Phaseo[®] – a global offer of power supplies

Brief network loss

Buffer module solution

- Enables output voltage backup in case of cuts of up to 100 ms for current consumption of 40 A (up to 4 s for 0.8 A)

Output Current	Buffer Module
40 A	ABL8 BUF24400

Availability

Redundancy solution

- Power supply paralleling
- Automatic switching without interrupts between power supplies: in case of failure of one unit, or in case of network loss if supplies are connected to different networks

Current	Redundancy Module
40 A	ABL8 BUF24400

Prolonged network loss

Battery backup solution

- Enables output voltage backup in case of losses of up to several hours
- The battery control module should be associated with a battery according to backup time required

Output Voltage	Control Module
20 A	ABL8 BBU24200
40 A	ABL8 BBU24400

Battery Capacity	Battery
3.2 Ah	ABL8 BPK24A03
7 Ah	ABL8 BPK24A07
12 Ah	ABL8 BPK24A12

Phaseo® power supplies

Designed for simple machines and applications, Modular and Optimum power supplies are primarily appreciated for their extreme compactness.

The new generation of wide-operating range Universal power supplies integrates many of the new functions and offers even more user services with ingenuity by means of function modules.

Universal range single-/three-phase 100-500 V/72-960 W

Performance and service for automated systems

- Power reserve of +50% when required
- Single phase modules 2-wire connection Neutral/Phase or Phase/Phase thanks to wide voltage range 100-500 V
- Integrated diagnostics (LED and Relay)
- Conforming to IEC/EN 61000-3-2
- Auxiliary voltage between 5 V and 15 V available DC to DC using converter modules

Modular range

Worldwide support for a global industry.

Schneider Electric is the global specialist in energy management and a leader in energy efficiency. We offer our customers local support and product availability in more than 130 countries around the world. We have integrated solutions across multiple market segments, including leadership positions in energy and infrastructure, industrial processes, building automation, and data centers/networks, as well as a broad presence in residential applications.

We are focused on making energy safe, reliable, efficient, productive and green through an active commitment to help individuals and organizations.

Put our experience to work for you.
