## S-Flex

 Enclosed DriveThe best drive for commercial pump and fan applications.

For more than 100 years the Square $D^{m "}$ brand has been known for the most reliable electrical products. Our industry-leading electrical expertise and commitment to quality, fuels our passion for drives. The S-Flex" enclosed drive, designed with input from HVAC consultants and contractors, was developed specifically for commercial pump and fan applications, providing the most effective solution with the quickest payback.

Think Green

## Save time

Because specifying drives can be time consuming, the S-Flex drive includes the most common requirements in HVAC specifications for pump and fan applications, such as:

- Simple start-up including preprogrammed parameters for pump and fan applications
- Windows-based PCSoft software that allows you to:
> Adjust parameters
$>$ Store and transfer drive configuration files
$>$ Monitor drive performance, including historical data
> Configure, adjust and control remotely
$>$ Store drive configuration programs
- Quick installation with EZ-M mounting
- Easy wiring conduit knock-outs on the enclosure
- Dedicated wiring terminal block
- Stock availability so that the S-Flex drive is ready when you are

## Save money

Offering unmatched value in installed cost and functionality, the S-Flex drive allows building owners, consulting engineers and contractors to focus on the essentials of demanding commercial building applications.

More than dollars and cents, you'll save with:

- Industry-leading reduced harmonic technology - eliminating the need for line reactors and DC chokes
- Energy savings - designed with energy economizing motor algorithms that maximize energy savings by reducing electricity usage
- Internal PID regulator - allowing flow rates to be adjusted for actual needs without additional hardware
- Reduced equipment maintenance cost and downtime
- 24/7 live technical support

## Save space

The most slender design in the Flex drive family, the S-Flex enclosed drive offers a compact product with just the right features for most HVAC applications. When space is a concern, we've got you covered with:

- Slender design for minimal wall space
- Minimal space requirements between drives for side-by-side wall mounting
- Retrofitting of HVAC systems in existing mechanical rooms

## Think green

The S-Flex enclosed drive assists with Leadership in Energy and Environmental Design (LEED ${ }^{T M}$ ) certification. Green buildings enhance occupant comfort and health, decrease vacancy rates, increase building valuation, and improve the bottom line by reducing operating costs. A building that runs smoothly ensures comfortable tenants and comfortable tenants mean less vacancy.

Going green with the S-Flex drive offers:

- Building owners the ability to take advantage of state and local government energy incentives
- More marketable buildings to tenants seeking energy efficient/sustainable facilities
- Retrofitting to existing systems
- The most efficient method of partial load control

## Industry－leading reduced harmonic technology（RHT）

The S－Flex drive revolutionizes harmonic mitigation with its innovative reduced harmonic technology．Significant harmonic reduction is achieved within the diode capacitor and power conversion section of the variable frequency drive，eliminating the need for a line reactor or bus reactor， which results in：
－Higher equipment efficiency
－Reduced equipment cost
－Fewer points of electrical failure
－Smaller enclosure size
－Lighter weight
Harmonics can be present in voltage，current or both．Any power source that converts AC to DC can generate harmonics．Typical sources include：
－Office equipment
－Computers
－Medical equipment
－Microprocessors
－Uninterruptible power supplies
－Fluorescent lamp ballasts
Harmonic currents do not add additional power to the electrical system， but additional current flows through electrical wires．Effects may include：
－Overheating of electrical distribution system wiring
－Shortened transformer life
－Decreased power factor
－Disturbance of power measuring systems

】 Horsepower range：
－ $1-40$ hp at 208 Vac and 230 Vac
－1－100 hp at 460 Vac
$\checkmark$ Built－in EZ－M mounting feature for quick and easy parallel alignment and mounting

】 S－Flex drive uses an Altivar ${ }^{\text {T＂I }} 212$ drive power converter with reduced harmonic technology and IGBT inverter with pulse width modulated output

】 Optional LCD text keypad
$\sqrt{ }$ Built－in Modbus ${ }^{\text {™ }}$ ，BaCnet，Metasys N2，Apogee P1 communication capability and options for LonWorks

】 Programming and diagnostics in plain English with PCSoft Superscript＂＇software

Adjustable frequency controller （AFC）－off－bypass selector switch
$\checkmark$ Optional drive input disconnect switch provides an input line power disconnect switch between the main power disconnect and the power converter

】 Optional line contactor provides an electrically interlocked line contactor between the main power disconnect and the power converter
$\sqrt{ } \sqrt{ }$ Power－on mode red LED indicator
$\checkmark$ Bypass mode green LED indicator
－Terminal block for customer＇s control connections terminal block

【 Full voltage bypass contactors
【 100 kAIC UL 508C rating and full voltage bypass
$\checkmark$ Square D circuit breaker for disconnect and over current protection
－Hinged door with latches for quick and easy interior access

ป Conduit knockouts on bottom of enclosure for quick and easy wiring

## Selection guide

The enclosed drive catalog number, located on the nameplate on the inside of the door, is coded to describe the configuration and options. Use the following table to translate the catalog number into a description of the enclosed drive.

| 460 V | HP | Full Load | Height |  | Width |  | Depth |  | Weight |  | Options |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Catalog Number |  | A | in. | mm | in. | mm | in. | mm | lbs | kgs |  |
| SFD212CG4Y | 1 | 2.1 | 40.375 | 1025.5 | 8.714 | 221.3 | 7.895 | 200.5 | 52 | 23.587 |  |
| SFD212DG4Y | 2 | 3.4 | 40.375 | 1025.5 | 8.714 | 221.3 | 7.895 | 200.5 | 52 | 23.587 |  |

## Specifications

## Electrical Specifications

| Input voltage | $208 \mathrm{Vac} \pm 10 \%, 230 \mathrm{Vac} \pm 10 \%, 460 \mathrm{Vac} \pm 10 \%$ |
| :---: | :---: |
| Displacement power factor | Approximately 0.96 |
| Input frequency | $60 \mathrm{~Hz} \pm 5 \%$ |
| Output voltage | Three-phase output, maximum voltage equal to input voltage |
| Galvanic isolation | Galvanic isolation between power and control (inputs, outputs and power supplies) |
| Frequency range of the power converter | 0.1 Hz to 500 Hz (factory setting of 60 Hz maximum) |
| Current limit | 150\% of nominal drive full load amperage (FLA) for 60 s |
| Switching frequency | Selectable from 2 kHz to $16 \mathrm{kHz}(1)$ |
| Speed reference | Al1: 0 V to +10 V , Impedance $=30 \mathrm{kOhms}$, Al3: 4 mA to 20 mA , Impedance $=250 \mathrm{kOhms}$ 0 mA to 20 mA (reassignable, $\mathrm{X}-\mathrm{Y}$ range with keypad display) Manual speed control via keypad |
| Frequency resolution in analog reference | 0.1 Hz to 100 Hz (10 bits) |
| Speed regulation | V/f: determined by motor slip, typically 3\% SLFV (sensorless flux vector): $1 \%$ |
| Efficiency | Typically greater than 95\% |
| Inputs and outputs | 3 Multi-function programmable Logic Inputs <br> 2 Analog inputs; VIA ( 4 mA to 20 mA or 0 V to 10 V ), VIB ( 0 V to 10 V ) <br> 1 Analog output; X mA to Y mA or 0 V to 10 V , software selectable <br> 2 Assignable output relays; 1 fault relay, 1 assignable relay 1 RJ45 RS485 Modbus port |
| Acceleration and deceleration ramps | 0.1 s to 999.9 s (adjustable in 0.1 s increments) |
| Motor protection | Class 10 and Class 20 overload protection with bypass in addition to controller internal electronic thermal protection |
| Keypad display | Self-diagnostics with fault messages in three languages. Also refer to instruction manual, 30072-451-61 |

## Environmental Specification

| Storage temperature | $-13^{\circ} \mathrm{F}$ to $+158^{\circ} \mathrm{F}\left(-25^{\circ} \mathrm{C}\right.$ to $\left.+70^{\circ} \mathrm{C}\right)$ with vent cover removed and without derating |
| :---: | :---: |
| Operating temperature | $+14^{\circ} \mathrm{F}$ to $+122^{\circ} \mathrm{F}\left(-10^{\circ} \mathrm{C}\right.$ to $\left.+50^{\circ} \mathrm{C}\right)$ |
| Humidity | 95\% with no condensation or dripping water, conforming to IEC 60068-2-3 |
| Altitude | $3300 \mathrm{ft}(100 \mathrm{~m})$ maximum without derating; derate the current by $1 \%$ for each additional $330 \mathrm{ft}(100 \mathrm{~m})$ |
| Enclosure | Type 1 |
| Pollution degree | Pollution degree 2 per NEMA ICS-1 and IEC 60664-1 |
| Resistance to vibrations (power converter only) | According to IEC 60068-2-6: <br> 1.5 mm zero to peak from 3 Hz to 13 Hz <br> 1 g from 13 Hz to 150 Hz |
| Resistance to shocks (power converter only) | According to IEC 60068-2 $15 \mathrm{~g}, 11 \mathrm{~ms}$ |
| Transit test to shock | Conforming to National Safe Transit Association and International Safe Transit Association test for packaging weighing 100 lbs or less |
| Codes and standards | UL listed per UL 508C as incorporating Class 10 and Class 20 electronic and electromechanical overload protection. Conforms to applicable NEMA ICS, NFPA, IEC and ISO 9001 standards |

| Accessories Catalog Numbers |  |
| :--- | :--- |
| Modbus Cable for PCSoft | WW3A8106 |
| EZ-M mounting channel, 72 in. length | EZM72MC |
| LonWorks communication card for field mounting | WW3A21312 |

## Features

## (1) Keypad display for configuration and monitoring

- Optional LCD keypad

## (2) Through the door disconnect

- Electrical disconnect circuit breaker handle with electrical lock-out/tag-out

## (3) Front access selector and lights

- Adjustable Frequency Controller (AFC) - off - bypass selector switch
- Power-on mode red LED indicator
- Bypass mode green LED indicator

## (4) EZ-M channel mounting

- EZ-M mounting feature interface built into the enclosure makes parallel alignment of multiple drives quick and easy with an EZ-M mounting channel

## 5 Hinged NEMA 1 rated enclosure

- Hinged door for quick and easy interior access
- Run status LED

## (6) Conduit knockouts

- Conduit knockouts on bottom of enclosure for quick and easy wiring to line and load terminals and control wiring terminations

## 7 Short-circuit protection

- Square D circuit breaker offers electrical disconnect and over current protection
- 100,000 A interrupt current (AIC) fully coordinated current rating to UL 508C and NEMA ICS7.1

8 Bypass contactor or optional non-bypass contactor

- Full voltage bypass contactors with electrical interlocks allow for emergency full speed operation

## © Terminal block

- Easy customer control wiring interface with terminal block connections
