

## ENGINEERING SPECIFICATION

SYMCOM MODEL 350-400-2 / 350-400-2-5 / 350-400-2-6 / 350-400-2-8 / 350-400-2-9

# 3-PHASE VOLTAGE MONITOR/PROTECTION RELAY

## PART 1 GENERAL

### 1.1 REFERENCES

- A. UL 508 Industrial Control Equipment Underwriters Laboratories
- B. IEC 60947 Low Voltage Switchgear and Controlgear International Electrotechnical Commission
- C. ANSI/IEEE C62.41 American National Standards Institute/Institute of Electrical & Electronics Engineers

#### 1.2 WARRANTY

A. Manufacturer Warranty: The manufacturer shall guarantee the equipment to be free from material and workmanship defects for a period of five years from the date of manufacture when installed and operated according to the manufacturer's requirements.

### PART 2 PRODUCTS

## 2.1 MANUFACTURERS

For Model 350-400-2

The equipment specified shall be the Model 350-400-2, manufactured by SymCom, Inc.

For Model 350-400-2-5

The equipment specified shall be the Model 350-400-2-5, manufactured by SymCom, Inc.

For Model 350-400-2-6

The equipment specified shall be the Model 350-400-2-6, manufactured by SymCom, Inc.

For Model 350-400-2-8

The equipment specified shall be the Model 350-400-2-8, manufactured by SymCom, Inc.

For Model 350-400-2-9

The equipment specified shall be the Model 350-400-2-9, manufactured by SymCom, Inc.

## 2.2 DESCRIPTION

- A. Regulatory Requirements:
  - 1. The equipment shall be UL Listed as type NKCR—Industrial Control Equipment-Motor Controllers-Auxiliary Devices.
  - 2. The equipment shall be ULC Listed as type NKCR7—Industrial Control Equipment-Motor Controllers-Auxiliary Devices Certified for Canada.

## 2.3 PERFORMANCE/DESIGN CRITERIA: 3-PHASE VOLTAGE MONITOR/PROTECTION RELAY

- A. Protective Relay Functions
  - 1. The equipment shall provide protection against the following conditions:
    - a. phase loss
    - b. phase reversal
    - c. low voltage
    - d. voltage unbalance
    - e. rapid cycling due to power faults\*
    - For Model 350-400-2-9 only
    - f. high voltage
- B. Capabilities and Features
  - 1. Inputs
    - a. The equipment shall accept 3-phase input voltage range of 380-480VAC.
    - b. The equipment shall accept 3-phase input voltage 50/60 Hz.
    - 2. Outputs
      - For Model 350-400-2 and 350-400-2-9

a. The equipment shall include one Form C (SPDT) output relay. Contacts pilot duty rated 470VA@600VAC.

### For Model 350-400-2-5

b. The equipment shall include one DPDT output relay. Contacts pilot duty rated 470VA@600VAC.

#### For Model 350-400-2-6

- a. The equipment shall include two relays:
  - 1) Relay 1 shall be Form C (SPDT). Contacts pilot duty rated 480VA@240VAC. Contacts general purpose rated 10A@240VAC.
  - Relay 2 shall be Form C (SPDT). Contacts pilot duty rated 720VA@240VAC. Contacts motor load rated 1hp@240VAC. Contacts general purpose rated 15A@240VAC.

For Model 350-400-2-8 only

a. The equipment shall include two Form C (DPDT) output relays. Contacts pilot duty rated 720VA@240VAC. Contacts motor load rated 1hp@240VAC. Contacts general purpose rated 15A@240VAC.

\*Using the adjustable restart delay to increase time before restart after a fault.

- 3. The equipment shall include:
  - For All Models
    - a. a low voltage trip of 90% of nominal setting
    - b. a phase unbalance trip point of 6%
    - c. a trip delay of 4 seconds for low voltage faults and 2 seconds for unbalanced and single-phasing faults
    - d. an adjustable restart delay of 2-300 seconds
    - e. voltage accuracy ±1%
    - For Models 350-400-2,350-400-2-5, 350-400-2-6, 350-400-2-9
    - f. a manual reset
    - For Model 350-400-2-9 only
    - g. a high voltage trip of 110% of nominal setting
    - h. a trip delay of 4 seconds for high voltage
- 4. The equipment shall have one indicator light. The indicator light has the capability to indicate whether the phase monitor is in run mode, restart delay mode, or fault mode.
  - For Models 350-400-2, 350-400-2-5, 350-400-2-6, and 350-400-2-8
  - a. Fault modes shall be low voltage, unbalance/single phase and phase reversal.
  - For Model 350-400-2-9 only
  - a. Fault modes shall be low/high voltage, unbalance/single phase and phase reversal.
- C. Electromagnetic Compatibility
  - 1. The equipment shall be immune to electrostatic discharge per IEC 61000-4-2, Level 3, 6kV contact discharge and 8kV air discharge.
  - 2. The equipment shall be immune to electrical fast transient bursts exceeding IEC 61000-4-4, Level 4. Specified limits shall be 2kV line-to-line and 4kV line-to-ground.
  - 3. The equipment shall be immune to electrical surges per IEC 61000-4-5. Specified limits shall be Level 3, 4kV line-to-line, and Level 4, 4kV line-to-ground.
- D. Dielectric Isolation: Equipment withstands an alternating current potential of 1000V plus twice the rated voltage of the equipment for 1 minute without breakdown between uninsulated live parts and the enclosure with the contacts open and closed; between terminals of opposite polarity with the contacts closed; and between uninsulated live parts of different circuits.
- E. Environmental Requirements
  - 1. The equipment shall operate continuously without derating in ambient temperatures of -40° to 70°C (-40° to 158°F).
  - 2. The equipment shall operate continuously without derating in relative humidity of 10% up to 95% non-condensing per IEC 68-2-3.
  - 3. The equipment shall operate properly after storage in ambient temperatures of -40° to 80°C (-40° to 176°F).
- F. Dimensions: The equipment dimensions shall not exceed 2.90" high X 5.250" wide X 2.913" deep.
- G. Mounting:
  - 1. The equipment shall be surface mountable.
