc | 40 mA | 200 mVdc | 20 mA |
| 20 mA | 1 uA | 200 mVdc | 100 mA | 200 mVdc | 60 mA |
| 200 mA | 10 uA | 200 mVdc | 400 mA | 200 mVdc | 300 mA |
| 2 A | 100 uA | 200 mVdc | 3 A | 200 mVdc | 2.6 A |
| 5 A | 1 mA | 50 mVdc | 6 A | 100 mVdc | 6 A |

Connections

Using a screwdriver or thumbnail, spread the tabs on each side of the case to unlock the top half. Lift the rear of the top half and slide it away from the front of the meter.

## Scale Adjustment:

Mini-Max indicators have limited range coarse and fine adjustments for display scaling. There are no optional connections required for these to function. The meter can be scaled down to $1 / 2$ the value of the input, or scaled up to 1 times the value of the input, or a maximum reading of 1.9999, whichever is lower.

## LCD VERSIONS

## Scale Adjustment:

The "Coarse" adjustment R12 will allow a limited range of scaling values. The
"Fine" adjustment R9 allows for an adjustment range of approximately $1 \%$ of the
"Coarse" adjustment. Apply the full scale input to the meter. Adjust R12 to be within $1 \%$ of the desired result. Then use R9 to obtain the final desired result.

## LED VERSIONS

Scale Adustment:
The "Coarse" adjustment RV1 will allow a limited range of scaling values. The
"Fine" adjustment RV2 allows for an adjustment range of approximately $1 \%$ of the "Coarse" adjustment. Apply the full scale input to the meter. Adjust RV1 to be within $1 \%$ of the desired result. Then use RV2 to obtain the final desired result.

Note: Any physical damage to the meter during adjustment will void the warranty.

Note: Any physical damage to the meter during adjustment will void the warranty.

## - Stacking Features

The mounting brackets, included with every Mini-Max, can be connected together. Multiple units can be mounted in a single opening, allowing perfect alignment.

To punch one hole for multiple units, be sure to adjust the standard panel cutout dimensions as shown here; otherwise the meters will not fit properly in the hole.

Mounting multiple units is quick and easy. Install the first meter (bottom unit first if stacking vertically). Position the next mounting bracket snugly against the first one, and slide the second meter into place. Repeat for remaining units.

Horizontal

Standard cutout

## Application Example

A company needs to monitor the power supply voltage (120VAC), load current (50 amps), and frequency $(60 \mathrm{~Hz})$ of an AC motor.

Voltage: A Mini-Max 200 Volt AC meter is installed in parallel with the power supply.

Current: A Mini-Max 5 Amp AC meter is attached to a 50:5 amp Donut Current Transformer. The meter must be scaled to display 50.00 when 5 amps are applied. R9 and R12 (LCD), RV1 and RV2 (LED) are adjusted until the correct value is displayed. The meter is connected to the donut, and the $A C$ line is fed through the donut.

Frequency: A Mini-Max 200 Hz Frequency
meter is installed in parallel with the power supply. The wiring for the volt meter can be split to to the frequency meter as long as the voltage will not exceed 750 volts AC. [Note: Frequency Meter is available in model M235 LCD only.]

## Safety Symbols

The WARNING sign denotes a hazard. It calls attention to a procedure, practice, or the like, which if not correctly performed or adhered to, could result in persona injury.

The CAUTION sign denotes a hazard. It calls attention to an operating procedure, practice, or the like, which if not correctly adhered to, could result in damage to or destruction of part or all of the instrument.

Accessories

Donut Current Transformers enable the Mini-Max to monitor AC current up to 5000 amps. The Donut (also known as a "Toroid") is placed around one of the legs of the device being monitored and emits up to a 5 amp signal. The MiniMax can be scaled to accurately display the current being monitored. Each Donut comes with 2' long secondary leads.
Ordering Information

| Range/Amps | Cat. |  |
| :---: | :---: | :---: |
| Pri | Sec | No. |
| 50 | 5 | 01293 |
