

FUSERBLOC

Front/side-control fuse combination switches
for industrial fuses up to 1250 A

Fuse protection

Function

The **front/right-side FUSERBLOC** is a manually operated multi-pole fuse load break switch. They make and break on load and provide safety isolation and protection against overcurrent for any low voltage electrical circuit.

This range includes both direct and external-control models, with 2, 3 and 4 poles and from 25 to 1250 A.

Advantages

Improved safety

- Complete isolation of the fuse with double breaking per pole (top and bottom of fuse).
- Positive break indication

High breaking capacity

Protection against overloads and short-circuits thanks to high breaking capacity fuses (100 kA rms).

Multi-use

A single device can be operated with a handle, either mounted directly on the unit itself or externally, on the door or on the side of an electrical enclosure or cabinet.

Specific functionalities for simplified use

- TEST position for front/side-control devices up to 400 A allows control circuits to be tested without switching power, thanks to the use of U-type auxiliary contacts. In the TEST position, the cabinet door can be opened.
- Mechanical or electronic fuse blown detection system (see DDMM or FMD).

What you need to know

- In addition to the FUSERBLOC rating, product selection also depends on the fuse characteristics and functional specifications, which need to be in accordance with the application. SOCOMEC FUSERBLOC devices are equipped with **NFC/DIN fuses** (for BS fuses, please contact us)

- FUSERBLOC fuse combination switch
- Handle for external front and side control
- U-type auxiliary contacts (pre-break and position signalling)
- Auxiliary power contacts (position signalling)
- Mechanical fuse melting detection device (DDMM)
- Upstream and downstream terminal shrouds
- Integrated solid neutral link
- Electronic fuse melting detection (FMD) makes it possible to have an automatic supervision or management system. Compatible with BS88, DIN and UL fuses
 - Visual LED signalling
 - Bi-stable relay for automation devices: alarm, tripping, etc.
 - TEST button: test the device is working properly at any time
 - Mounting plate or DIN rail, on door or directly on the FUSERBLOC
- Direct control box.

- Whether it is 3-pole + switched neutral or 3-pole + solid neutral, the 25 to 32 A FUSERBLOC with **direct** and **external** control is the best compact solution.

- For ratings 25 to 400 A, the **flat mounting kit** provides a compact solution ideally suited to plug-in units.
- Maintaining outputs from the DC common bus.
