TeSys Control Solutions

TeSys offers solutions for a variety of common control applications, including small to large loads, motor and non-motor loads, in various forms to meet customers specific needs. Basic solutions offer traditional approaches that meet compact, cost-effective, and large HP applications. TeSys also equips OEMs and System Integrators with EcoStruxure Machine connected product solutions that are IoT ready offers to help enhance the intelligence of machinery and equipment, helping to recognize and address potential issues before stoppage and decrease unplanned downtime.

Traditional Control

Table 18.1: Solutions that enhance machine intelligence

	Solution 1 — TeSys island as group motor	Solution 2 — TeSys island with individual protection	Solution 3 — TeSys U (Type E self-protected) using Multi-function trip unit & communication module or using pre-trip alarm function module	Solution 4 — TeSys T overload relay	Solution 5 — TeSys GV4PB, GV5PB, GV6PB with SDx Module
					
Best Practice Scenario	Ideal for panels with multiple loads . Single bus coupler serves as connection to PLC, manages logic and configuration for starters.	Ideal for panels with multiple loads . Single bus coupler serves as connection to PLC, manages logic and configuration for starters.	Ideal for panels with one or two motors . Each starter communicates directly to PLC.	Ideal for larger HP . Each overload relay communicates directly to PLC.	Ideal for adding intelligence using a simple NO/NC pre-trip alarm contact — Use of PLC to receive/interpret data not required.
Benefits	See load, device and system performance. Set alarms to anticipate maintenance and optimize performance.	See load, device and system performance. Set alarms to anticipate maintenance and optimize performance.	See load performance. Set alarms to anticipate maintenance and optimize performance.	See load performance. Set alarms to anticipate maintenance and optimize performance.	Pre-trip alarm NO/NC contact alerts prior to trip, enabling proactive actions to minimize downtime or alert operators
Circuit Protection	Circuit breaker or fuse protection group	Circuit breaker or fuse	TeSys U (applied as Type E self protected), using advanced trip unit/function modules	Breaker or fuse	GV4PB, GV5PB, GV6PB
Motor Control	TeSys island load management system with or without TeSys GV	TeSys island load management system		TeSys D or F contactors	TeSys D or F
Motor Overload Protection				TeSys T overload relay	(included in GV*PB)
Load Types	Motor, resistive/non-inductive, isolation	Motor, resistive/non-inductive, isolation	Motor loads only	Motor loads only	Motor loads only
Max HP 480V	40 HP	40 HP	20 HP	500 HP (up to 810 amps)	450 HP (up to 520 amps)
SCCR	basic 5 kA up to high 50 kA (with GV)	high, to 100 kA	High, to 65 kA	Depends on configuration	Depends on configuration
Available data	Device status/performance Load performance including alarms Voltage, Energy & Power	Device status/performance Load performance including alarms Voltage, Energy & Power	Load performance including alarms	Load performance including alarms Voltage & Power	Pre-trip alarm (via NO/NC contact)
Communication	Ethernet IP, Modbus TCP, Profinet, Profibus	Ethernet IP, Modbus TCP, Profinet, Profibus	Modbus™, CANopen, DeviceNet™, Profibus™	Modbus™, CANopen, DeviceNet™, Profibus™, Ethernet/IP, and Modbus/TCP	None

Table 18.2: Basic — Traditional motor control solution

	Solution 1 — Two component solution (TeSys GV + D)		Solution 2 — Single component solution	Solution 3 — Group Motor solution	Solution 5 — Three component solution (Breaker/ fuse, contactor & overload relay)	Solution 6 — Type D solution (Motor circuit protector, contactor & overload relay)	Solution 7 — Non-motor load solution (Breaker/fuse + contactor)	
	Type F — up to 65 amps	Motor Protective Circuit Breakers + contactor - up to 520 amps	Type E — up to 32 amps	up to 65 amps				
								
Best Practice Scenario	Most cost effective, high SCCR solution		Most compact, also ideal for critical uptime applications (resetable after a short-circuit with no component replacement), high SCCR solution	Few components, 480V delta rated	3-component solution, ideal for higher HPs or high SCCR	ideal for pumping applications, includes adjustable motor inrush sensitivity	ideal for non-motor loads	
Benefits	Simple, 2-component solution, cost effective, fast power wiring using bus bars	Simple, 2-component solution, cost effective for larger HP motors	Single component solution, Type 2 rated (minimize downtime after short-circuit)	cost effective solution ideal for panels with many motor loads (single breaker for multiple starters)	basic solution, ideal for 480V delta applications, resetable after breaker trip	adjustable motor inrush sensitivity, ideal for pumping applications	ideal for non-motor loads	
Circuit Protection	TeSys GV2P, GV3P (applied as Type F with contactor)	TeSys GV4PB, GV5PB, GV6PB (UL 489)	TeSys U, with basic trip unit	PowerPact or Multi9 (UL 489) or fuses	PowerPact or Multi9 (UL 489) or TeSys DF, LS1 fuseholder, GS disconnect with fuses	TeSys BV4 (UL 489)	PowerPact or Multi9 (UL 489) or TeSys DF, LS1 fuseholder, GS disconnect with fuses	
Motor Control	Tesys D	TeSys D or F		TeSys D	TeSys D or F	TeSys D	TeSys D or F	
Motor Overload Protection	(included in GV)	(included in GV)		TeSys GV2ME	LR thermal or LR9 electronic	LR thermal or LR9 electronic	—	
Load Types	Motor loads only	Motor loads only	Motor loads only	Motor loads only	Motor loads only	Motor loads only	Resistive/non-inductive, isolation

Two-Component Motor Circuit Solutions to 520 Amps

Simplify design, panel space and installation with TeSys high SCCR solution that use only two components that make up an entire branch circuit up to 520 amps. These two-component solutions are UL compliant using either a Type F combination motor controller rating or a UL 489 rating. For additional solutions and ratings, see Motor Control Solutions for North America data bulletin 8536DB0901.

18 CONTACTORS AND STARTERS-IEC

[1] Add coil suffix to complete reference part number (See Table 18.24 TeSys D Coil Voltage Codes , page 18-11 for LC1D and Table 18.30 TeSys F Coil Voltage Codes, page 18-14 for LC1F). For example, an LC1D09G7 includes a 120 Vac coil.
 [2] Motor Full Load Amp Sizes are based on NEC Table 430.250.
 [3] Requires use of GV1G09 or GV2GH7 line spacer for Type F rating. SCCR is 100 kA at 480Y with or without use of GV2G busbar links.
 [4] Requires use of GV1G09 or GV2GH7 line spacer for Type F rating. SCCR is 42 kA at 480Y when using GV2G busbar links.
 [5] Requires use of GV3G66 line spacer and GVAM11 short-circuit signaling contact for Type F rating.
 [6] Max wire size of 3/0 AWG for 65kA 480 V SCCR.
 [7] 100kA SCCR with fuses. See Motor Control Solutions for North America data bulletin 8536DB0901 for more information.

Island Concept

TeSys island is an innovative digital load management solution—providing data for higher machine efficiency and ease of servicing, and allowing faster time to market.

TeSys island is a modular, multifunctional system providing integrated functions inside an automation architecture, primarily for the direct control and management of low-voltage loads. TeSys island can switch, help protect, and manage motors and other electrical loads up to 40 hp, 80 A installed in an electrical control Panel.

This system is designed around the concept of TeSys™ avatars.

These avatars:

- are the functional object representing a logical function of the physical module with pre-defined logic
- determine the configuration of the island.

The logical aspects of the island are managed with software tools, covering all phases of product and application lifecycle: design, engineering, commissioning, operation, and maintenance.

1	Bus Coupler	5	Power interface module
2	Analog I/O module	6	Standard Starter
3	Digital I/O module	7	SIL Starter
4	Voltage interface module	9	SIL interface module

The physical island consists of a set of devices installed on a single DIN rail controlling loads, monitoring data, diagnostics information and connected together with a ribbon cable providing the internal communication between modules.

The external communication with the automation environment is made via a single coupler module, and the island is seen as a single node on the network. The other modules include starters, power interface modules, analog and digital I/O modules, voltage interface modules, and SIL interface modules, covering a wide range of operational functions.

Product References

The TeSys island load management system consists of a bus coupler along with other starters and modules as needed to build an “island” of load management, monitoring & control functions. It is recommended to use the online EcoStruxure Motor Control Configurator to ensure proper application and sizing.

Scan here to access our online EcoStruxure Motor Control Configurator

TeSys D replacement coils: [page 18-40](#)
TeSys D dimensions: [page 18-42](#) to [page 18-52](#)

[14] Includes mechanical interlock without electrical contacts. Installer to complete wiring for electronically interlocking contactor operating coils by using a N.C. auxiliary contact integrated in the contactor or optional LADN or LAD8N auxiliary contact block.
[15] Complete the catalog number by adding the coil voltage code from [Table 18.24 TeSys D Coil Voltage Codes](#), [page 18-11](#) (for example, LC2D09KUE).
[16] For additional terminal options and coil voltage/consumption options, see Catalog [MKTED210011EN](#). Check with local sales office for availability.
[17] Includes mechanical interlock (LA9D11502) with prewired electrical contacts for interlocking contactor operating coils.

18 CONTACTORS AND STARTERS-IEC

[18] Complete the catalog number by adding the coil voltage code from Table 18.24 TeSys D Coil Voltage Codes, page 18-11 (for example, LC1F265G7), or order the contactor (without a coil) and the coil separately. All coils except F780 include 1 N.O. holding circuit interlock contact. The F780 uses two coils that must be wired in series.
 [19] For additional pole options and coil voltage options, see Catalog MKTED210011EN. Check with local sales office for availability.
 [20] LC1F780 contactors operate with 2 coils as a set. The LX1FX* part number includes both coils.
 [21] Also requires rectifier DR5TE4U for 110–240 V coils.
 [22] Order 2 coils and connect them in series.
 [23] DC coils for 3-pole contactors are fitted with built-in surge suppression as standard.
 [24] When mounting overload relays LR9F5•57–LR9F5•71 and LR9F57–LR9F71 directly beneath the contactor, supporting the relays with a mounting plate is recommended. With overload relays LR9F7•–LR9F7•81 and LR9F75–LR9F81, use of a support mounting plate is mandatory. Refer to page 18-24
 [25] Interconnection kit LA7F407 is required to mount an LR9F5•71 and LR9F71 to an LC1F185.

TeSys™ F Reversing Contactors

Components are available for customer assembly of TeSys F reversing contactors. For example, the following components must be ordered to build a reversing contactor, 75 hp @ 460 V, with a 120 V / 60 Hz coil:

LC1F265

Table 18.32: Example of Components

Description	Quantity	Catalog Number
Contactors	2	LC1F115G7
Lugs (page 18-22)	6	DZ2FF1
Auxiliary contacts	2	LADN11
Power connections	1	LA9FF976
Mechanical interlock	1	LA9FF970

[26] Complete the catalog number with the coil voltage code from and (for example, LC1F115G7). All coils except F780 include 1 N.O. holding circuit interlock contact. The F780 uses 2 coils that must be wired in series.
 [27] Cannot be used for interlocking.
 [28] Including 1 N.O. + 1 N.C. make-before-break overlapping contacts.
 [29] For two contactors of different size, refer to page 18-22.

TeSys™ K Contactors

TeSys D contactors: [page 18-11](#) and [page 18-13](#)
TeSys D overload relay accessories: [page 18-23](#)
TeSys D replacement coils: [page 18-40](#)
TeSys D dimensions: [page 18-42](#) to [page 18-52](#)

[6] For low consumption coils (LC1D09–D38 only), only one front-mounted two-contact block allowed. No side-mounted contact blocks allowed.
[7] For spring terminal versions of these blocks, add a 3 to the end of the catalog number (for example, LADN223). For slip-on versions, add 9 to the end of the catalog number (for example, LADN229).
[8] Including 1 N.O. + 1 N.C. make-before break overlapping contacts.
[9] This block cannot be added to the LC1D 09–D38 contactors; a maximum of 2 blocks can be mounted on the LC1D40A-LC1/LP1D80 contactors only.
[10] 1 block may be added to the left side of LC1D09–D38, AC coils only; only 1 block may be added to either side of the LC1D40A-D80 contactors, AC coils only. Cannot be installed on TeSys D contactors with DC coils.
[11] Device supplied with 4 ground terminal points.
[12] For spring terminal versions of these blocks, add a 3 to the end of the catalog number (for example, LADT23).
[13] Scale range is expanded between 0.1 and 0.6 seconds on the dial for more accurate settings at the lower end of the range.
[14] Switching time between the opening of the N.C. contact and the closing of the N.O. contact: 40 ms ± 15 ms.
[15] To complete the catalog number, add the coil voltage code from Table 18.45. For additional voltage options, see Catalog MKTED210011EN. Check with local sales office for availability.
[16] Does not include internal coil clearing contact.
[17] Low consumption DC contactors (and relays) (code coil •L) are not compatible with the LAD6K10• mechanical latching blocks.

RC and Varistor Coil Suppressors

RC Coil Suppressor

LA4DA1U

- Limitation of transient voltage to 300% of nominal voltage maximum.
- Oscillating frequency limited to 400 Hz maximum. Slight increase in drop-out time (1.2–2 times normal).

Table 18.51: Resistor/Capacitor Circuit (RC) for Reduction of Electrical Noise in AC Contactor Coils

Installed by	Mounting on	Operating Voltage 50/60 Hz	Catalog Number
Snapping into the cavity on the right side without tools [19]	LC•D09–D38 (3P), LC1DT20–DT40 (4P)	24–28 Vac	LAD4RCE
		50–127 Vac	LAD4RCG
		110–240 Vac	LAD4RCU

		110–240 Vac	LAD4RC3U
		380–415 Vac	LAD4RC3N
Screw connection to the contactor coil terminals	LC•D80–D150 (3P), LC1D80–D115 (4P)	24–48 Vac	LA4DA2E
		50–127 Vac	LA4DA2G
		110–240 Vac	LA4DA2U
		380–415 Vac	LA4DA2N

Varistor Coil Suppressor [20]

- Limitation of transient voltage value to 200% of nominal voltage maximum.
- Maximum reduction of transient voltage peaks. Slight increase in drop-out time (1.1–1.5 times normal).

Table 18.52: Varistor (Peak Limiting) for Reduction of Electrical Noise in AC Contactor Coils

Installed by	Mounting on	Operating Voltage	Catalog Number
Snapping into the cavity on the right side without tools [19]	LC•D09–D38 (3P), LC1DT20–DT40 (4P)	24–48 Vac	LAD4VE
		110–250 Vac	LAD4VU
Snap-on mounting, and connection without tools to the contactor coil terminals	LC1D40A–D65A (3P), LC1DT60A–DT80A (4P)	24–48 Vac/Vdc	LAD4V3E
		110–250 Vac/Vdc	LAD4V3U
Screw connection to the contactor coil terminals	LC•D80–D115 (3P), LC1D80–D115 (4P)	24–48 Vac	LA4DE2E
		110–250 Vac	LA4DE2U
Screw connection to the contactor coil terminals	LC•D80–D95 (3P), LC1D80 (4P)	24–48 Vdc	LA4DE3E
		110–250 Vdc	LA4DE3U

Diode Coil Suppressor

- No overvoltage or oscillating frequency.
- Polarized component. Increased drop-out time (6–10 times normal).

Table 18.53: Diode for Reduction of Electrical Noise in DC Contactor Coils

Installed on the upper part by	Mounting on	Operating Voltage, DC	Catalog Number
Snap-on mounting and connection w/o tools to the contactor coil terminals	LC•D09 to D38 (3P), LC1DT20 to DT40 (4P)	24–250 Vdc	LAD4DDL
Clip-on front mounting	LC•D40A to D65A (3P), LC1DT60A to DT80A (4P)	24–250 Vdc	LAD4D3U
Screw connection of wire to the contactor coil terminals	LC•D80 to D95 (3P), LC1D80 (4P)	24–250 Vdc	LA4DC3U

LA4DC3U

[19] Installing the suppressor into the cavity makes the electrical connection. Overall width of the contactor remains the same.

[20] For additional accessory and replacement part options, see Catalog MKTED210011EN. Check with local sales office for availability.

Bidirectional Diode Coil Suppressor

- Protection provided by limiting the transient voltage to 2 Uc max.
- Maximum reduction of transient voltage peaks

Table 18.54: Bidirectional Peak Limiting Diode^[21]

	LC1D115–D150	1	LAD9ET4S
Red auxiliary contact block, 2 N.O. + 2 N.C.	LC1D09–D150, CAD32, CAD50	1	LADN22S
Red retrofit safety sticker	TeSys U	10	LU9ET1S

[21] For additional voltage and accessory options, see Catalog MKTED210011EN. Check with local sales office for availability.

[22] Installing the suppressor into the cavity makes the electrical connection. Overall width of the contactor remains the same.

[23] For LC•D09–LC•D65A with DC or low consumption DC coils, 3–pole contactors are fitted with built-in bidirectional diode suppression as standard.

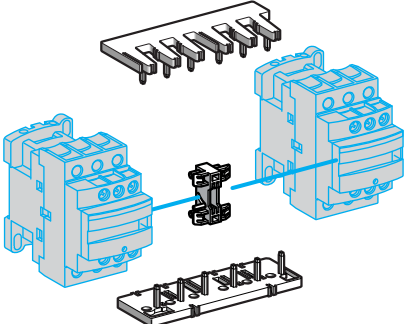

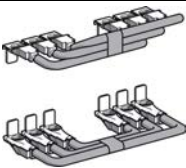

[24] Mounting at the top of the contactor on coil terminals A1 and A2.

[25] For 24 V operation, the contactor must be fitted with a 21 V coil: coil voltage code Z5 for 50 Hz; Z6 for 60 Hz; and ZD for DC.

[26] Adapter required for D09–D65A, see .

F630	LR9F7•81, LR9F81	DZ2FL1 (1) DZ2FL2 (1) DZ2FL3 (1)	3 X 2 to 600 MCM	DZ2FR1 (1)	4 to 500 MCM

These clear plastic protective shrouds are an effective means to meet international touch-safe requirements for power terminals. They are designed to be used with power cables that have been bolted to the terminal.

NOTE: The protection shrouds do not attach to contactors or overloads using DZ2F lug kits.

[28] For additional reversing accessory options, see Catalog MKTED210011EN. Check with local sales office for availability.
 [29] For 2-pole F630 contactors, order two DZ2FL1 (L1 and T2), and two DZ2FL3 (L2 and T1). For 4-pole F630, order two DZ2FL1 (L1 and T4), four DZ2FL2 (L2, T2, L3, T3) and two DZ2FL3 (L4 and T1).
 [30] Lug kits ending in the number 6 include 6 identical lugs. In some cases the LR9F overload relay mounted directly on the load side of an LC1F contactor will require a different size lug for your choice of contactor and overload. If the two sizes are different, order 3 of each size lug. Mounting hardware (screws, washers, and nuts) are provided with the contactors and overload relays, not with the lugs.

TeSys™ U Motor Starter

The TeSys U motor starter is integrated, making it simple to choose and install. It consists of a control unit snapped in a power base. TeSys U can be configured to fit specific applications as well. Optional accessories include a reverser, a current limiter, predictive maintenance options, and communication options. For detailed information about TeSys U, visit our website.

Selecting TeSys U Motor Starters in Three Steps

Table 18.84: Function Modules [13][15]

Module	Description	For use with:	Operation Requirements	Catalog Number
Fault differentiation: with manual reset (thermal overload) with auto reset	Provides indication between an overload trip and a short circuit trip.	Advanced control units only	24–250 Vac/Vdc (power from control unit)	LUFDA10
Thermal overload pre-alarm	Signals when the motor current reaches 1.05 of the full load setting on the control unit.	Advanced control units only	24–250 Vac/Vdc (power from control unit)	LUFW10
Motor load indication	Provides a signal proportional to the average currents in the three phases divided by the full load current setting of the control unit. The output corresponds to a load status of 0–2 times the full load setting of the control unit.	Advanced or multi-function control units	4–20 mA (requires separate 24 Vdc power supply)	LUFV2
Parallel wiring	Provides a convenient way to reduce control wiring and allow for connecting starters to a communications network by providing 24 Vdc for the starters.	Advanced or multi-function control units (24 Vdc only) and LU9BN11C or LU9MRC prewired connector	LU9G02 splitter box and PLC network	LUFC00

[16] See page 18-26 for placement on the power base.

[17] Communication capabilities can be integrated into existing automation architecture via a variety of protocols.

TeSys H™ Ultra Compact Starters

TeSys H ultra compact motor starters are extremely compact motor starters for asynchronous motors (AC53a utilization category) and resistive loads (AC51 utilization category). With up to 75% space savings, the 22.5 mm wide starter maintains that width even for a reversing starter! An available safety version features embedded Safe Torque Off and is SIL3 according to IEC 61508-1 and Ple according to ISO 13849-1. TeSys H is ideal for industries such as food and beverage, logistics, and durable goods. For selection, see Catalog [MKTED210011EN](#). Check with local sales office for availability.

TeSys H™ Ultra Compact Starter

TeSys™ GV Family

The TeSys GV family of products provide efficient motor control and protection solutions up to 520 amps. There are a variety of UL approved applications that enable specified configurations for use as a manual starter, motor disconnect, independent branch short-circuit protection, motor overload protection, or for use with a motor controller such as a contactor to build a complete motor control circuit. Certain configurations are approved for group motor applications as well. Refer to the following selection tables for application information, as well as the Motor Control Solutions for the North American Market data bulletin (8536DB0901) for additional information.

The TeSys GV2P (up to 32 amps) and GV3P (up to 65 amps) is rated to UL 60947-4-1 as a motor starter, and also possess Type E ratings for manual switching applications. These devices can be combined with a specified TeSys D contactor as a Type F combination motor controller (with specified line side spacer/accessories), with SCCR up to 100kA.

The TeSys GV2ME (up to 32 amps) combined with a specified TeSys D contactor is ideal for group motor applications.

The TeSys island load management starters are approved for use with TeSys GV2P and GV3P devices as a group motor arrangement. See selection table for application specifics.

The TeSys GV4PB, GV5PB, and GV6PB are motor protective circuit breakers rated to UL 489, are approved as branch circuit protection (no line side spacer required) and include motor overload protection. A full motor branch circuit is completed with the addition of a contactor, providing a compact two-component solution up to 520 motor full load amps. Pre-trip alarm accessories can be applied to these units to help anticipate and resolve issues, minimizing operator or maintenance interaction.

GV2P + LC1D Pre-Assembled Kits

Simplify your life! These new **pre-assembled kits** come with a GV2P manual motor protector already connected to an LC1D contactor. Panel builders and end users can now save wiring time by purchasing the pre-assembled kits.

TeSys BV4 Motor Circuit Protection Selection

Providing UL508 type D combination ratings in accordance to current NEC installation requirements, the TeSys BV4 motor circuit protector allows for compact motor protection in conjunction with both the TeSys and Square D NEMA product families for motor control. The BV4 is a magnetic only, UL489 Listed circuit protector rated up to 100kA short-circuit protect with adjustable instantaneous trip points and can be installed directly to a panel or standard DIN rail.

Motor Circuit Protectors must be applied per a listed combination motor controller rating as required by NEC and UL 508A. See UL.com/SCCR for combination ratings or contact local support for a tested combination appendix.

Table 18.91: TeSys BV4 Motor Circuit Breaker Selection

Open/Closed Status		GV4AE11	GV4AE11	GV7AE11	GV7AE11
Trip Alarm		—	—	—	—
Open/Closed Status — Low Level		—	—	GV7AB11	GV7AB11
Fault signalization modules					
<p>For GV4PB, SDx module mounts externally on the right side, and provides pre-trip alarm and fault signalization</p> <ul style="list-style-type: none"> • SDT95% overload alarm: thermal image of the motor is greater than 95 % of the permissible temperature rise. • SDTxxs overload alarm: circuit breaker will trip in xx seconds with the same load. xx is adjustable between 10 to 40 seconds (default 20 seconds) on the circuit breaker itself through NFC or a computer with EcoStruxure Power Commission software and an interface module (TRV00911). • SDTAM overload alarm just before tripping: in the event of a phase unbalance, overload, or on a jam fault, this output is activated to open the contactor and avoid circuit breaker tripping. In that case, contact can be manually or automatically reseted after an adjustable cooling time from 1 to 15 minutes. If after a 400 ms delay the motor is not stopped, the circuit breaker will trip. • SDT overload trip indication: circuit breaker has tripped due to an overload fault. • SDJAM jam trip indication: circuit breaker has tripped due to a jam fault. • SDUNB phase unbalance trip indication: circuit breaker has tripped due to an unbalance fault. • SDLS long start trip indication: circuit breaker has tripped due to a long start fault. • SDGF ground-fault trip indication: circuit breaker has tripped due to a ground-fault. <p>For GV5PB & GV6PB, SDx module mounts internally, and includes a pre-trip contact (400 ms prior to trip) that can be use to open the contactor, as well as a contact that indicates overload trip of the circuit-breaker.</p>		—	GV4ADM1111	LV429424 (1)	LV429424 (1)

Enclosed TeSys™ D Starters

TeSys D enclosed full-voltage starters are available in Type 1 and Type 12/3R enclosures. The enclosed TeSys D offer accepts standard TeSys D accessories and all Insta-Kits control units and control power transformer kits. For additional sizes, combinations and accessory options, see Catalog **8100CT1901**. Check with local sales office for availability.

TeSys™ AK5 Panel Busbar System

The AK5 pre-fabricated bus bar system provides a quick and easy method of mounting control devices. All components are finger safe, UL Listed, CSA approved and CE marked. Although the AK5 system can be screw mounted onto any type of support, it **must be mounted** on the AM1DL201 DIN rail when component mounting plates incorporating a tap-off are used. When using tap-offs, the nominal operating current of the bus bar (160 A @ 35°) must not be exceeded. Approvals include IEC 439, UL, CSA, DNV and LROS.

Table 18.113: 160 A, 3-Phase Busbar System

Maximum number of mounting plates					Length		Catalog Number	
Tap-off		Standard Width Plate		Extension Plate		in.		mm
