USB-C to HDMI over Cat6 Extender Kit, Transmitter/Receiver, PD 3.0, PoC, HDR, 4K @ 60 Hz, 4:4:4, 125 ft., TAA

MODEL NUMBER: B127-1A1-CH

Transmitter/receiver kit extends a 4K A/V signal via Cat6 cable from a USB-C tablet or laptop to an HDMI display up to 125 ft. away.

Features

USB-C to HDMI Extender for Displaying Video in Boardrooms and Conference Rooms This complete transmitter and receiver system is recommended for video presentations in conference rooms, schools, trade shows, meeting facilities, houses of worship, retail settings and digital signage applications where the source and display are farther apart than conventional A/V cables allow. The B127-1A1-CH extends 4K video and stereo audio signals from a USB-C source device to an HDMI display up to 125 feet away via user-supplied Cat6 Ethernet cabling.

Supports USB DisplayPort Alternate Mode for Converting Audio/Video Signals By connecting a USB-C cable to a source device that supports DisplayPort Alt Mode, you can output 4K video and digital audio to an HDMI monitor, television or projector without installing special software drivers.

Transmits Crystal-Clear 4K HDMI Video with HDR and 4:4:4 Color The B127-1A1-CH supports Ultra HD video resolutions up to 4K x 2K (3840 x 2160) at 60 Hz, as specified in HDMI 2.0, with 8-channel LPCM, AC-3 and DTS digital audio. Built-in equalization automatically fine-tunes the image quality at the remote display with no time-consuming manual fiddling needed. The extender is capable of carrying HDR signals, which provide a wide range of vibrant colors with richer contrast, brighter whites and deeper blacks. HDCP 2.2 compliance allows you to stream iTunes and Netflix content with no complications. This kit also supports 4:4:4 chroma subsampling for top-level PC gaming or using your HDTV as a PC monitor.

Built-In PoC Technology Provides Receiver Power to Avoid Bulky External Power Bricks Power over Cable (PoC) technology powers the remote receiver over Cat6 cable. Green and orange LEDs on both the transmitter and receiver will light up to indicate the system is receiving power and a signal is being transmitted. PoC lets you avoid the hassle of a bulky power brick and gives you the freedom to place the receiver away from an AC outlet.

PD 3.0 Charging Port Charges the Source Device to Avoid Battery Drain and Signal Loss The USB-C Power Delivery port provides power output up to 20V 3A (60W), which is sufficient wattage for charging and powering the connected source device, such as a MacBook Pro or Windows laptop. Connect the
