## Overview Weatherproof boxes, covers and lighting products

#### Weatherproof boxes, covers and lighting products

The industry's preferred choice for more than 50 years—Red•Dot® Weatherproof Boxes and Covers withstand the harshest elements and ensure trouble-free installation and performance.

#### **Boxes**

Red•Dot® boxes are made from durable die-cast aluminum and available in single- and double-gang rectangular as well as round configurations—with a variety of hub sizes to meet all needs.

#### While-in-use

Red•Dot® offers a wide variety of both metallic and non-metallic while-in-use covers. All of these covers help ensure that you meet the requirements of the National Electrical Code®.

#### Covers

Red•Dot® die-cast flip-lid weatherproof covers protect any outdoor receptacle from the elements. Constructed from rugged die-cast zinc, these covers will last a lifetime. A full line of non-metallic covers is also available.

#### Lighting

Red•Dot® has a complete lighting package for both general purpose outdoor lighting as well as decorative garden lights. All lighting products run off line voltage, providing more flexibility and brighter lighting than low-voltage or solar-powered sets, plus no additional transformers are required.

#### Merchandisers

With your choice of various stock displays or a customized display to fit your needs, Red•Dot® makes it easy to increase your counter sales.

NEC and National Electrical Code are registered trademarks of the National Fire Protection Association, Inc.

## Weatherproof metallic covers Wet or dry, all outlets can go undercover with Code Keeper®

#### Code Keeper® weatherproof covers

#### Code Keeper® while-in-use applications

Weatherproof Covers are required by the National Electrical Code® anyplace where water may come in contact with electrical outlets when a plug is in use. Code Keeper® covers are also ideal anywhere to prevent accidental disconnects, reduce tampering and to provide a lockable cover that meets OSHA requirements.

#### Suggested applications:

Residential—holiday and landscape lighting, wells and sump pumps, sprinkler systems, plug-in timers, garages, patios.

Commercial—vending machines, car washes, outdoor signs, restaurant kitchens, greenhouses and nurseries, marinas, garages, lumberyards.

Industrial—manufacturing areas, food processing, water treatment plants, security cameras, laboratories, washdown areas, loading docks.

Recreational — pools and spas, parks, playgrounds, zoos, RV connections, athletic fields, ball parks, stadiums, outdoor stages, amphitheaters, golf courses.

#### National Electrical Code® Section 406.9(B):

(1) 15- and 20-Ampere, 125- and 250-Volt receptacles installed outdoors in a wet location shall have an enclosure that is weatherproof whether or not the attachment plug cap is inserted.

The electrical code is the reason you need a wet-location cover, but the reasons to buy Code Keeper® covers are simple: aluminum construction, easy installation with instructions in English, Spanish and French, and a lifetime warranty from a manufacturer that has defined reliability in electrical construction materials for more than half of a century.

Cover the code with protection that lasts a lifetime with Code Keeper® covers.

The National Electrical Code® requires you to cover outdoor or other wet-location receptacles any time they are in use to ensure the safety of anyone who may come in contact with them.

Code Keeper® covers are corrosion-resistant, aluminum wetlocation covers that meet the requirements of the National Electrical Code® and are backed by a lifetime warranty.

Red•Dot® Code Keeper® wet-location cover is NEMA 3R Rated, UL Listed and CSA Certified and meets all the requirements of NEC® Section 406.9(B). Code Keeper® covers are rugged, corrosion-resistant metal construction that provide long-lasting durability and are not subject to cracking or breaking. Made with the same Red•Dot® quality that contractors know and trust. Code Keeper® covers offer a lifetime of use and safety.

NEC and National Electrical Code are registered trademarks of the National Fire Protection Association, Inc.

## Weatherproof metallic covers Code Keeper® metallic while-in-use covers

#### **Applications:**

- Protects receptacles, switches and plugs for single-gang and two-gang configurations in dry and wet locations
- Provides a lockable cover that complies with OSHA lockout/ tagout requirements
- Prevents accidental equipment disconnects, reduces tampering and deters theft and equipment removal

#### Features/Benefits:

- Alloy A360 copper-free\* aluminum provides increased corrosion resistance
- Die-cast, metal construction provides long-lasting durability
- NEMA 3R Rating ensures protection against falling rain, sleet and external ice formation when used with appropriate device boxes
- Clear UL® and CSA markings speed approval by inspectors
- Wide range of cover depths and receptacle configurations accommodate almost every common plug and cord size when combined with included adapter plates
- Combination box or device mounting design provides flexibility in installation

#### Standard materials:

- Covers and plates: Die-cast aluminum alloy A360 with less than .004 copper content (copper-free)
- Gaskets: Closed-cell foam

#### Standard finish:

Powder-coated finish

#### Compliances:

- NEC® Section 406.9(B)
- UL® Listed
- CSA Certified

NEC and National Electrical Code are registered trademarks of the National Fire Protection Association, Inc.

#### Sample specifications:

- Code Keeper® covers shall comply with NEC® Section 406.9(B) and be die-cast copper-free\* aluminum alloy A360.
   Covers shall be finished powder-coated paint.
- Red●Dot® Catalog No. \_\_\_\_\_\_

All 15- and 20-ampere, 125- and 250-volt receptacles installed outdoors in a wet location must have an enclosure that is weatherproof whether or not the attachment plug is inserted.

Code-Keeper® is required by the National Electrical Code® Section 406.9(B) for unattended in-use plugs in wet locations.

- Die-cast A360 aluminum alloy (less than .004% copper content)
- NEMA 3R Rating
- Clear UL® and CSA markings
- Wide range of cover depths and receptacle configurations
- Sturdy lockable cover tab complies with OSHA lockout/ tagout requirements
- Combination box- or device-mount design (for most styles)
- Powder-coated finish
- "Extra-Duty" per NEC® Section 406.9(B)(1)

## Weatherproof non-metallic covers Code Keeper® extra-duty non-metallic weatherproof while-in-use covers

#### One cover handles GFCI, single, duplex or switch configurations

Red • Dot ® Code Keeper ® extra-duty non-metallic weatherproof while-in-use covers make it easier than ever to comply with National Electrical Code® (NEC®) requirements for receptacles in wet locations. Weatherproof covers are often subject to bumps and impact through everyday use, but this reinforced design withstands abuse, featuring a stainless steel hinge pin for rugged cover attachment that's great for high-traffic areas.

Pre-configured for GFCI, each cover ships with adapter plates to accommodate single or duplex receptacles and switches. Now, contractors can handle any application they encounter without needing dozens of different covers.

- Complies with NEC® Section 406.9 (B) (1) and 590.4 (D) (2) for extra-duty outlet box hoods now required in wet locations
- Robust stainless steel hinge pin—ideal for high-traffic areas
- Available in single- and two-gang configurations with a variety of cover depths
- Accommodates numerous receptacle configurations and almost every common plug and cord size
- Keyhole mounts make it fast and easy to install-just loosen existing device screws and slide cover over
- Combination box or device-mounting design provides flexibility in installation
- Lockable covers comply with OSHA lockout/tagout (LOTO) requirements
- Ships with adapter plates and pre-mounted gaskets
- Unique wasp guard included to keep out unwanted pests

### Weatherproof metallic boxes Universal boxes and covers

#### **Applications:**

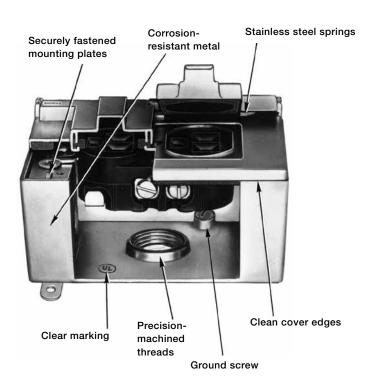

- Dry-Tite<sup>™</sup> boxes and covers protect wiring devices, switches, electronic components and terminal blocks in dry, damp and
- Accessible wiring chamber provides a convenient location to maintain or change a system, pull conductors and make splices
- Junction box for branch conduits

#### Features/Benefits:

- Alloy A380 aluminum, certified zinc alloy and stainless steel springs provide increased corrosion resistance
- Die-cast construction and industrial design combine to produce a rugged protective enclosure for devices on many applications
- Clean cover edges provide good gasket sealing
- Precision-cast and machined surfaces permit safer wire pulling
- Clear UL and cubic content markings speed approval by inspectors
- Convenient mounting lugs for a variety of mounting methods
- Securely fastened mounting plates reduce costly callbacks

#### Standard materials:

- Boxes: Die-cast aluminum alloy A380
- Cover Plates: Stamped aluminum alloy or certified die-cast zinc alloy ZAMAK 3
- Cover Lids: Certified die-cast zinc alloy ZAMAK 3

#### Standard finish:

Powder-coated finish

#### Compliances:

- UL® Listed (UL File No. E-28688)
- Boxes: CSA Certified with factory installed ground screw\*\*
- Covers: CSA Certified
- Covers suitable for use in wet locations with covers closed
- CCB and CCT series covers suitable for use in wet locations
- Federal Spec. W-C-586
- NEMA 3R Rated

#### Sample specifications:

- Universal device boxes and covers shall be of aluminum alloy A380 and certified zinc alloy. All conduit stops shall be free of rough edges. Covers shall have stainless steel springs. Covers shall be finished with powder-coated paint. Universal device boxes and covers shall be Red • Dot® Catalog No.
- \*\* Consult factory for lead time and minimum quantity.

2CCTS

Accessible wiring chamber provides a convenient location to pull conductors and make splices in dry, damp or wet locations.

- Maximum cubic capacity
- Securely fastened mounting plates
- Corrosion-resistant materials
- Powder-coated finish
- Ground screw included
- Precision-machined threads
- Clear UL and cubic volume marking

### Universal design installs in both horizontal and vertical applications.

New Red • Dot® Universal Flip-Lid Weatherproof Covers save you time and money by reducing the number of items you have to inventory to complete a job. Capable of mounting either vertically or horizontally, the covers provide added versatility with innovative adapter plates to support all of the most common installation configurations—12 with the single-gang cover and 25 with the 2-gang cover. Choose from silver, bronze or white covers.

#### Features:

- Included adapter plates offer 12 installation options with singlegang cover and 25 installation options with 2-gang cover
- Keyhole openings on back enable easy installation on an existing outlet
- Durable, die-cast zinc-alloy construction
- Suitable for use in wet locations with cover closed
- Available in silver, bronze and white
- Lockable for security when not in use
- Easy access to outlet with 130° opening
- Preconfigured for GFCI—the industry's most common outdoor application

CCU

### Accommodates multiple outlet configurations (receptacles not included)

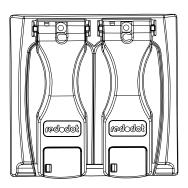

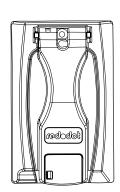

Includes two adapter plates, single receptacle up to 19/16"

### Weatherproof metallic boxes Round boxes, extensions and covers

#### **Applications:**

- Junction for branch conduits
- Spacious, accessible wiring chamber provides a convenient location to maintain or change a system, pull conductors and make splices

#### Features/Benefits:

- Copper-free\* aluminum provides increased corrosion
- Precision-cast and machined surfaces permit safer wire pulling
- Clean cover edges provide good gasket sealing
- Precision NPT threads enable trouble-free field installation for rigid, IMC or EMT conduit
- Deep-slotted stainless steel cover screws for faster
- Clear UL® and cubic content markings speed approval by inspectors

#### Standard materials:

- S Boxes: Die-cast aluminum alloy A380 - SS-B Cover: Stamped aluminum

Gaskets: Composition

#### Standard finish:

- Powder-coated finish

#### Compliances:

- UL® Listed
- Federal Spec. W-C-586B
- Sample Specifications:
- Outlet boxes and covers shall be die-cast copper-free\* aluminum alloy A380 ("S"). Outlet boxes and covers shall be finished with powder-coated paint.

Outlet boxes and covers shall be Red•Dot®. Catalog No.

## Weatherproof metallic lampholders Lampholders, garden lights and accessories

#### **Applications:**

- Security and general outdoor lighting fixture for residential and commercial applications
- Accent lighting fixture for highlighting outdoor signs and architectural details
- Compact outdoor lighting fixture that can be mounted easily in most places and aimed in any direction

#### Features/Benefits:

- Clean lines and precision manufacturing result in a fixture that will enhance any application
- High-quality replaceable porcelain socket with hightemperature leads enables easy field maintenance
- Positive-locking mounting arm keeps fixture in aimed position to reduce costly callbacks
- Ground screw boss in arm

#### Standard materials:

- Fixture: Certified die-cast zinc alloy ZAMAK 3
- Gasket: Heat-resistant composition or high-temperature silicone
- Socket: Center contact, porcelain, medium base

#### Standard finish:

- Powder-coated finish
- Chrome-plated zinc

#### Compliances:

- UL<sup>®</sup> Listed
- Suitable for use in wet locations

#### Sample specifications:

- Lampholders shall be certified die-cast zinc alloy ZAMAK 3. Lampholder will have positive-locking mounting arm and replaceable socket. Fixture shall be Red•Dot® Dry-Tite™. Catalog No. \_\_\_\_\_ for use with \_\_\_\_\_ Watt incandescent lamp.

|----------|--------|---|-----------|
| AD11-2   | Silver | "Y" Adapter—converts one outlet to two—1/2" threads | 10        |

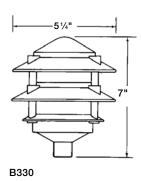

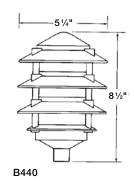

#### Sample Specifications:

- Fixture shall be certified die-cast zinc alloy ZAMAK 3; socket shall be porcelain, center contact and replaceable; socket shall have extended leads for easy wiring; fixture shall be Red • Dot® Dry-Tite™
- Catalog No. \_\_\_\_\_\_

**Applications:** 

- Lighting for walkways, paths or driveways
- Accent lighting for garden and terrace areas
- Ground-level security lighting

#### Features/Benefits:

- Certified zinc alloy provides increased corrosion resistance
- High-quality replaceable porcelain socket with hightemperature leads enables easy field maintenance

#### Standard materials:

- Fixture: Die-cast zinc alloy ZAMAK 3
- Globe: Lime crystal glass
- Socket: Center contact, porcelain, medium base

#### Standard finish:

- Green powder-coated finish
- Bronze powder-coated finish

#### Compliances:

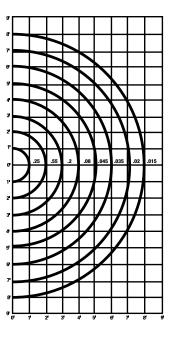

- UL<sup>®</sup> Listed
- Suitable for use in wet locations

### Step up to SiteLight® line voltage outdoor lighting

#### Planning your outdoor lighting

On graph paper, outline your home and grounds. Indicate key features you wish to highlight such as stairways, statuary, shrubbery or flowering plants. SiteLight Spot lights and swivel lights provide focused illumination to showcase these areas.

The diagrams below show how you can achieve three special lighting effects with SiteLight spot lights and swivel lights.

Grazing from side or bottom to show texture

Uplighting from below makes details stand out

Silhouetting from behind provides drama

Use SiteLight path lights and swivel lights for pathways, driveways and general garden lighting. The chart below will help you determine fixture spacing.

| Bright and even | Medium dappled | Soft mood |  |  |
|-----------------|----------------|-----------|--|--|
| 8'-10'          | 12'-18'        | Over 20'  |  |  |

#### SiteLight line voltage outdoor lighting

For outdoor lighting, nothing compares to the full power (120V) and beauty of SiteLight. SiteLight uses regular household voltage and standard bulbs that are readily available. There are no expensive transformers to purchase or replace. With SiteLight®, you can add fixtures when and where you want them and still enjoy lighting that is up to five times brighter than low-voltage.

Use SiteLight to highlight gardens, statuary, shrubbery and to effectively light decks, stairs, pathways, pools and driveways. SiteLight meets every outdoor lighting need...from soft, indirect deck lighting, to brilliant, focused spot lighting. Use SiteLight to beautify your property while enhancing safety and security.

Step up to SiteLight line voltage outdoor lighting and add permanent value to your home.

#### Compare SiteLight to low-voltage sets

- SiteLight is up to five times brighter than low-voltage more light with fewer fixtures than with low-voltage sets
- SiteLight gives you flexibility in spacing, the number of fixtures and the length-of-run. Light where you need it low-voltage sets have a fixed limit on length-of-run and the number of fixtures
- SiteLight uses regular household current—no expensive lowvoltage transformer to purchase or replace
- SiteLight uses readily available, standard bulbslow-voltage bulbs are often found only where sets are sold
- SiteLight lets you add on fixtures by tapping into runlow-voltage sets will generate even less light if transformers are at capacity

#### SiteLight meets every outdoor lighting need

- From soft, indirect deck lighting to brilliant, focused spot lighting, use SiteLight to beautify any property while enhancing safety and security
- Lighting for walkways, pathways and driveways
- Stairway, perimeter and task lighting for decks
- Accent and ambient lighting for pool/patio and garden areas
- Highlighting to emphasize landscape details or specific objects
- Ground-level safety/security lighting to illuminate dark areas

#### We've made installation easy

Everything you need is included in the SiteLight® Kit, except a bulb, supply cable and tools (screwdriver, wire strippers, etc.). Only three connections are required to wire each fixture to the supply cable. With the SiteLight PVC in-ground mounting tube, there is no need to pour concrete to secure the fixtures. Just position the tube and pack dirt around it. Attach your SiteLight® to the mounting tube and your installation is complete.

SiteLight is designed for a lifetime of trouble-free use. SiteLight is high-quality, permanent lighting built to add value and beauty to your home.

#### **Applications:**

- Lighting for walkways, pathways and driveways
- Stairway, perimeter and task lighting for decks
- Accent and ambient lighting for pool/patio and garden areas
- Highlighting to emphasize landscape details or specific objects
- Ground-level safety/security lighting to illuminate dark areas

#### Features/Benefits:

- Copper-free\* aluminum construction provides increased corrosion resistance
- Sturdy die-cast aluminum construction provides durability
- Architectural bronze color blends into landscape and deck areas
- High-quality, replaceable porcelain socket with brass screw shell (except K851BR, K852BR)
- Aluminum mounting tube cap houses and protects wire connection (ground-installed fixtures)
- PVC ground tube provides an innovative installation method saving costly labor and traditional installation materials (ground-installed fixtures)
- Wire connectors and ground wire enable safe, easy connections
- Tempered glass lens and silicon gaskets keep socket dry (K831BR, CS841BR, K861BR)
- Positive locking arm can be adjusted to the desired position (K831BR, CS841BR, K861BR)
- Fixtures use regular household voltage (120V)

#### Standard materials:

- Fixture: Die-cast aluminum alloy A360 with less than .004% copper content (copper free\*)
- Lens: Tempered glass (K831BR, CS841BR, K861BR)
- Lens: Polycarbonate (K811BR, K812BR, K821BR, K822BR, K851BR)
- Socket: Porcelain, center contact, brass screw shell, medium base (K811BR, K812BR, K821BR, K822BR, K831BR, CS841BR, K861BR), molded plastic socket with candelabra base (K851BR and K852BR)
- Mounting Tube: Gray PVC, schedule 40 (ground-installed fixtures)

#### Standard finish:

Bronze powder-coated finish

\* Less than .004% copper content

#### Compliances:

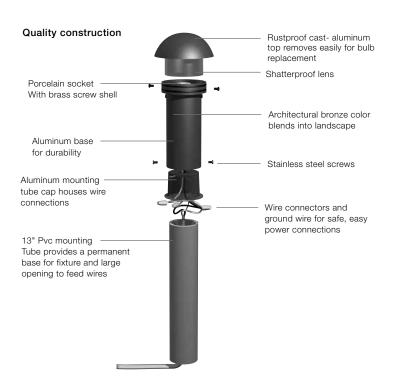

- UL Listed
- Suitable for use in wet locations
- Ground mounting (suitable for use 4' or less above grade level) except K852BR and K861BR

#### Sample specifications:

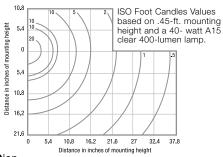

Fixture shall be die-cast copper-free\* aluminum alloy A360, with bronze powder-coated finish. Sockets shall be porcelain, center contact, brass screw shell-medium base for K811BR, K812BR, K821BR, K822BR, K831BR, K841BR and K861BR fixtures. Sockets shall be molded plastic with candelabra screw base for K851BR and K852BR fixtures. All sockets shall have extended leads for easy wiring.

#### Easy to install:

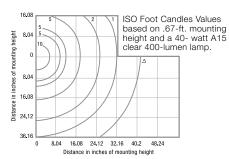

- Only three wire connections per fixture are required
- No need to pour concrete
- All connections are made above ground

Note: Total luminaire efficiency=11.6%.

### Vaportight lighting Industrial vaportight lighting

#### **Applications:**

- Low-maintenance indoor/outdoor lighting where moisture, dirt, dust, corrosion and rough service are problems
- Low-profile fixture design for where low ceiling height presents a lighting problem
- To light cold storage facilities, walkways, bridges, tunnels and security locations
- Used with colored globes as warning, caution or directional lights; for 100- or 200-watt medium-base incandescent lamps

#### Features/Benefits:

- Copper-free\* aluminum and stainless steel screws provide increased corrosion resistance
- Precision-cast and machined surfaces permit safer wire pulling
- Fully threaded glass globes prevent cross threading, ensuring a tight seal
- High-quality replaceable porcelain socket with hightemperature leads result in a long-lasting fixture
- Five mounting configurations packaged three different ways to suit all customer requirements
- Colored, heat-resistant and shatterproof LEXAN® globes available

#### Standard materials:

- Fixture and guards: Die-cast aluminum alloy A360 with less than .004% copper content (copper-free), and stainless steel screw
- Globe: Lime crystal glass
- Socket: Center contact, porcelain, medium base

#### Standard finish:

Powder-coated finish

### Compliances:

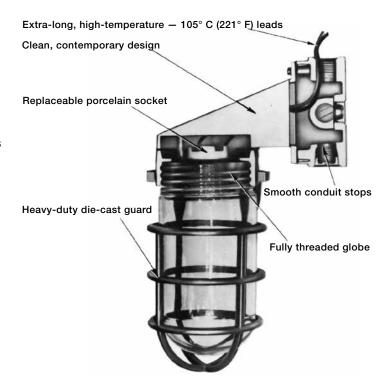

- UL Listed
- Suitable for use in wet locations only when oriented as shown (mounted with lamp base up and guard/globe down)

### Sample specifications

 Fixture shall be die-cast copper-free\* aluminum alloy A360 All conduit stops shall be coined and free of rough edges. LEXAN® globes shall have full threads. Sockets shall be porcelain. Fixtures shall be finished with powder-coated paint. Fixtures shall be Red • Dot® Catalog No.\_\_

\* Less than .004% copper content.

LEXAN® is a registered trademark of SABIC Innovative Plastics Company.

## Vaportight lighting Indoor/outdoor lighting

### Low-maintenance indoor/outdoor lighting where moisture, dirt, dust, corrosion and rough service are a problem.

- Compatible with incandescent and most self-ballasted compact fluorescent bulbs
- For indoor or outdoor use
- Fixture and guard die-cast copper-free aluminum, less than .004% copper content
- Available in components or complete fixture
- Low-silhouette incandescent vaportight
- Variety of mounting configurations
- UL Listed

## Weatherproof non-metallic covers Red•Dot® Deck Grommet PRO™

### Eliminates the safety hazard of cords plugged in to outdoor post or wall mounted outlets

Now you can provide power for small appliances on outdoor raised decks safely and conveniently with the new Red•Dot® Deck Grommet™ PRO. When not in use, the receptacle remains concealed beneath the deck board, showing only a stylish non-metallic cover. The Deck Grommet™ PRO is a versatile power solution for protecting outdoor receptacles mounted on a raised deck surface.

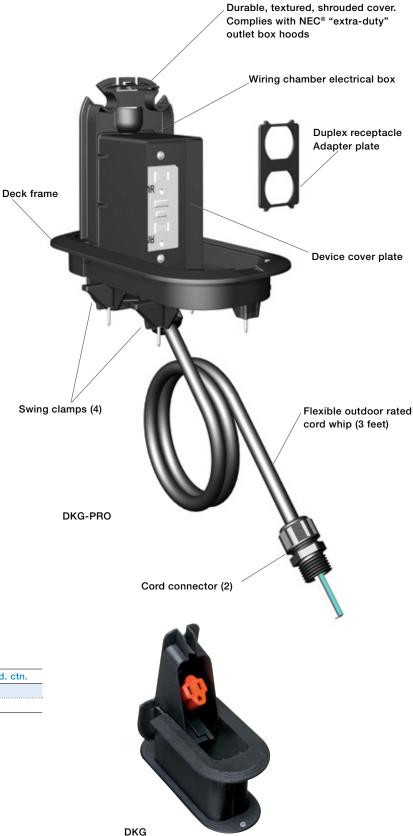

Deck Grommet™ PRO complies with National Electrical Code® (NEC) requirements for installing receptacles in wet locations. The NEMA 3R solution provides protection against falling rain, sleet, snow, and external ice formation. The Deck Grommet™ PRO is the first device to pass the agency testing requirements specifically developed for receptacles installed in a raised deck for "While-In-Use" application.

#### Features & benefits:

- Complies with NEC® Section 406.9 (B) (1) and 590.4 (D) (2) for unattended in-use plugs in wet locations and "Extra-Duty" outlet box hoods now required for any installation.
- Ideal for outdoor living spaces and light commercial raised deck applications. Examples: residential recreation areas, outdoor restaurants, hospitality recreation areas, etc.
- Use for easy access to power for small appliances, lighting, water fountain pumps, etc.
- Eliminates the potential safety hazard of power cords draping along the deck surface.
- The power outlet remains recessed below the raised deck whether in use or not.
- Duplex adapter plate provided for use with conventional TR/WR duplex receptacle.

#### Red Dot® Deck Grommet PRO

| DKG-PRO     | Deck Grommet™ PRO, tray pack | Black | 4         |

### Stainless steel while-in-use box and cover system

Meets the new NEC® and UL® requirements for "extra-duty" outlet box covers while being rated for liquid ingress protection and corrosion resistance in environments that require daily washdown. NSF certified design.

Use of caustic chemicals during washdown and sanitation, pathogen concerns, 24/7 manufacturing environments and increasingly stringent USDA, FDA and HACCP requirements mean one thing—the Food and Beverage Industry has unique electrical power equipment needs that separate them from other industrial plants. Protecting electrical devices in these harsh and demanding environments can be a challenge. National Electrical Code® (NEC®) requirements mandate protection of electrical devices in wet locations even when a cord is plugged into a receptacle. The durability of these products, particularly in high traffic areas, plays a major role with respect to the new NEC® changes calling for more robust designs for outlet covers protecting wiring devices in wet locations.

The Red Dot® Stainless Steel While-In-Use Box and Cover System makes it easier than ever to comply with NEC® requirements for installing receptacles in harsh environments that require washdown maintenance. While-In-Use Covers provide wet location protection for plugs that remain installed for an extended period of time. The Red Dot® Stainless Steel While-In-Use Box and Cover System complies with the new NEC® and UL® requirements for "extra-duty" outlet box covers while being rated for harsh washdown applications.

### **Features and Benefits**

- NEMA 4X rated (while not in use) when installed properly
- NEMA 3R rated
- NSF certified
- cULus Listed
- 316 Stainless Steel construction
- Corrosion resistant
- Smooth, sloped surfaces to allow maximum runoff
- Configurable a variety of sizes and type of outlets up to a 30 amp receptacle can be used
- Electrical cord splash guard
- Allows ½" to 1" conduit fittings
- Quick access quarter turn latch
- Integral padlock hasp
- 37.3 cubic inch capacity integral conduit body
- Stand-off mounting provides separation from the wall, allowing superior washdown accessibility
- Lift-off, bullet-style hinges allow for easy access and cleaning
- Integral conduit body, electrical box, and while-in-use cover all in one
- Continuous, 1-piece, replaceable UL Listed silicone gasket
