

# TECHCLEAN® BRUSHES

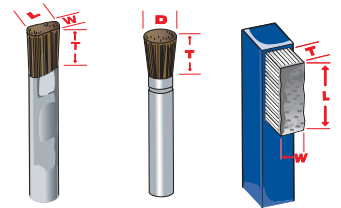

**RoHS Compliant**   
 "Always was...always will be"

## Choose the Right Bristle Material for Your Needs:

**Natural** — Soft, resilient and long lasting. Hog bristles are stiffer than horsehair.

**Metal** — For burnishing, polishing, non-sparking static dissipation and deburring. Brass is a softer bristle than stainless steel.

**ESD-Safe** — Prevents static build-up on brush. Ideal for dry brushing. Bristles approximately 10°.
